

5

REASONS

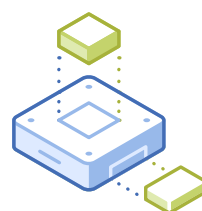

to Optimize Oracle Database Deployments with Nutanix

Oracle databases manage the most important asset of many organizations—the data. Yet ensuring the optimal infrastructure deployment for Oracle databases is difficult. Fortunately, **Nutanix can help.**

HERE ARE FIVE GREAT REASONS TO DEPLOY YOUR ORACLE DATABASES ON THE NUTANIX CLOUD PLATFORM.

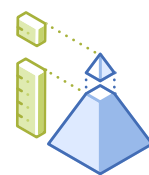

1. UPDATE AND MODERNIZE LEGACY PLATFORMS

Deploy Nutanix solutions on-prem or in a **hybrid cloud environment**, and realize rapid database operations, strong data resiliency, and intelligent automation to **maximize efficiency**.

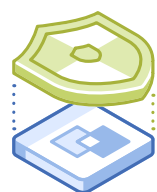

2. CONSOLIDATE FOR SEAMLESS SCALABILITY AND PERFORMANCE

Consolidate your **Oracle database** and **RAC deployments** on Nutanix Cloud Platform, an agile platform that scales linearly, providing predictable costs while increasing database performance of up to **8X**.

3. ENSURE DATABASE AVAILABILITY

Maintain your **critical workloads** with a web-scale architecture that **self-heals** and **recovers proactively**, helping to minimize unplanned downtime by up to **85%**.

4. SIMPLIFY DATABASE OPERATION MANAGEMENT WITH NUTANIX ERA

Oracle customers that deploy Nutanix Era **increased the speed** of their database provisioning by **97%** and decreased storage requirements for copies and backups by **60%**.

5. REDUCE TCO & SAVE

By improving efficiency, **reducing storage costs**, preventing unplanned downtime, **cutting DBA overtime**, and allowing you to provision only what you need, Nutanix customers have **lowered the TCO** of their Oracle databases by as much as **62%**.

For more information, visit www.nutanix.com/databases and take **Era for a test drive**.
