

Nutanix Calm: Rally with Automation

BENEFITS

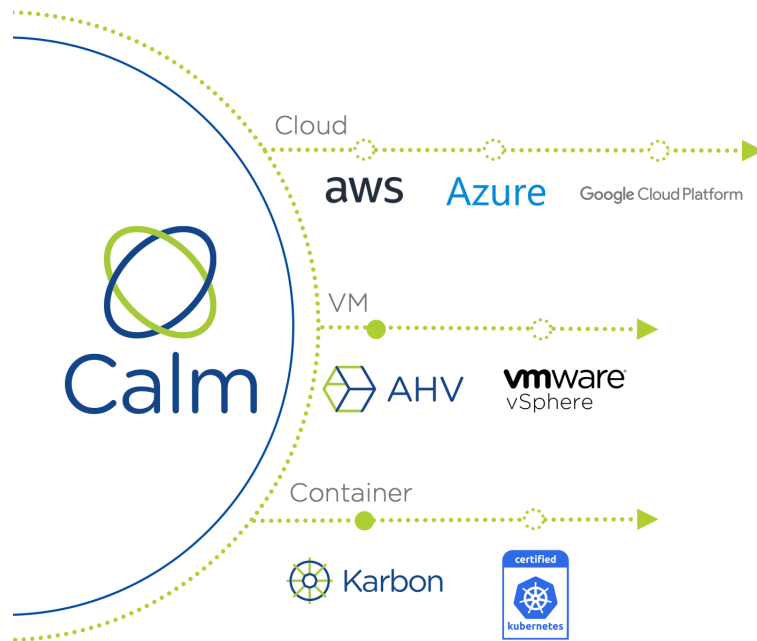

Accelerate your adoption of the Nutanix platform by leveraging experienced consultants

Reclaim time wasted on repetitive tasks with one-click infrastructure automation

Jump-start your application life-cycle management with Nutanix Calm and automation expertise

Identify requirements and considerations to successfully manage applications across hybrid cloud environments

Today's businesses require IT to be agile like never before. As competitive pressures rise, the ability to innovate rapidly becomes critical. IT departments must support faster development cycles and need rapid build-out and tear-down of virtualized infrastructure for accelerated time-to-value. Infrastructure automation is a critical practice, allowing IT organizations to achieve the agility, efficiency, and scale required to satisfy end-user and business demands.

The Nutanix Calm Relay Service bundles combines the Multi-Cloud Application Centric automation power of Calm with the Nutanix Services expertise to quickly realize the full value of your Nutanix investment. The solution leverages the full capabilities of the Nutanix Enterprise Cloud OS to deliver a highly automated infrastructure that maximizes IT agility and reduces operational expenses.

Our engagement with Nutanix consulting is like everything else, relationship based. Relationships work best when the communication is open and honest; from sale of the services through on-going interactions today, Nutanix consulting has delivered in a way that makes me feel

- Automate infrastructure and application workflows to deliver IT resources faster
- Turn any repetitive task into a reusable blueprint that can do anything - from deploying a VDI desktop to configuring an entire ROBO site - in one-click
- Enable end-user self-service through an on-demand service catalog
- Build a reliable and secure multi-cloud environment
