

Seamless End-User Computing Multivendor Management with Nutanix and Stratodesk

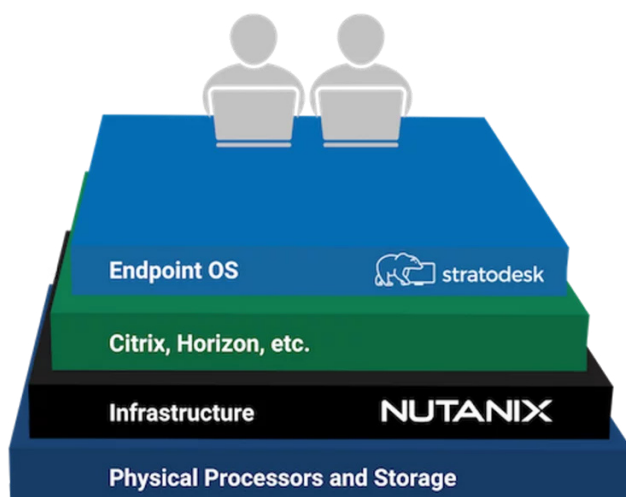

Stratodesk is the leading innovator of NoTouch, an ultra-secure endpoint OS and management platform that lets you control and manage endpoints from anywhere.

With zero-trust principles embedded in its core, the read-only, small footprint, hardware agnostic and cloud-ready Stratodesk NoTouch OS allows organizations to cost effectively scale end-user computing deployments and seamlessly connect to Stratodesk NoTouch Center, the OS management console.

Stratodesk NoTouch Center is easily deployed onto hypervisors, including Nutanix AHV, and can run on-premises, in DaaS deployments or from the cloud, making it the ideal solution for any VDI deployment.

Nutanix simplifies the complexities of IT by delivering hybrid multicloud infrastructure solutions that accelerate data center operations and enable organizations to build, deploy and manage large-scale virtualized infrastructures easily.

Together, both companies offer a hardware and VDI workspace that uses an agnostic, flexible and scalable all-inclusive approach. Our solution offers freedom of choice, ranging from securing endpoints used to access your preferred VDI broker solution to efficient resource utilization by integrating compute, storage and network in the Nutanix Cloud Platform (NCP).

Key Benefits

- **Modernizing and optimizing IT infrastructure:** Nutanix and Stratodesk enable customers to modernize IT infrastructure, enhance business agility and reduce costs.
- **No VDI vendor lock-in:** Nutanix and Stratodesk are VDI vendor neutral. Stratodesk NoTouch OS integrates all major protocols and applications to securely and seamlessly connect to your VDI solution of choice, including Citrix, Parallels, HP Anyware, Dizzion, and Apporto. Our solution gives customers the freedom to choose their preferred VDI and endpoint hardware vendors to ensure a flexible and vendor-agnostic IT environment.
- **On-premises and cloud-ready:** Nutanix enables you to move workloads – including enterprise apps, high-performance databases, VDI, container-based apps, and analytics apps – between on-premises and public clouds without refactoring. Stratodesk NoTouch OS can be installed locally on the device or consumed as a flexible SaaS-based solution.
- **Managed and monitored:** Nutanix offers Prism Central, a built-in monitoring and management solution for the Nutanix stack, while Stratodesk delivers NoTouch Center for endpoint management and monitoring that connects to the virtualized workspace on Nutanix. A NoTouch Center VM can be deployed on Nutanix AHV and managed and updated through Prism.

Why Stratodesk and Nutanix?

Nutanix offers a unified solution that makes it easy to deploy and run applications across hybrid multicloud environments through a single management plane. At the same time, Stratodesk simplifies management and security for end-user digital workspaces and physical desktops.

Regardless of your current infrastructure mix, endpoint hardware or location of employees, Nutanix and Stratodesk make security and management easy for your VDI and cloud environments, all while providing a seamless employee experience.

For end-user computing, Stratodesk NoTouch supports end users anywhere and on any hardware. NoTouch offers friction-free access, support for unified communications and reduced endpoint. Stratodesk NoTouch Center empowers IT teams to manage, control and monitor widely dispersed end-user devices without ever physically touching them.

Stronger Security for Hybrid Multicloud and Endpoint Management

Nutanix and Stratodesk can strengthen your security posture by increasing resiliency and decreasing the attack surface. The read-only Linux-based Stratodesk NoTouch OS has no local storage, rendering most cyber threats ineffective. Stratodesk NoTouch Center enables IT to swiftly reboot NoTouch endpoints to ensure uninterrupted core operations.

Improve ransomware detection and resilience with Nutanix Unified Storage (NUS) and Nutanix Data Lens, which offer strong protection beyond signature-based approaches while providing anomaly detection and microsegmentation. Nutanix also simplifies security management in hybrid multicloud environments by providing streamlined control and administration.

Together, Nutanix and Stratodesk create a formidable security ecosystem. By fortifying physical endpoints and hybrid multicloud infrastructure with robust cybersecurity features, we enable you to identify and respond proactively to potential cyber threats.
