Database Modernization

Database Planning & Assessment Workshop

BENEFITS

- Lower risk with a Planning & Assessment Report tailored to your specific environment and requirements
- Identify recommended services, software and infrastructure to ensure successful operations on Nutanix platform

PREREQUISITES

- Existing Oracle or Microsoft SQL Server database platform and infrastructure
- Data collection available to Nutanix for assessment and review (Microsoft MAP, Oracle AWR)
- Completion of the Discovery Questionnaire prior to the workshop to gather data about your current design, environment and operational processes

OVERVIEW

The Database Planning & Assessment Workshop is a comprehensive service that provides database teams with the key knowledge and planning insights they need to successfully deploy databases on the Nutanix platform.

At the end of this multi-day workshop, your team will:

- Recognize areas for database improvement based upon an in-depth review of your current design, environment and operational processes
- Develop recommendations for improving the performance, scalability and efficiency of your database platform when using Nutanix-based solutions

Database Transformation Kickstart	Database Planning & Assessment Workshop	Database Design Workshop	Database Migration Workshop	Database Deployment

SERVICE SCOPE

During the workshop, an experienced solutions specialist uses the information you provided in the Discovery Questionnaire (see prerequisites) to guide your team through a detailed review of your existing infrastructure, database footprint and associated SLAs. The solutions specialist then assesses database and server performance metrics, working closely with your DBAs to discover pain points and identify where the majority of their time is currently spent.

This fixed-outcome Planning & Assessment service includes up to 2 days and a defined 'pack' of one of the following:

- *Oracle:* a single pack of up to 5 databases
- *SQL Server:* a single pack of up to 5 SQL Server instances or 20 databases

Additional packs are available as add-ons should you need more. Each add-on includes:

- *Oracle:* a single pack of up to 7 databases
- *SQL Server:* a single pack of up to 7 SQL Server instances or 30 databases

with a typical duration of 2 extra days for each add on pack.

NUTANIX.

DELIVERABLES

- Planning & Assessment Report

Objectives:

- Assess and summarize your database environment in terms of its current health and architecture, with a focus on technical aspects and business requirements
- Review and apply relevant industry database best practices
- Document clear recommendations for improving the performance, manageability and scalability of your database environment in alignment with Nutanix solutions
  - o Leverage documentation to review best practices and communicate current infrastructure and database concerns to business stakeholders
- Discuss Nutanix-based solutions for improving operational efficiency and performance

TASK

	Duration
Database Planning & Assessment Workshop	Typically 2 days
Add-on pack	Typically 2 additional days each add-on pack
