

# Nutanix and Blue Medora

Nutanix makes infrastructure invisible, elevating IT to focus on the applications and services that power their business. The Nutanix enterprise cloud platform leverages web-scale engineering and consumer-grade design to natively converge compute, virtualization and storage into a resilient, software-defined solution with rich machine intelligence. Nutanix has helped large and small IT organizations simplify their datacenter and gain predictable performance, linear scalability, and cloud-like infrastructure consumption.

Blue Medora software solutions tie together data from virtualized and cloud-based databases, applications and services with the critical underlying compute, storage and network infrastructure to create a unified view of the infrastructure. The Nutanix Management Pack serves as a component of Blue Medora's True Visibility Suite for VMware vRealize Operations, which enables organizations to breakdown IT silos and boost productivity up to 67%.

## SOLUTION OVERVIEW

Together Nutanix and Blue Medora help deliver end-to-end solutions for VMware vRealize Operations. Here are top features of the joint solution:

- Easy to design and deploy: Leverage sizing tools and reference designs to go from concept to production as much as 30X faster than traditional approaches.
- One platform for all: Consolidate on to a single solution with predictable scalability delivered by Nutanix's web-scale architecture.
- Key performance metrics: Garner insight more than 1,000 collected metrics.

## KEY BENEFITS FOR BUSINESS AND IT

- ✓ Get as much as 30X faster time to value from concept to production
- ✓ Eliminate under-utilized infrastructure silos, using up to 80% less space and 50% lower CapEx.
- ✓ Get fast VM related compute and storage performance
- ✓ Boost productivity up to 67%
- ✓ Reduce mean-time-to-innocence (MTTI) and mean-time-to-repair (MTTR) with customized, out-of-the-box dashboards
- ✓ Leverage 150+ alerts and notifications imported from the Nutanix API
- ✓ Access 30+ high-level views and 5 exportable reports

## TECHNICAL DETAILS

Nutanix solutions natively converge server and storage resources into a single, 100% software-defined appliance that comes ready to run all enterprise applications, at any scale. Built on a distributed web-scale architecture, a single Nutanix hyperconverged appliance can simultaneously run different workloads, including enterprise databases and applications, VDI, and big data workloads.

- Enterprise-wide visibility: With Blue Medora, monitor the health of Nutanix hyperconverged systems inside vRealize Operations to understand relationships between Nutanix and VMware VMs, hosts and datastores.
- Relationship mapping: Reduce troubleshooting time and simplify security and compliance management by mapping relationships between Nutanix and VMware layers.
- Predictive analytics: Stay ahead of issues with up-to-the-minute status and health awareness, collecting key metrics

## PARTNER SOLUTION BRIEF

## CUSTOMER (OR NUTANIX/PARTNER) QUOTE

“We are excited to partner with Nutanix, a leading cloud/SDDC building block and extend monitoring across the IT stack for customers to optimize performance. Our Nutanix-ready solution increases visibility into leading multi-cloud SDDC management tools like vRealize Operations.”

– Christian Fernando, VP of Product, Blue Medora
