

Chung-Ang University Hospital walk-through their decision to switch to Nutanix

Staff “danced” when they simplified over 50 types of legacy servers and achieved operation automations. Hospital is on their roadmap to develop Nutanix HCI into a hybrid cloud.

“With Nutanix HCI, we were able to simplify 50 types of (legacy) servers... This made our staff so happy that they actually danced.”

– Lee Ji-Tae, Parts Manager of the Computer and IT Team, Chung-Ang University Healthcare System

“It sounded like a dream when we heard that the desired system could be built by just one-click, or at 6 hours maximum through pre-discussed VMs and functions. That dream has become a reality.”

– Lee Ji-Tae, Parts Manager of the Computer and IT Team, Chung-Ang University Healthcare System

INDUSTRY

Healthcare

BENEFITS

- Over 50 types of legacy servers simplified onto Nutanix HCI, and can be managed by just one or two persons
- Established full disaster recovery easily and achieved IT operations automation
- Central console view of the whole environment allows efficient resource allocation and just-in-time forecasting
- Network traffic among VMS can be visualised and provides peace of mind for network security

SOLUTIONS

- Private Cloud
- Databases
- Business continuity & disaster recovery

PRODUCTS

- AOS Storage
- Prism
- AHV Hypervisor
- Flow Network Security
