

Jining No 1 People's Hospital IT delivers world-class care to patients

China hospital partners with Nutanix and Lenovo to comply with national standards for storage and exchange of medical data

Jining No. 1 People's Hospital is a public hospital in Shandong Province, China with 4,200 beds, providing care for more than 3.3 million emergency and outpatients each year. To comply with national standards for the storage and exchange of medical data, the hospital replaced its existing virtualized environment with Nutanix's hyperconverged infrastructure based on Lenovo ThinkAgile HX5520 appliances and other products to support its hospital information system (HIS), picture archiving and communications system (PACS), and other key business applications. Impressed with the stability and reliability of the Nutanix-Lenovo solutions, the hospital also onboarded its latest SPD (Supply, Processing, Distribution) medical equipment management system on the platform.

“Thanks to the Nutanix-Lenovo ThinkAgile HX solutions, Jining No.1 People's Hospital was one of the first hospitals in Shandong Province to complete the construction of an SPD [Supply, Processing, Distribution] medical equipment management system. Now we can ensure compliance, and provide patients with an exceptional standard of clinical care.”

– Wang Xinli, Director of Information Centre, Jining No. 1 People's Hospital

INDUSTRY

Healthcare

BENEFITS

- Achieved regulatory compliance for electronic medical data
- High performance and stability
- Helped enable world-class care to patients

SOLUTION

Nutanix Cloud Platform

- Acropolis Software
- Lenovo ThinkAgile HX5520
- VMware vSphere
- Lenovo On-site services

Applications

- SPD (Supply, processing, distribution) for medical equipment management system
- Hospital information system (HIS)
- Picture archiving and communications system (PACS)
- Key business applications
