

WEEE Collection and Recycling Arrangements in the Spain

Under the Spanish Royal Decree 110/2015 on Electrical and Electronic Equipment and Management of its Waste, for electrical and electronic equipment that you buy from Nutanix after August 13th 2005, Nutanix is required to finance the collection, treatment, recycling and recovery once this equipment becomes waste (WEEE).

Nutanix is a member of a compliance scheme in Spain run by 'Recyclia', which will handle the legal obligations for collecting and recycling WEEE via the *European Advanced Recycling Network* (EARN).

If you have waste electrical or electronic Nutanix equipment that you wish to dispose of, EARN can arrange free take-back of your WEEE within Spain.

For further information or to arrange a WEEE collection, please contact EARN directly by email:

office@earn-service.com

Please include your name, address and contact data such as telephone number and email, and details on the waste equipment (type of product, brand and total weight). Without this data, EARN won't be able to process your request.
