

Supercharge Nutanix Powered Workspaces with Liquidware Digital Workspace Management

When Nutanix powered workspaces are combined with Liquidware's Digital Workspace Management suite, your organization can save time, money, increase user adoption and enhance user experience. Nutanix's leadership in hyperconverged infrastructure and Liquidware's proven offerings in workspace transformation, help ensure your pathway of success from proof-of-concept to ongoing production.

With Liquidware, Nutanix and the workspace platform of your choice, you can quickly ramp up user experience and productivity with high-performance workspaces for your end users.

Liquidware™ provides comprehensive User Environment Management, Application Layering and Digital Experience Monitoring in one convenient and extremely affordable suite known as Essentials™, which includes ProfileUnity™, FlexApp™ and Stratusphere UX™. End-user computing projects that incorporate the Essentials bundle reduce infrastructure and user-management costs, while improving workspace user experience and flexibility.

Nutanix, VMware® and Citrix® are leaders in application delivery and workspace virtualization, providing complete, flexible solutions that delivers Windows® applications and workspaces to any user on any device while keeping valuable information locked down in the datacenter. By combining granular controls with an uncompromised user experience, these workspace platforms help your organization keep pace with changing business demands while increasing productivity, simplifying management, improving security and reducing costs.

Nutanix® delivers invisible infrastructure for next-generation enterprise computing by natively converging compute, storage and virtualization resources into a turnkey hyperconverged solution. The world's most advanced enterprise datacenters rely on Nutanix web-scale technology to power their mission-critical workloads at any scale.

Liquidware and Nutanix: Together, Exceeding the Sum of Their Parts

The combination of Liquidware end-user computing solutions, together with the simplicity and scalability of Nutanix, provides a definitive architecture for flexible, manageable, high performance workspace deployments from the platform of your choice. These best-of-breed solutions together deliver scalability and cost-effectiveness that few others can deliver.

Customers worldwide are realizing that the addition of Liquidware Stratusphere UX, ProfileUnity and FlexApp to their Windows® delivery platform of choice gives them the agility, visibility, scalability and performance to ensure optimal user experience. These solutions – offering highly sought features and functionality – coupled with the web-scale benefits of Nutanix – result in unparalleled TCO while delivering tremendous scalability and user experience for workspace architectures.

User Environment Management with ProfileUnity

- One user profile across VDI, RDSH, DaaS and physical desktops
- Up to 10x faster logons vs. roaming profiles
- Application and user rights management
- Location/context-aware policy and profile capabilities
- Automated migration to Windows 10/11 and Server 2019/22

Application Layering with FlexApp

- Minimize base images by managing Windows OS images separate from applications
- PackageOnce™ and layer applications to any platform, any Windows OS, and in any cloud-hosted environment
- Reduce the number of Microsoft RDSH/Citrix XenApp servers that your organization runs and maintains
- Deliver applications quickly at user logon or with Click-to-Layer on-demand technology

Visibility with Stratusphere UX

- User-experience monitoring
- In-depth HDX metrics without the need, complication, or added cost of Citrix NetScaler
- Diagnose root causes of issues & bottlenecks
- Optimize resource capacity and performance
- Grow and scale Citrix XenApp and XenDesktop environments

Virtual Desktops with XenDesktop

- Undisputed market leader with over 300,000 customers
- Mobile, cloud, and workspace delivery flexibility
- Enterprise scalability and performance

Published Applications and Desktops with XenApp

- Unmatched user experience
- Simplified management
- Unified architecture for apps & desktops

Converged Infrastructure and Virtualization with Nutanix

- Purpose built for simple deployment and high performance for VDI
- Full control via PRISM™ Management Console with API Integration
- Linearly scalable for predictable growth in both performance gains and infrastructure costs
- Radically simplify and orchestrate compute and storage provisioning in one console
- Distributed File System and Replication (Shadow Clones) intelligently optimizes VDI deployments using software instead of manual configuration
