

# End-User Computing Your Inspiring Stories

All Together Now.

# Inspiring Stories

Today's modern workspace is 'anywhere'. Your users need to be able to securely access apps and data from any device, in any location and at any time. But unreliable, legacy integration and delivery makes this nearly impossible to do effectively.

At Nutanix, we keep things simple with end-user computing options that ensure immersive, reliable, secure experiences for your workers.

In this **Inspire Guide**, you'll learn how to move your organisation to a world where you break free from the slow integration of delivery of legacy business critical applications. A place where together, we'll transform your VDI services and bring delight to every end-user experiences, all whilst ensuring your capital expenditure is under control.

Have a read of our 6 short stories and if they grab your attention then jump into our Video and Deeper Dive case stories.

Enable your 'anywhere' workforce today.

# Improved IT support times and increased performance

By running their VDI environment on Nutanix, Scania have dramatically reduced support tickets from 80 to 15, reduced boot times from 1 minute 30 to 18 seconds, use less bandwidth and have reduced the costs of their infrastructure.

Scania uses Nutanix to proactively manage IT to improve customer service.

**“We look for systems that work for us and not against us. There are systems out there that people spend a lot of time trying to fix. The less interaction, the fewer people we need to manage it, the more self-sufficient the system, the better for us. Nutanix ticked all these boxes for us.”**

**Theven Naicker**  
Area IT Manager

**Cut support tickets by 80%**

# Easier capacity planning and 100% uptime

Aging traditional infrastructure constantly failed causing massive impact to the business. Nutanix now provides Nedbank with stability, zero downtime and ease of scale for their 12,000 user VDI environment.

IT salvation in a complex IT environment.

**“Nutanix is our salvation in a very complex environment. and I look forward to having my weekends back to spend with my family.”**

# Increased scalability for end-user computing workloads

Nutanix Enterprise Cloud enables newly merged asset management giant to massively scale end user computing workload without compromising public cloud aspirations.

End user computing demands at Standard Life Aberdeen are now serviced at pace with minimal cost through the linear scalability of the Nutanix Enterprise Cloud. This has resulted in enhanced performance and reduced OPEX by eliminating Citrix Provisioning Servers.

**“The general direction of travel at Standard Life Aberdeen is towards the public cloud, but following the merger we were faced with a massive increase in virtual end user workloads, which Nutanix enabled us to cope with - rapidly, cost effectively and without having to compromise those plans.”**

# Login-times halved, improving end-user experience

Existing traditional infrastructure was difficult to manage and scale resulting in inadequate performance for their virtual desktops. Nutanix has improved the VDI end user experience and cut login times in half.

Banca Popolare di Sondrio (SUISSE) SA  
Invests in Nutanix.

Swiss Bank Chooses Nutanix Enterprise  
Cloud to improve performance of  
VDI Workloads.

**“Nutanix are providing the high performance and easy manageability we need to keep pace with our rapid growth. We are very happy that we chose Nutanix infrastructure—it is enabling us to continue to provide excellent service to our many banking clients across Europe.”**

# The path to virtualization with Frame and Azure

Putting on an event the size of Autodesk University is not for the faint of heart. Their annual user conference draws 10,000+ attendees for three days of talks, demos, and classes that together require a huge amount of computing power. Xi Frame have saved their IT team 600 hours in deployment time by launching virtual apps from the cloud.

**“Xi Frame has allowed us to quickly get feedback on pre-release software from customers around the world and make important improvements before the final release.”**

# Higher availability and better user experience

jetBlue needed a solution that was highly available, simpler to manage, and enable faster rollout of applications. Nutanix has enabled them to successfully deploy Citrix-based VDI and hosted shared applications, resulting in higher availability and a better user experience.

Once everyone saw the value of the virtual desktops on Nutanix, they all wanted to use it. It's nice to be on the receiving end of so many kudos.

jetBlue brings humanity back to air travel with Nutanix.

**“Many of our critical systems and applications are now running on Citrix and Nutanix. That’s the faith we have in the Nutanix Enterprise Cloud platform.”**

**Dan Feliz**  
General Manager of IT Infrastructure
