

The Nutanix logo is centered in the upper half of the slide. It consists of the word "NUTANIX" in a bold, white, sans-serif font, followed by a small "TM" trademark symbol. The background features a blue-to-green gradient with large, semi-transparent, overlapping geometric shapes that form a stylized 'X' or 'N' shape.

Modernization Journey

June 2022 | CONFIDENTIAL

Agenda slide

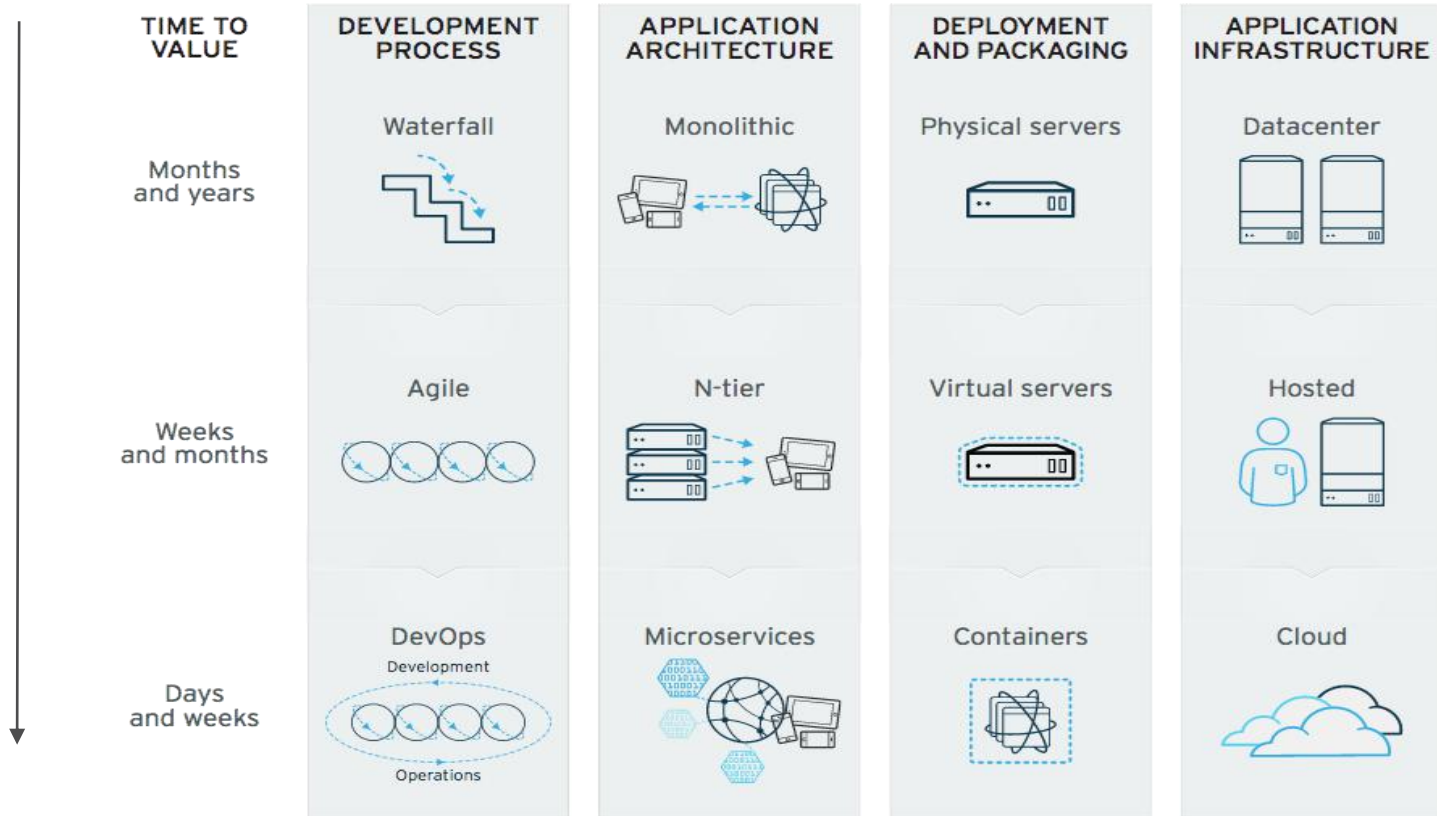

- 1 Digital Transformation and Cloud Native
- 2 How Have We Done So Far?
- 3 Modernization Journey
- 4 Alliance
- 5 Red Hat + Nutanix

Cloud Native

The Evolution to Cloud Native

What are Cloud Native Apps?

Red Hat

- 1. Packaged as lightweight containers**
2. Developed with best-of-breed languages and frameworks
- 3. Designed as loosely coupled microservices**
4. Centered around APIs for interaction and collaboration
5. Architected with a clean separation of stateless and stateful services
6. Isolated from server and operating system dependencies

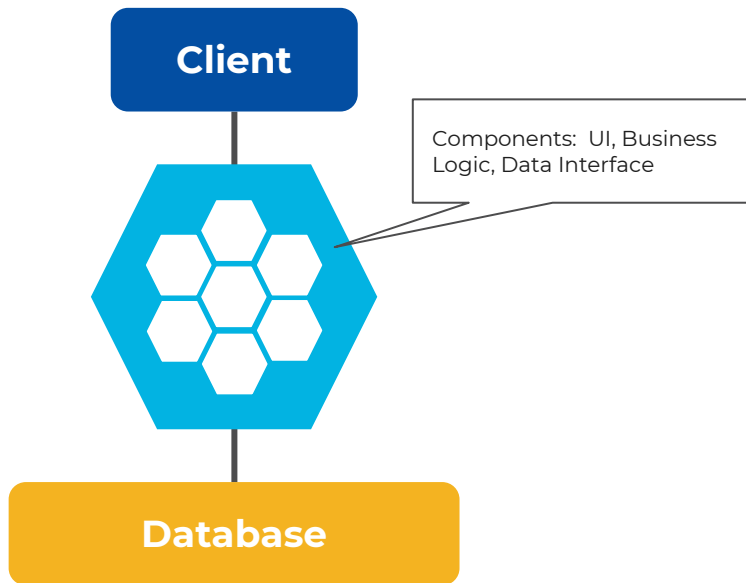

NUTANIX

- 7. Deployed on self-service, elastic, cloud infrastructure**
- 8. Managed through agile DevOps processes**
9. Automated capabilities
10. Subject to defined, policy-driven resource allocation

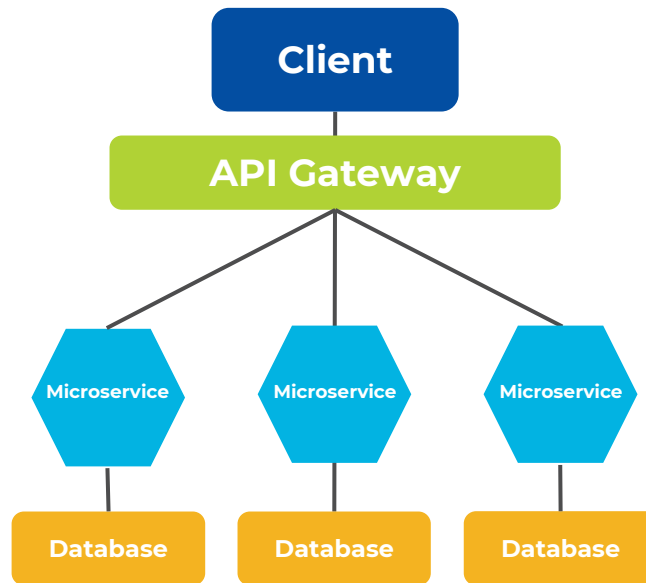

Microservices & Containers

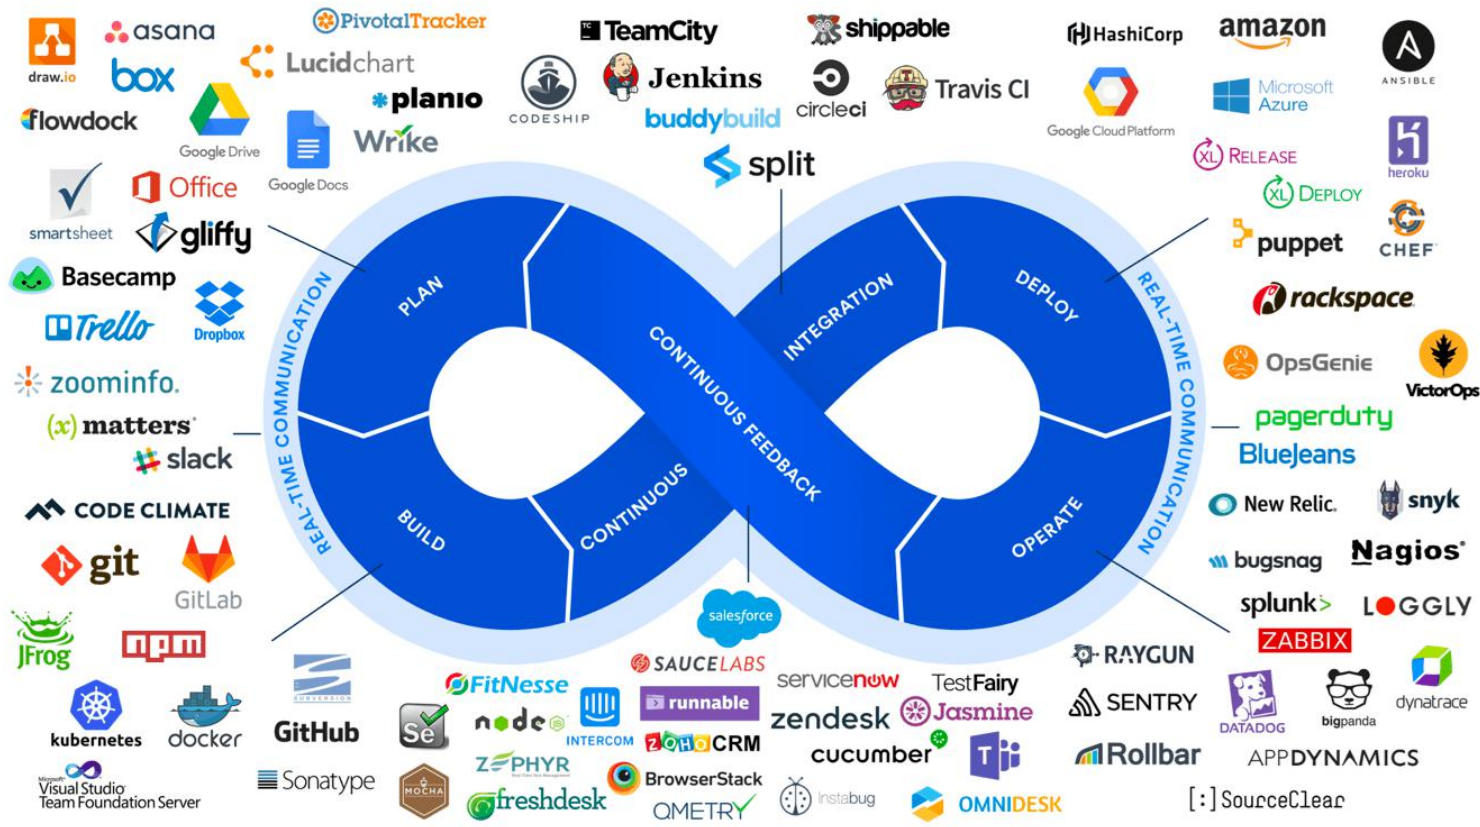

Monolithic Architecture

Microservice Architecture

DevOps

Elastic Cloud Infrastructure

The diagram features two stylized clouds, one light blue on the left and one light green on the right. In the center, a stack of four white rectangular boxes with blue borders is positioned over a dark blue horizontal bar. The boxes contain text describing key features of the Elastic Cloud Infrastructure. The dark blue bar at the bottom is labeled 'Cloud Platform'.

License portability, no cloud lock in

Native integration into all cloud accounts

Seamless **movement and elasticity** between clouds

Single platform using **consistent** constructs and skillsets

Cloud Platform

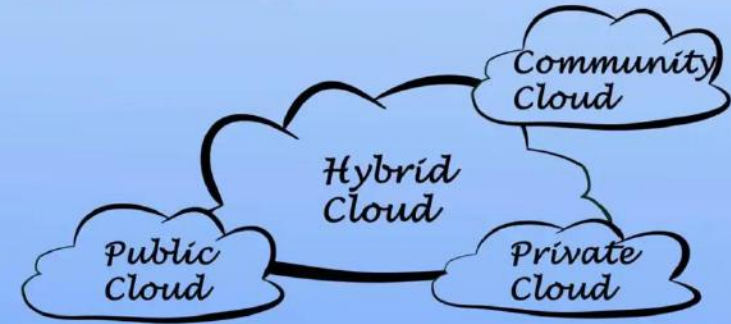

Where Are We Today?

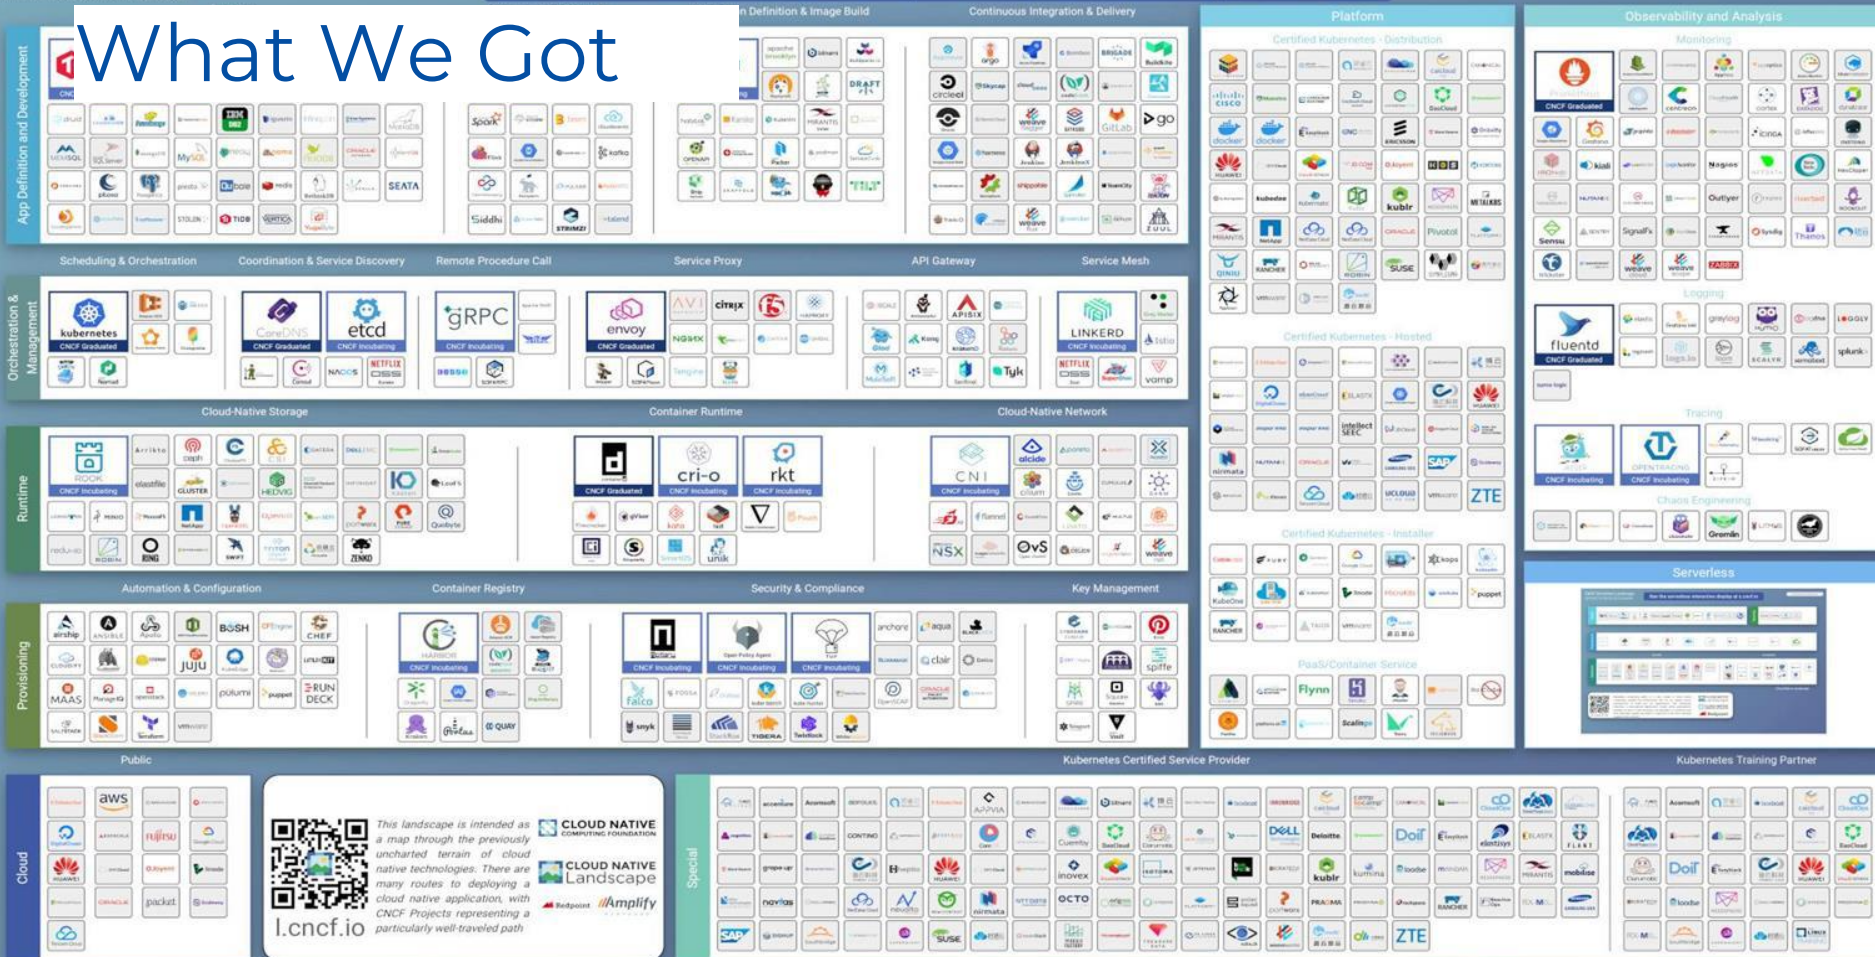

What We Wanted

- Choice
- Flexibility
- Ease of Use
- Security

What We Got

 This landscape is intended as a map through the previously uncharted terrain of cloud native technologies. There are many routes to deploying a cloud native application, with CNCF Projects representing a particularly well-traveled path.

Applications are Redefining Infrastructure Needs

750M New Apps by 2026¹

More than the past 40 years
of Computing

Applications Development is Accelerating

- 50% of IT spend on digital transformation²
- Enterprises will become software factories²
- 70% will integrate private and public clouds²

Legacy 3 tier infrastructure is poorly suited for these requirements

1. Source: IDC FutureScape: Worldwide IT Industry 2022 Predictions, October 2021

2. Source: IDC FutureScape: Worldwide IT Industry 2020 Predictions, October 2019

Developer Team Influence is Growing

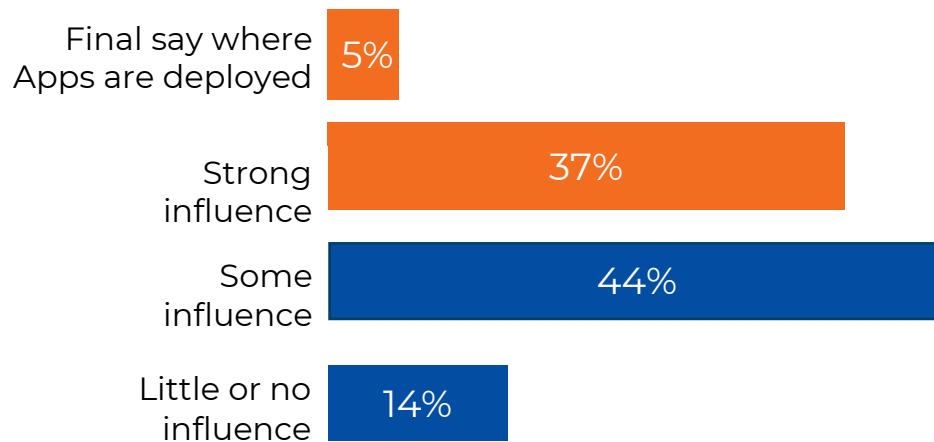

ONLY 50%

of organizations have integrated the app dev function into the IT department

Application Developers' Role in Application Deployment Environments

% of respondents with application developers (n=724)

Modern infrastructure must serve Dev team requirements

Uncontrolled App Development is Creating Chaos

By 2027, 85% of workload placements will no longer be optimal

Poor workload placement can lead to excessive costs, performance degradation, security risks, compliance issues and business service performance

50% of data will be at the Edge by 2026 per IDC

Container-based Apps will be distributed from edge to core to cloud

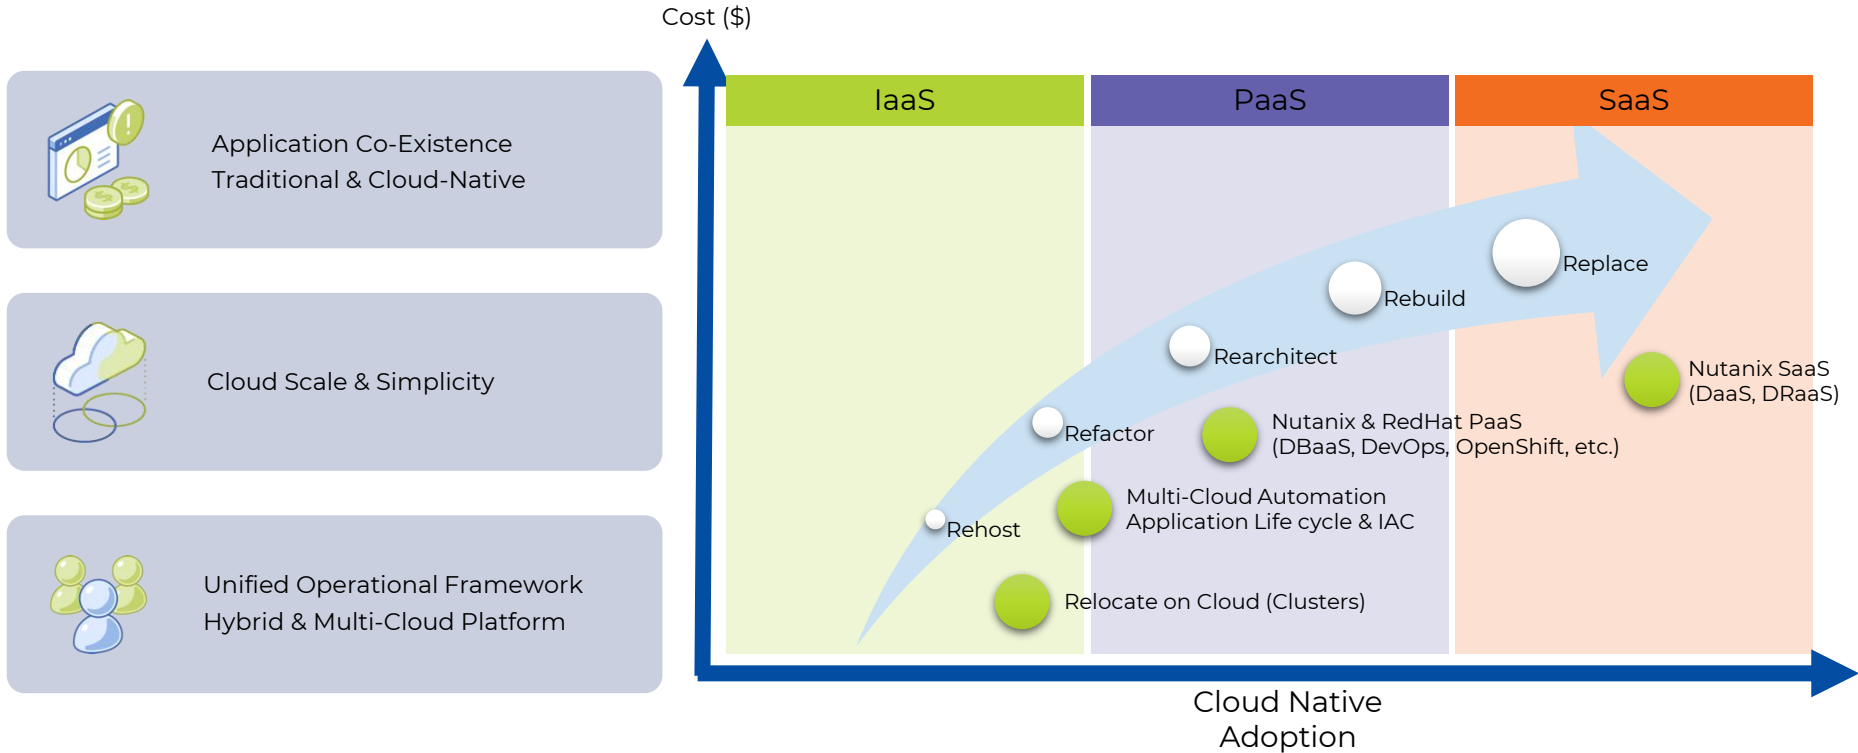

What do
we do now?

Modernization Journey

The Cloud-Native Journey

Gartner identified 5 migration strategies for known as the 5 R's of Cloud Migration, AWS has a similar 6 R Strategies all following taxonomy

Modernization is Difficult

Supporting multiple generations of technology is highly complex

Teams lack the necessary skills

There are concerns about the risks of migrating legacy infrastructure

Separated teams are all too common, making collaboration difficult

It is easier to procure new technology than to address technical debt

Existing policies perpetuate disparate infrastructure rather than a holistic solution

What Does it Take?

People

Culture change is required for digital transformation

Process

Connects the business to the technology

Technology

Provides the means for transformation

Red Hat & Nutanix Alliance

Red Hat: Leader in Container Platforms

Container Market Share (%) - Omdia Research

* [Omdia Container Market Share \(2021\)](#)

THE FORRESTER WAVE™

Multicloud Container Development Platforms

Q3 2020

Undisputed Market Leader

Nutanix, with an estimated revenue of \$188.8 million in the 1Q 2021, garnered 49% market share commanding the lead as the market share leader while HCIS revenue grew by 11.4%. HCIS is expected to touch \$9.5 billion by 2025

The Forrester Wave™: Hyperconverged Infrastructure, Q3 2020, Forrester Research, Inc., 29 July 2020

Complete Hybrid Cloud Platform

Best-in-class, full-stack solution for DevOps and application orchestration across traditional and cloud native workloads.

Traditional Workloads

NUTANIX™ Cloud Platform

Cloud-Native Workloads

Built-in data services

- Full Feature CSI for File (NFS) and Block
- Automatic data management and self healing. architecture
- Run S3 compatible Object Storage
- multi-vendor DBaaS on the same stack to integrate with OpenShift

Simple to deploy, manage, and scale

- Nutanix's web-scale architecture and high level of automation massively reduces operational overhead and deploys in hours
- Infrastructure as Code with IPI, Calm & Ansible
- Customers typically realize a 62% reduction in the cost of operations
- Simplified deployment, management and scaling of OpenShift

DevOps

Enterprise-grade support from both vendors

- Nutanix's 90+ NPS (7 year average) NPS score one of the best in the industry
- Both companies part of TSA net
- Joint support progra

Modernizing your existing Infrastructure and supporting your future investment!

Why Nutanix for Red Hat

Best-in-class, full-stack solution for, VMs, DevOps and container management

SIMPLE TO DEPLOY, MANAGE, AND SCALE

- Quickest time to value
- Shorter sales cycle
- Predictable scaling
- Lowest TCO of any datacenter platform

CHOICE

- Credible, enterprise class alternative to VMware
- Choice of HW, Hypervisor, consumption model
- Portability to software license to run where the customer wants

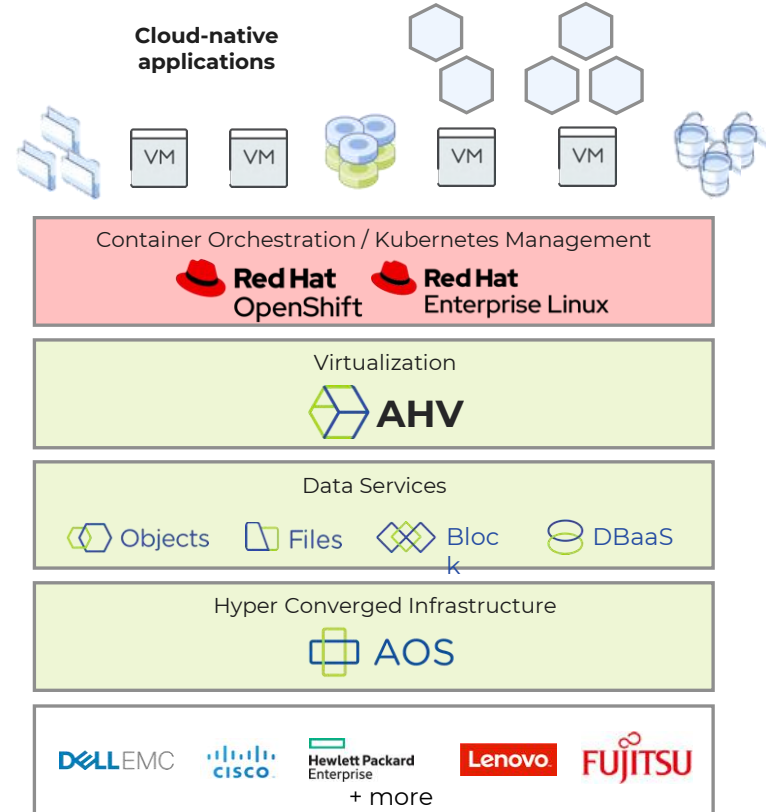

CLOUD EXPERIENCE

- Bring a cloud like experience and consumption model to the datacenter
- API driven File, Object and DBaaS on a single stack
- Highly automated platform delivers new services in minutes and minimizes operational overhead.

JOINT SUPPORT STRATEGY

- Nutanix's 90+ NPS (7 year average) NPS score one. Of the best in the industry
- Both companies are part of TSA net
- Joint support program
- Ongoing joint engineering effort

The background features a large, stylized 'X' shape composed of four rounded rectangular segments. The top-left and bottom-right segments are a light blue color, while the top-right and bottom-left segments are a light green color. The overall background is a gradient from blue on the left to green on the right.

NUTANIX™
