

Database Modernization

Database Reference VM on Nutanix

BENEFITS

- Database Reference VM with Nutanix Best Practices applied

DELIVERABLES

- Knowledge transfer session describing the best practices implemented in the Reference VM

OVERVIEW

The Database Reference VM on Nutanix service helps you build a database reference VM with Nutanix best practices applied on the Nutanix Enterprise cloud platform.

Nutanix Xpert Services provides a Senior Consultant for 1 business day for the purpose of building a database server Reference VM following Nutanix best practices. The Reference VM can then be used as a template to create new SQL Server VMs or registered with Era to create a software profile.

SERVICE SCOPE

The Database Reference VM on Nutanix service is scoped for 1 day and has the following primary objectives:

- Collect Reference VM details such as operating system (OS), database version, resources required (CPU, Memory, Hard disk, etc.)
- Build Reference VM
- Discuss best practices implemented in the reference VM

Service includes 1 database type, with a unique combination of that database variation and the operating system:

- Oracle
- SQL Server

PREREQUISITES

- Nutanix Cluster details
 - Reference VM operating system, database software and resource details
- * the OS and Database Binaries are downloaded and ready to use

TASK

Project Kickoff	All
Data Collection	All
Nutanix Database Reference VM Service	All
