Identify, Classify and Secure Sensitive Data on Nutanix Files

As knowledge workers continue to generate staggering volumes of data, it's becoming increasingly difficult to separate sensitive and mission-critical data from the rest. Indeed, securing valuable data is one of the biggest challenges organizations face, as evidenced by the frequent high-profile breaches and new complex compliance regulations.

Netwrix enables organizations to identify sensitive data on their Nutanix Files, see who has access to it and track the activity around it. With that security intelligence, you can proactively reduce data overexposure and detect policy violations and suspicious user behavior, and avoid having to work long nights and weekends to remediate the consequences of a breach.

SOLUTION ARCHITECTURE

Nutanix Files

- Register as partner server
- Receive activity data
- Collect permissions and ownership data
- Discover content sensitivity
- Embed classification labels

Netwrix Auditor and Netwrix Data Classification

- Data Discovery and Classification
- Risk Assessment
- Alerts on Threats Patterns
- Behavior Anomaly Discovery
- Interactive Search
- Reports and Dashboards

KEY SOLUTION BENEFITS

Netwrix offers end-to-end solutions for data-centric security that enable you to:

- **Oversee that sensitive data resides only in dedicated safe locations**
  When sensitive data surfaces outside a secure location, automatically quarantine it, reduce access permissions to it or redact sensitive content in it to reduce exposure. In addition, regularly review who has access to sensitive documents to enforce least privilege and reduce the risk of a data breach.

- **Detect and respond to data security threats faster**
  Reduce the time required to detect and respond to user activity that could threaten the security of sensitive information, such as massive file modifications or changes to permissions, and avoid having to work even longer hours than usual trying to remediate a breach.

- **Demonstrate to auditors that your data is secure**
  Achieve, maintain and prove compliance with less effort and expense. Slash the time required to prepare for audits by up to 85%, and answer ad-hoc questions from auditors in a few clicks instead of spending hours combing through the audit trail.
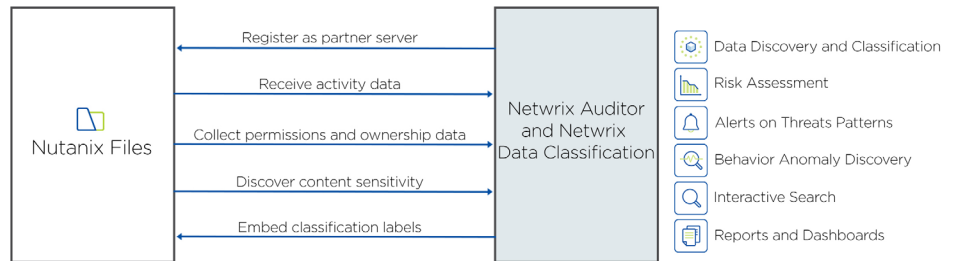

CUSTOMER QUOTE

"We are required by the Central Bank of Luxembourg and the National Bank of Belgium to protect the sensitive financial data we store and process. Using Netwrix Auditor, we were able to control that no unauthorized activity with these documents on Nutanix Files slipped under our radar."
– Sammy Bogaert, Senior Systems Administrator, Delen Private Bank

ABOUT NETWRIX

Netwrix is a software company that enables information security and governance professionals to reclaim control over sensitive, regulated and business-critical data, regardless of where it resides. Over 10,000 organizations worldwide rely on Netwrix solutions to secure sensitive data, realize the full business value of enterprise content, pass compliance audits with less effort and expense, and increase the productivity of IT teams and knowledge workers. Learn more at www.netwrix.com or follow us on LinkedIn, Twitter and Spiceworks Community.

ABOUT NUTANIX

Nutanix makes infrastructure invisible, elevating IT to focus on the applications and services that power their business. The Nutanix enterprise cloud platform delivers the agility, pay-as-you-grow economics and operational simplicity of the public cloud, without sacrificing the predictability, security and control of on-premises infrastructure. Nutanix solutions leverage web-scale engineering and consumer-grade design to natively converge compute, virtualization and storage into a resilient, software-defined solution that delivers any application at any scale. Learn more at www.nutanix.com or follow us on Twitter @nutanix.

NUTANIX READY VALIDATION

- Netwrix Auditor 9.7 - Add-on for Nutanix Files is validated on Nutanix AHV (AOS 5.9).
- Netwrix Data Discovery and Classification 5.4.7.5 is validated on Nutanix AHV (AOS 5.5).
