Limited Availability Offers

What Is a Limited Availability Offer?

A service offer that is only available to certain customer verticals or under special circumstances is considered a limited availability offer. The offer is treated as a Limited Availability offers, with additional required steps for quoting purposes. It is not available through the website or in the main Services Description handbook.

Limited Availability Offer	Date Moved to Limited Availability
FastTrack for NCM Cost Governance	April 2026

FastTrack for NCM Cost Governance

Product Code: CNS-CAS-FST-NCM-CTG

At-a-Glance

Stage: Deploy

The FastTrack for Nutanix Cloud Management (NCM) Cost Governance accelerates the onboarding of deep visibility and rich analytics detailing cloud consumption patterns along with one-click cost optimization across cloud environments with expertise from highly skilled consultants. IT teams can choose to onboard on-premises Nutanix Cloud Infrastructure (NCI) clusters or a public cloud platform. This offer is ideal for the Deploy stage of a hybrid multicloud journey.

Service Scope

Highly skilled consultants with solid domain expertise and rich experience begin with an enablement session. After the enablement session, the consultant onboards an on-premises NCI cluster or public cloud platform to NCM Cost Governance. Enablement sessions require collaboration from key stakeholders and teams responsible for gaining visibility into cloud spend.

The service includes the following activities:

- Conduct an enablement session introducing NCM Cost Governance
- Onboard on-premises NCI clusters or public cloud provider to NCM Cost Governance

Project Management

Nutanix Project Management (PM) oversees Nutanix resources and aligns execution with your goals, scope, and timelines.

Core project management activities may include the following:

- Serve as a single point of contact for all project communication
- End-to-end Nutanix resource management
- Coordinate change window(s) and implementation schedules with customer
- Track and facilitate readiness and prerequisite completion
- Conduct project kickoff/technical readiness meeting(s)
- Integrate customer resources into the high-level project timeline
- Send status update(s)
- Manage timeline(s)
- Deliver created artifacts to the customer
- Facilitate project closeout activities

Limitations

- For each quantity purchased, onboarding is limited to one on-premises Nutanix environment and/or a single public cloud provider

- Excludes cost configuration and custom reports

Supported Hypervisors

- Nutanix AHV
- VMware ESXi

Supported Public Cloud Platforms

- Amazon AWS
- Microsoft Azure
- Google Cloud Platform

Project Management

- Excludes scheduling customer resources and activities
- Excludes detailed project plan (schedule) development and management
- Excludes responsibility for creating, managing, or delivering change management communications

Prerequisites

NCI Clusters

- Fully supported and functional on-premises NCI cluster(s) that meets all product requirements for Nutanix Cloud Infrastructure (NCI)

Note: For information on the requirements for NCI Clusters, see Field Installation Overview in the *Field Installation Guide* on the Nutanix Support Portal.

- Pulse must be enabled for on-premises NCI clusters

Note: For information on the requirements for enabling Pulse on NCI clusters, see Configuring Pulse in the *Prism Element Web Console Guide* on the Nutanix Support Portal.

Required Product Licenses

On-Premises NCI Clusters

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Cloud Manager (NCM) Pro or Ultimate
- Hypervisor licenses for NCI

NCM Software-as-a-Service for Supported Public Cloud Platforms

- Nutanix Cloud Manager (NCM) SaaS – Cost Governance

Delivered Artifacts

Delivered Artifact	Description
Test Plan	Documents the Nutanix standard tests executed on the deployed solution and records the results of those tests to confirm the environment is ready for production use.
As-built Guide	Captures the final, deployed configuration of the solution, detailing how the environment was actually built and configured in comparison to the customer-provided design.

Level of Effort

Typically up to 1 day

Delivery Type

Delivery Type	Delivery Activities
Virtual	<ul style="list-style-type: none"> Virtual delivery Virtual project management <p>Note: Any in-person project management activities provided solely at Nutanix's discretion</p>

Inactive Professional Services Offers

What Is an Inactive Offer?

A service offer that transitions to Inactive can no longer be quoted. Mentions of the offer are no longer available on the website or in the Services Description handbook.

This book includes offers inactivated in calendar year 2026 and forward: it does not include offers inactivated prior to calendar year 2026.

Inactive Offer	Date Moved to Inactive
NCI Flow Network Security Microsegmentation Design	May 2026

NC2 Design Workshop – Legacy Edition	May 2026

NCI Flow Network Security Microsegmentation Design Workshop

Product Code: CNS-INF-A-WRK-MCR-STD

At-a-Glance

Stage: Design

The Nutanix Cloud Infrastructure (NCI) Flow Network Security Microsegmentation Design Workshop offers IT teams in-depth and practical guidance to create a comprehensive design for Flow Network Security which creates software-based firewalls that inspect traffic within the datacenter to protect and isolate workloads, users, and data. IT teams have a choice of scenarios to design for their on-premises NCI cluster or Nutanix Cloud Clusters (NC2). This offer is ideal for the Design stage of a hybrid multicloud journey.

Related Services

- NCI Flow network Security Microsegmentation Deployment

Service Scope

Delivered by highly skilled consultants with strong domain expertise and rich experience to ensure that the microsegmentation requirements and required outcomes are identified. Design workshops require collaboration with key customer stakeholders from networking, virtualization, and application teams.

After the design workshop, the consultant develops an NCI Flow Network Security Design Document and configuration workbook that addresses requirements, constraints, and assumptions. The workbook also provides a detailed implementation plan and the list of required security policies and categories to be created and attached. The design of the security policies and categories will match one of the following use cases:

- End User Computing – Citrix Virtual Apps and Desktops
- 3-tier applications – presentation, application, data tiers
- Single-server applications – applications run on a single-server
- Server, service, virtual machine (VM), or environment isolation
- Service insertion and chaining

The service includes the following activities:

- Review AHV networking terminology
- Review features and functions of Flow Network Security, including microsegmentation, network service insertion, and network automation
- Discuss the design goals and gather communication requirements, including risks, constraints, and assumptions
- Assess the current state of systems to be segmented
- Assess network configuration impacts and requirements
- Develop security policies and categories for the selected use case

- Develop an implementation plan, process, and deployment waves
- Develop a post-implementation validation and test plan

Optional Activities

- License and enable Nutanix Flow Network Security

Project Management

Nutanix Project Management (PM) oversees Nutanix resources and aligns execution with your goals, scope, and timelines.

Core project management activities may include the following:

- Serve as a single point of contact for all project communication
- End-to-end Nutanix resource management
- Coordinate change window(s) and implementation schedules with customer
- Track and facilitate readiness and prerequisite completion
- Conduct project kickoff/technical readiness meeting(s)
- Integrate customer resources into the high-level project timeline
- Send status update(s)
- Manage timeline(s)
- Deliver created artifacts to customer
- Facilitate project closeout activities

Limitations

- For each quantity purchased, development of security policies and categories is limited to 10 applications
- Excludes configuration of categories and policies

Supported Hypervisors

- Nutanix AHV

Project Management

- Excludes scheduling customer resources and activities
- Excludes detailed project plan (schedule) development and management
- Excludes responsibility for creating, managing, or delivering change management communications

Prerequisites

- None

Required Product Licenses

- None

NCI Flow Network Security Microsegmentation Deployment

Product Code: CNS-INF-A-SVC-MCR-STD

At-a-Glance

Stage: Deploy

The Nutanix Cloud Infrastructure (NCI) Flow Network Security Microsegmentation Deployment accelerates the deployment of Flow Network Security, which creates software-based firewalls that inspect traffic within the datacenter to protect and isolate workloads, users, and data. IT teams have a choice of scenarios to design for their on-premises NCI cluster or Nutanix Cloud Clusters (NC2). This offer is ideal for the Deploy stage of the hybrid multicloud journey.

Related Services

- Infrastructure Design Workshop
- NCI Flow Network Security Microsegmentation Design Workshop

Service Scope

Highly skilled consultants with solid domain expertise and rich experience begin by reviewing the customer-provided NCI Flow Network Security Design Document and requirements. The consultant then deploys and configures the required security policies and categories. After the deployment, the consultant creates a customized As-built document and updated configuration workbook to document the final microsegmentation configuration.

The service includes the following activities:

- Review and verify deployment requirements, constraints, assumptions, dependencies, and decisions for the configuration as documented in the existing Design Document
- Enable and license Nutanix Flow Network Security on the existing on-premises NCI or NC2 cluster, if needed
- Execute the deployment plan, process, and deployment waves
 - Configure categories and apply them to VMs as defined in the plan
 - Configure policies as defined in the plan
 - Conduct testing and validation of the policies
- Execute the existing post-migration validation plan

Optional Activities

- Enable Flow Network Security Central

Project Management

Nutanix Project Management (PM) oversees Nutanix resources and aligns execution with your goals, scope, and timelines.

Core project management activities may include the following:

- Serve as a single point of contact for all project communication
- End-to-end Nutanix resource management
- Coordinate change window(s) and implementation schedules with customer
- Track and facilitate readiness and prerequisite completion
- Conduct project kickoff/technical readiness meeting(s)
- Integrate customer resources into the high-level project timeline
- Send status update(s)
- Manage timeline(s)
- Deliver created artifacts to customer
- Facilitate project closeout activities

Limitations

- For each quantity purchased, deployment is limited to 10 Flow Network Security policies per pack.

Supported Hypervisors

- Nutanix AHV

Project Management

- Excludes scheduling customer resources and activities
- Excludes detailed project plan (schedule) development and management
- Excludes responsibility for creating, managing, or delivering change management communications

Prerequisites

- Fully supported and functional on-premises NCI cluster or Nutanix Cloud Clusters (NC2) cluster that meets all product requirements for Flow Network Security
- Fully supported and functional on-premises Prism Central instance

Note: For information on the requirements for configuring the Prism Central instance, see Prism Central Installation or Upgrade in *the Prism Central Infrastructure Guide* on the Nutanix Support Portal.

- Prism Central and Prism Element time synced
- Active Directory domain and user group requirements as required for the VDI policy

Note: For information on the requirements for configuring NCI Flow Network Security, see the *Flow Microsegmentation Guide* on the Nutanix Support Portal.

- Production and Test virtual networks already configured
- Customer-provided Design Document
- Completed Pre-Deployment Questionnaire

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI) Pro or Ultimate Edition

Delivered Artifacts

- Test Plan
- As-built Guide

Level of Effort

Typically up to 2 days

FastTrack for NCI Flow Network Security Microsegmentation

Product Code: CNS-INF-FST-FLOW

At-a-Glance

Stage: Deploy

FastTrack for Nutanix Cloud Infrastructure (NCI) Flow Network Security Microsegmentation accelerates the enablement and deployment of Flow Network Security in greenfield environments, which creates software-based firewalls that inspect traffic within the datacenter for critical applications and data. IT Network teams have a choice of available scenarios to deploy for their on-premises NCI cluster or Nutanix Cloud Clusters (NC2). This offer is ideal for the Deploy stage of a hybrid multicloud journey.

Service Scope

Highly skilled consultants with solid domain expertise and rich experience begin with an enablement session to identify requirements. After the enablement session, the consultant configures NCI Flow Network Security for one of the available scenarios. Enablement sessions require collaboration with key customer stakeholders from networking, virtualization, and application teams.

The service includes the following activities:

- Conduct NCI Flow Network Security enablement session
 - Review AHV networking terminology
 - Discuss Flow Network Security policies
 - Explain the Flow Network Security policy evaluation order
- Explain categories usage in Flow Network Security policies
- Configure and customize one of the following scenarios
 - Configure a single Application Security policy (2- or 3-tier)
 - Configure a single Isolation Environment policy
 - Configure a single Quarantine policy
 - Configure a Virtual Desktop Infrastructure (VDI) policy with support for AD groups

Optional Activities

- Enable Flow Security Central

Project Management

Nutanix Project Management (PM) oversees Nutanix resources and aligns execution with your goals, scope, and timelines.

Core project management activities may include the following:

- Serve as a single point of contact for all project communication
- End-to-end Nutanix resource management

- Coordinate change window(s) and implementation schedules with customer
- Track and facilitate readiness and prerequisite completion
- Conduct project kickoff/technical readiness meeting(s)
- Integrate customer resources into the high-level project timeline
- Send status update(s)
- Manage timeline(s)
- Deliver created artifacts to customer
- Facilitate project closeout activities

Limitations

- For each quantity purchased, configuration is limited to a single Prism Central instance
- Limited to greenfield environments
- Application Security policy limited to a total of 5 VMs in all tiers
- Isolation Environment policy limited to 5 VMs within a category
- Quarantine policy limited to 5 VMs
- VDI policy limited to 3 Active Directory groups, with 3 users per group

Supported Hypervisors

- Nutanix AHV

Project Management

- Excludes scheduling customer resources and activities
- Excludes detailed project plan (schedule) development and management
- Excludes responsibility for creating, managing, or delivering change management communications

Prerequisites

- Fully supported and functional on-premises NCI cluster or Nutanix Cloud Clusters (NC2) cluster that meets all product requirements for Flow Network Security
- Fully supported and functional on-premises Prism Central instance

Note: For information on the requirements for configuring the Prism Central instance, see Prism Central Installation or Upgrade in *the Prism Central Infrastructure Guide* on the Nutanix Support Portal.

- Prism Central and Prism Element time should be in sync
- Active Directory domain and user group requirements as required for the VDI policy

Note: For information on the requirements for configuring NCI Flow Network Security, see *Flow Microsegmentation Guide* on the Nutanix Support Portal.

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI) Pro or Ultimate Edition

FastTrack for NCI Flow Virtual Networking VPC

Product Code: CNS-NET-FST-FVN

At-a-Glance

Stage: Deploy

FastTrack for Nutanix Cloud Infrastructure (NCI) Flow Virtual Networking (VPC) accelerates the deployment of software-defined network virtualization solutions in greenfield environments, which provide overlay capabilities for Nutanix AHV clusters, with in-depth networking expertise from highly skilled consultants. IT Network teams have a choice of available scenarios to enable Flow Virtual Networking for on-premises sites. This offer is ideal for the Deploy stage of a hybrid multicloud journey.

Service Scope

Highly skilled consultants with solid domain expertise and rich experience begin with an enablement and discovery session. After the enablement and discovery session, the consultant configures NCI Flow Virtual Networking for one of the available scenarios. Enablement sessions require collaboration with key customer stakeholders from networking, virtualization, and application teams.

Essential Edition

For customers who want to enable NCI Flow Virtual Networking for a single Prism Central instance.

The Essential Edition includes the following activities:

- Conduct NCI Flow Virtual Networking enablement and discovery session
 - Provide NCI Flow Virtual Networking architecture overview
 - Analyze and determine physical network readiness
 - Describe VPC implementation
 - Plan VPC subnets
 - Plan connectivity to external subnets
 - Gather and document NAT gateway implementation requirements
 - Identify static route requirements
 - Discover management plane and operational dependencies
- Configure Flow Virtual Networking on Prism Central
 - Integrate Flow Virtual Networking into an existing DNS service
 - Create an external network (NAT)
 - Create VPCs
 - Create subnets
 - Configure and assign floating IPs

- Create policy-based routing policies for the following use cases
 - Traffic flow between subnets
 - Traffic flow in/out of a VPC
- Create and execute a Flow Virtual Networking Test Plan to validate the solution

Advanced Edition

For customers who want to enable NCI Flow Virtual Networking for 2 Prism Central instances with VPN connectivity.

The Advanced Edition includes the following activities:

- Everything included in the Essential Edition
- Enable Flow Virtual Networking on both Prism Central instances
- Configure a VPN endpoint between Prism Central instances

Project Management

Nutanix Project Management (PM) oversees Nutanix resources and aligns execution with your goals, scope, and timelines.

Core project management activities may include the following:

- Serve as a single point of contact for all project communication
- End-to-end Nutanix resource management
- Coordinate change window(s) and implementation schedules with customer
- Track and facilitate readiness and prerequisite completion
- Conduct project kickoff/technical readiness meeting(s)
- Integrate customer resources into the high-level project timeline
- Send status update(s)
- Manage timeline(s)
- Deliver created artifacts to customer
- Facilitate project closeout activities

Limitations

Essential Edition

- For each quantity purchased, the configuration is limited to a single Prism Central instance with
 - A single external network (NAT)
 - 5 VPCs, 10 subnets per VPC, and 5 floating IPs per VPC
 - 5 floating IPs per VPC and up to 10 VMs
 - 5 policy-based routing policies
- Limited to greenfield environments

Advanced Edition

- For each quantity purchased, the configuration is limited to two Prism Central instances
- VPN endpoint configuration is limited to the Nutanix VPN gateway

Supported Hypervisors

- Nutanix AHV

Project Management

- Excludes scheduling customer resources and activities
- Excludes detailed project plan (schedule) development and management
- Excludes responsibility for creating, managing, or delivering change management communications

Prerequisites

- Fully supported and functional on-premises NCI cluster(s) or Nutanix Cloud Cluster (NC2) cluster(s) that meets all product requirements for Flow Virtual Networking

Note: For information on the requirements for configuring NCI Flow Virtual Networking, see *Prerequisites for Flow Virtual Networking* on the Nutanix Support Portal.

- At least one external VLAN accessible from Prism Central
- Access to customer networking team to implement static routes

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI) Pro or Ultimate Edition

Delivered Artifacts

- Test Plan
- As-built Guide

Level of Effort

NC2 Design Workshop – Legacy Edition

Product Code: CNS-INF-A-WRK-NC2

At-a-Glance

Stage: Design

The Nutanix Cloud Clusters (NC2) Design Workshop offers IT teams in-depth and practical guidance to create a comprehensive design for integrating NC2 on AWS or Azure with the existing on-premises Nutanix environment. The workshop covers various aspects such as scalability, functionality, integration, and operational needs. This workshop is beneficial during the Design stage of a hybrid multicloud journey.

Related Services

- Infrastructure Design Workshop
- Nutanix Cloud Clusters Deployment (AWS or Azure)

Service Scope

Delivered by highly skilled consultants with strong domain expertise and rich experience, begin by ensuring that the solution requirements and required outcomes are identified. Design workshops require collaboration with key customer stakeholders from architecture, virtualization, and networking teams. After the design workshop, the consultant develops a Nutanix Design document that addresses conceptual, logical, and physical NC2 design elements. It also details requirements, constraints, assumptions, design decisions, identified risks, and mitigations.

The service includes the following activities:

- Conduct a NC2 design workshop:
 - Discuss the design goals and gather business and technical requirements, including risks, constraints, and assumptions
 - Review and validate requirements against existing NCI cluster(s)
 - Public cloud platform connectivity, including mapping of network constructs from on-premises NCI to the public cloud platform
- Create an NC2 design addressing requirements identified during the workshop, including:
 - NC2 architecture and cluster design
 - Security and required cloud access controls
 - Management plane and operational dependencies
 - Provisioning methods and integration
 - Public cloud platform resource access and usage

Limitations

- For each quantity purchased, design is limited to integrating one production environment at one physical site and one supported public cloud platform listed below

Supported Hypervisors

- Nutanix AHV

Supported Public Cloud Platforms

- Amazon Web Services (AWS)
- Microsoft Azure

Prerequisites

- None

Required Product Licenses

- None

Delivered Artifacts

- Configuration Workbook
- High-level Design Presentation

Duration

Typically up to 2 days, delivered remotely.

Note: In-person delivery may incur additional charges.
