

WEEE Collection and Recycling Arrangements in Finland

Nutanix equipment is sold in Finland by distributors. The distributor imports the equipment into Finland. Thus, the distributor has the legal responsibility to:

- Register as the WEEE producer in Finland
- provide arrangements for collection and recycling of WEEE arising from Nutanix equipment that the distributor sells in Finland

Under the Finnish Waste Act which implements regulations for Waste Electrical and Electronic Equipment (WEEE) which came into force on August 13th 2005, for equipment that you buy from a Nutanix distributor after August 13th 2005, the distributor is required to provide arrangements for the collection, treatment, recycling and recovery of the waste electrical and electronic equipment (WEEE) that your new purchase replaces, on a one-for-one, like-for-like basis. The old equipment that your new purchase from a Nutanix distributor replaces is referred to as Historic WEEE.

Under the Waste Act, the distributor is also required to provide arrangements for the collection, treatment, recycling and recovery of any new electrical and electronic equipment that you buy from Nutanix after August 13th 2005, when that new equipment eventually becomes waste. This is referred to as New WEEE.

Nutanix has decided to provide WEEE collection and recycling on behalf of its distributors in Finland.

Nutanix covers the following costs for WEEE compliance management in Finland:

- The costs of treatment, recycling and recovery of the WEEE to meet the targets set by Finland WEEE Regulations;
- The costs of data management and reporting to the Centre for Economic Development, Traffic and the Environment for Pirkanmaa to demonstrate compliance with all administrative requirements of the Finland WEEE Regulations;
- The costs of transportation of your WEEE to Nutanix's appointed recycler in Finland.

Nutanix has established a recycling contract with the European Advanced Recycling Network (EARN) and will cover any costs of treatment, recycling and recovery of the equipment on arrival at the EARN recycling facility in Finland.

To arrange collection of your WEEE please contact the EARN partner in Finland directly:
