

# Nutanix provides the best Comprehensive Cybersecurity Platform for Enterprises & MSSPs

## KEY BENEFITS

Seceon helps deliver comprehensive cybersecurity solutions for Enterprises and Managed Service Providers. Here are main benefits of the solution:

- Comprehensive Visibility of all assets, flows, applications and their interactions
- Reduces Mean-Time-To-Response (MTTR) with Automatic Threat Remediation
- Reduces Mean-Time-To-Identify (MTTI) with Proactive Threat Detection
- Continuous Compliance and Monitoring (Security Analytics)
- Reduces CAPEX / OPEX with simplified licensing model and eliminates need for silo solutions (such as, UEBA, DLP, IDS, WAF)

“It is imperative for an advanced security solution to stay ahead of the threat curve that constantly looms and shifts on the horizon. ADT has launched ADT-IQ service based on the Seceon aiMSSP solution.”

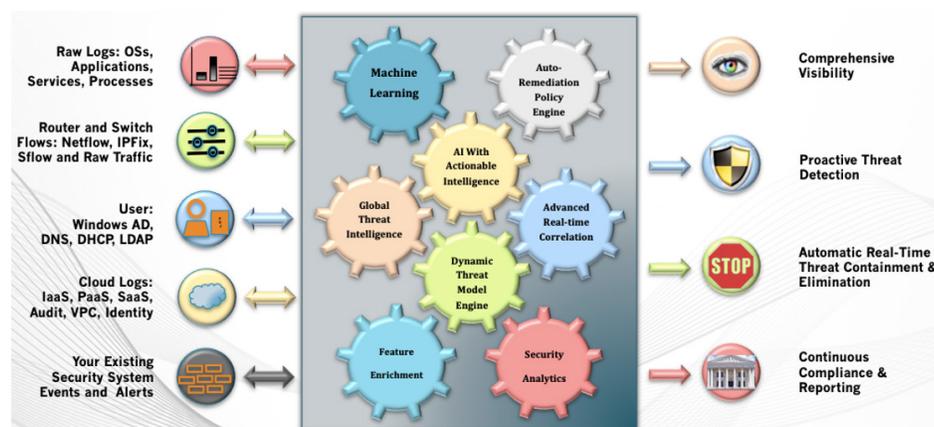

- Larry Cecchini, GM & Vice President at ADT Cybersecurity, Inc.

Seceon empowers Enterprises and MSSPs to analyze operational security data, proactively detect threats, and automatically contain & eliminate them in real-time. It goes beyond traditional defense-in-depth to provide “Comprehensive Cybersecurity for the Digital-Era” through the coalescence of Seceon’s Dynamic Threat Models, Machine Learning and Artificial Intelligence with actionable contextual awareness. aiSIEM™ and aiMSSP™ solutions built on the platform offer flexible deployment models.

Pains the solution addresses:

- Sophistication of cyber miscreants growing rapidly, and traditional solutions are not designed to handle these new age threats.
- Proliferation of security tool sets which is expensive and cumbersome to manage
- Scarcity of qualified information security professionals
- Continued growth of compliance regulations
- Attack surface is increasing with the digital transformation (Cloud migration and IoT)

## SOLUTION ARCHITECTURE/HOW IT WORKS

## Nutanix Ready Validation

Seceon aiSIEM 5.0.1 is validated on Nutanix AHV (AOS 5.11)

### NOTE:

1. Ingesting and parsing Nutanix logs by Seceon aiSIEM is planned as next phase of integration. This validation is for deploying and running aiSIEM on Nutanix AHV as a workload.

2. The aiSIEM workload was tested on NX-8170-G7

- CPU: 2x 6248
- RAM: 768GB RAM
- NVMe: 8x 4510 2TB (slots 0,1,2,3,4,5 8,9)
- 2x 40G in the x16 slots
- 1x 10G (quad) in the x8 slot and recorded around 40k iops which is in compliance with Seceon's platform requirements.

## RESOURCES AND GETTING STARTED

## CUSTOMER TESTIMONIALS

“When we did a side-by-side comparison between Seceon and some of the other solutions from larger providers, Seceon was able to detect real-life security threats that the other platforms did not detect. Leveraging Seceon’s aiMSSP solution, we are now processing more than 2B+ events per day with less than one percent rate of false positives and have increased the efficiency of our IT and SOC personnel by 77%.”

- Grigoriy Milis, Chief Technology Officer, RFA

“Some tools we reviewed were presented as turnkey but they neglected to tell us that they need 15 people to turn the key. Seceon can handle the lion share of the work looking for breaches that happen within our system and has reduced our workload from security standpoint being able to assure that the patient data is secured,”

- Richard Maier, Senior V.P., Information System Operations, Caduceus Inc.

## ABOUT SECEON

Seceon empowers Enterprises and MSSPs to provide “Comprehensive Cybersecurity for the Digital-Era”, through the coalescence of Dynamic Threat Models, ML and AI with actionable contextual awareness to proactively surface threats that matter and automatically contain/eliminate them in real-time. aiSIEM™ and aiMSSP™ solutions built on the platform with flexible deployment models. ## ABOUT NUTANIX

Nutanix makes infrastructure invisible, elevating IT to focus on the applications and services that power their business. The Nutanix enterprise cloud platform delivers the agility, pay-as-you-grow economics and operational simplicity of the public cloud, without sacrificing the predictability, security and control of on-premises infrastructure. Nutanix solutions leverage web-scale engineering and consumer-grade design to natively converge compute, virtualization and storage into a resilient, software-defined solution that delivers any application at any scale.
