# Strengthen Data Resilience with Nutanix Unified Storage + Veeam

Protect all your data with immutable backups, instant recoveries, and unified management
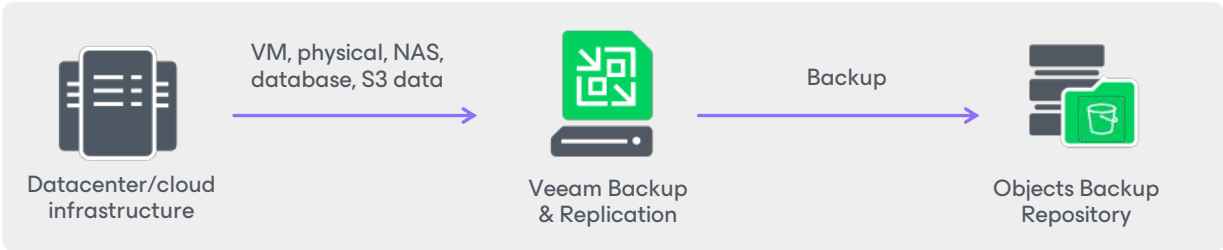

Modern enterprises require agile, scalable, and resilient data management solutions to keep pace with the explosive growth of data, with an estimated 181 zettabytes being generated in 2025. Organizations are now grappling with the complexity of storing, managing, and securing this data from increasingly disparate storage sources and targets.

10162025

Veeam with the Nutanix Unified Storage solution provides organizations a powerful, unified data protection and management across VM, file, object, and block storage — all managed from a single console. Instantly recover any type of data, defend against ransomware with immutable backups, and simplify operations with seamless integration with the Nutanix Prism Central multi-cluster manager. Gain peace of mind, lower the costs, and future-proof your hybrid cloud with resilient, scalable protection from Veeam and Nutanix.

Use Cases

Enterprise Backup & Disaster Recovery (DR):

Protect critical workloads running on Nutanix with reliable, fast backups and orchestrated recovery.

Ransomware Protection

Store immutable backups on Nutanix Objects Storage to prevent data loss from cyberthreats.

Cloud Data Management

Replicate or tier backups to public clouds for long-term retention, meeting compliance requirements, and optimizing costs of DR.

About Veeam Software

Veeam, the #1 global market leader in data resilience, believes businesses should control all their data whenever and wherever they need it. Veeam provides data resilience through data backup, data recovery, data portability, data security, and data intelligence. Based in Seattle, Veeam protects over 550,000 customers worldwide who trust Veeam to keep their businesses running. Key Benefits

- Veeam for Nutanix helps customers protect VMs and file, object (Unstructured data, e.g., Word and Excel) block (structured data, e.g., databases) while offering robust, comprehensive data security, portability, and management.

- Joint validated solutions with Nutanix Ready & Veeam Ready with object immutability.

- Leverage a consistent Nutanix platform for both your production environment and backup repository, while maintaining separation for enhanced resiliency.

- Flexible licensing options with Veeam Universal Licensing (VUL). Universal Licenses can be used to safeguard Nutanix AHV workloads, and Nutanix Files Storage and Nutanix Objects Storage data.

Key Features

- Multi-factor authentication (MFA), inline threat detection, immutability, and four-eyes authorization enhance resilience against cyber attacks.

- Centralize data protection management within Nutanix Prism Central ions.

- Nutanix Unified Storage protection of Nutanix Files Storage and Nutanix Objects Storage data.

- Agentless, application-aware backups for Nutanix AHV.

- Built-in monitoring, alerting, and reporting via Veeam ONE™.

- End-to-end encryption and role-based access control and flexible backup destinations across cloud and edge.
