

Nutanix Private Training

Program Overview

WHY PRIVATE TRAINING?

Research has shown that training your team as a group can reap benefits above and beyond individuals attending classes separately. Since everyone is learning the material at the same time it creates a level playing field. It also provides opportunities to reinforce what they're hearing and how it applies to your organization.

With Nutanix Private Training we train your team at your site or virtually—bringing the instructor, the course materials, and the hands-on labs to you. Private Training can also be a more cost-effective way to train your entire team since the cost per student is lower than the cost of a public class. Plus, the training is based around your schedule.

BENEFITS OF PRIVATE TRAINING

Cost Savings & Minimized Travel Needs

The cost-per-student for Private Training is typically 25% less than the cost of individual registrations. It also eliminates the travel expenses since we bring the training to your chosen location. Virtual options are also available.

Dedicated Nutanix Expert

Your Nutanix Certified Instructor will be dedicated to your team and will be able to encourage and facilitate discussions on how your team may choose to implement the features and benefits of Nutanix AHV in your environment.

Convenience

We work with your team to find a date and time for training that works best with your organization's schedule, minimizing downtime and conflicts with deadlines or other priorities.
