

THE NEXT FRONTIER FOR NUTANIX UNIVERSITY

Need to brighten up your résumé? Nutanix University is proud to present the next era of certifications!

Over the last several years Nutanix Education program has given our customers, partners and community solid skills and knowledge of Nutanix's products and enterprise cloud. And now, just as the Nutanix product suite has expanded beyond private and on-prem clouds into public clouds, hybrid clouds, and multicloud environments, our education program has also expanded to match.

NUTANIX™ UNIVERSITY

Nutanix Certified Associate (NCA)
Our foundational certification helps you build a solid base for a rewarding career in multicloud technology.

Nutanix Certified Professional (NCP)
Once you've built real-world experience, this level lets you focus on specific concentrations to chart a customized path for your career.

Nutanix Certified Master (NCM)
Master-level certifications are designed for those who want to continue their certification journey and deepen their ability to manage, design, and optimize Nutanix solutions.

Nutanix Certified Expert (NCX)
This level of certification is for Nutanix architects and recognizes your ability to create business-requirements-driven multicloud solutions using our proven design method.

Nutanix Platform Expert (NPX)
The highest level of certification Nutanix offers – recognizes your ability to architect, validate, and deliver G2000-class multicloud solutions.

“We also wanted to give storage administrators, system engineers, newcomers to the industry, and others a path to transition into the world of hybrid and multicloud environments. The new Nutanix education program also provides a better balance of skill levels, making it easier than ever for you to grow and develop your career.”

Inder Sidhu,
EVP, Global Customer Success

“We wanted to give our 6000+ Nutanix Certified Professionals (NCPs) a way to further develop their cloud skills and expand into new technologies,” says Inder Sidhu, EVP, Global Customer Success. That’s why we are developing several new certification tracks to let you build a career development path that meets your current and future goals. Consistent with Nutanix’s overall product direction, our Certification program focuses on 4 key areas:

- **Digital HCI Services**
(Multicloud Infrastructure)
- **Data Center Services**
(Data Services, Security & Governance, Business Continuity)
- **DevOps Services**
(Multicloud Automation, Database Automation)
- **Desktop Services**
(End User Computing)

“The educational services that Nutanix provides has been an asset to our growth and development of our staff.”

Matthew Vilord,
ITC Manager, City of Cape Coral

“The online courses were fantastic learning resources and really enabled our employees to manage the environment.”

Brian Oamek, Sr. Enterprise IT Architect,
Trek Bicycle Corporation

GET PREPARED WITH OUR NEW TRAINING OFFERINGS

Whatever path you choose, Nutanix University will support you every step along the way with learning plans designed around flexibility and freedom. Whether you prefer bite-size online courses, or the engagement and interaction of instructor-led courses, there is a training plan for each new certification to help you chart your career.

These learning plans break the material down into distinct components or “modules,” giving you the flexibility to go in-depth on areas you’re less familiar with and skim through – or skip entirely! – topics you deal with every day.

In addition, Nutanix provides Exam Blueprint Guides and Practice Exams for every certification. This blended learning combination of instructor-led digital training, PDF references, videos, exam tools and more will help you to succeed at whichever track you choose.

Learn more about the new certification roadmap and the related training courses at www.nutanix.com/certification or www.nutanix.com/university.
