

Far Eastern Apparel Gains Agility with Nutanix

Quick time to market in hours removes bottlenecks in supporting high-growth business

BUSINESS BENEFITS

Far Eastern Apparel (FEA) Vietnam specializes in the sourcing and manufacturing of garments for many well-known brands worldwide. Today, the company is able to respond quickly to sudden influx of high volume orders by setting up new technology capacity in just 2 hours – a far cry from the previous 3-4 days waiting time when using legacy infrastructures.

Nutanix has simplified management for their lean IT team of just 4 people. They no longer have to hunt for troubleshoot errors as PRISM provides clarity with visible health signals across all systems in one single pane of glass. This means that the infrastructure team can achieve more in less time and focus on business-critical tasks. As an added bonus, Nutanix's built-in AHV hypervisor has also saved at least \$20,000 USD every year in VMware licensing costs for FEA.

“Nutanix Enterprise Cloud and AHV empower us to scale almost instantly to support our fast-growing business. We scored in speed and gained even more in cost savings and efficiency within our IT team. Going forward, we intend to partner with Nutanix to expand our cluster and deploy a disaster recovery site.”

– Max Minh, Senior Chief of IT, Far Eastern Apparel Vietnam
