

# VDI Deployment for Healthcare Service

## Pre-Requisites

Existing and functional Nutanix Platform running latest versions of AOS and Hypervisor (AHV, ESXi, or Hyper-V)  
System maintenance windows  
Customer has in hand relevant non-Nutanix licenses like from Citrix, VMware, EPIC.

## OVERVIEW

Nutanix Services helps accelerate healthcare customers achieve their business outcome by providing customers with a production deployment of Epic Hyperspace on Citrix or VMware EUC solutions on the Nutanix Enterprise Cloud Platform.

## THE NUTANIX ADVANTAGE

- Best practice onsite deployment of an end to end EUC solution using Citrix XenDesktop or Horizon View
- Best practice implementation of Epic Hyperspace
- Linearly scale to accommodate desktop performance and data growth
- Delivered by experienced Nutanix consultants to mitigate risk and accelerate time-to-value
- Tailored solution to the needs of the industry, leveraging experience from past healthcare deployments to cater to the unique requirements of clinicians and hospital administrators
- Complete knowledge transfer and site documentation

## STANDARD SCOPE

- Detailed requirements gathering
- Project planning
- Customize Nutanix infrastructure for EUC deployment
- Design and deploy Citrix MCS or PVS XenDesktop or VMware View for up to 2000 users at a single site
- Provision pools of non-persistent knowledge user and persistent admin desktops
- Deploy Epic Hyperspace as per Nutanix and Epic best practices
- Project related architecture, design documentation and knowledge transfer

## DELIVERABLES

- Project planning
- Detailed requirements gathering and design review workshop
  - > Review environment and validate all pre-requisites are in place
  - > Solution design and review
  - > Network/security design and review: Remote access requirements and design
- Deploy the selected VDI solution and Epic Hyperspace
- Test & Validation of the deployment including user login verification
- Knowledge transfer
- Architecture, configuration diagrams and as-built documentation

## TASK

Project Kickoff	All
Requirements gathering / design review	All
VDI deployment	Nutanix
Epic Hyperspace deployment	Nutanix
Solution tuning/validation	Nutanix
Project signoff	All

## OPTIONAL ADD-ON SCOPE

- Design network and security architecture
- End to end vendor management (Profile Solution, Application Delivery, SSO and Identify Management)
- Design Profile Management Solution
- Multi-site deployment (HQ+ROBO, Active/Active)
- More than 2000 users
- Migration of users and data to VDI
- Design data protection services
- Application virtualization (XenApp, AppVolumes)
- Multifactor authentication for VDI

Nutanix makes infrastructure invisible, elevating IT to focus on the applications and services that power their business. The Nutanix enterprise cloud platform leverages web-scale engineering and consumer-grade design to natively converge compute, virtualization and storage into a resilient, software-defined solution with rich machine intelligence. The result is predictable performance, cloud-like infrastructure consumption, robust security, and seamless application mobility for a broad range of enterprise applications.
