NUTANIX

NCP Migration and Operations Workshop

Product Code: CNS-NCP-WRK-MGO

At-a-Glance

Stage: Plan

The Nutanix Cloud Platform (NCP) Migration and Operations Workshop gives IT teams in-depth insights and practical guidance to achieve a successful migration to NCP. This workshop is ideal for the Plan stage of a Hybrid Multicloud journey and is suitable for complex solutions, including software-defined networking, automation, databases, and end user computing.

Service Scope

Delivered by highly skilled consultants with solid domain expertise and rich experience, the workshop begins with a discovery session to understand the operating environment and required outcomes. Critical areas identified during the discovery session are then addressed in a customized workshop.

Upon completion of the customized workshop, IT teams will:

- Know the areas of consideration vital to achieving a successful migration to NCP
- Understand and know how to resolve challenges that could stall migrations
- Plan and drive an optimized, efficient transition to new technologies and operating models

Potential workshop topics include but are not limited to the following:

Nutanix Cloud Infrastructure (NCI)

- Migrate workloads from VMware vSphere to Nutanix AHV
- Migrate business-critical applications to Nutanix AHV
- Explore data protection and disaster recovery (DR) solutions
- Integrate 3rd-party solutions with NCI
- Execute a full-stack transformation
- Manage environmental and operational considerations
- Operationalize and automate infrastructure and workload lifecycle
- Understand operational considerations when re-platforming

Software-defined Networking

- Migrate from VMware NSX to Nutanix Flow Virtual Networking
- Integrate Cisco Appliance Centric Infrastructure (ACI) into Nutanix AHV

Automation

- Migrate from VMware Aria (VRA/VRO) to Nutanix Cloud Manager (NCM) Self-Service
- Integrate existing Ansible/Terraform deployments into Nutanix AHV

- Migrate from VMware Tanzu to Nutanix-based Container solutions
- Migrate from RedHat OpenShift on VMware ESXi to RedHat OpenShift on Nutanix AHV

Databases

- Migrate existing databases to Nutanix AHV
- Operationalize and automate database lifecycle with Nutanix Database Services (NDB)
- Migrate NDB from VMware ESXi to Nutanix AHV

End User Computing (EUC)

- Migrate Citrix on VMware ESXi to Nutanix AHV
- Migrate VMware Horizon to Citrix Virtual Apps and Desktops (CVAD) or Citrix Desktop-as-a-Service (DaaS)
- Migrate EUC users and their data to Nutanix Unified Storage (NUS) Files
- Explore EUC data protection and disaster recovery for EUC multisite solutions

Limitations

- Migration is not included in the workshop

Supported Hypervisors

- Nutanix AHV
- VMware ESXi
- Microsoft Hyper-V

Prerequisites

- Knowledge of current operations and existing product suite
- Understanding of future vision for the environment
- Completed discovery session and worksheet

Required Product Licenses

- None

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Workshop
- High-level Summary Presentation
- Project Closeout

Duration

Typically up to 4 days

Related Products

- Nutanix Cloud Platform (NCP)

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions, which can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

AI-ML Planning Workshop

Product Code: CNS-DAY0-WRK-PLN-GPT

At-a-Glance

Phase: Design

The Nutanix Artificial Intelligence – Machine Learning (AI-ML) Planning Workshop offers IT teams in-depth and practical guidance to plan and implement AI-ML workloads based on a Generative Pre-trained Transformer (GPT) model on on-premises Nutanix Cloud Infrastructure (NCI) clusters. This workshop is beneficial during the Planning stage of the Nutanix GPT-in-a-Box Solution journey.

Service Scope

A series of design workshops is delivered by highly skilled consultants with strong domain expertise and rich experience to ensure that the solution requirements and required outcomes are identified. Design workshops require collaboration with key customer stakeholders from architecture, virtualization, and networking teams. After the design workshop, the consultant develops a Nutanix Design document for AI-ML workloads and a Configuration workbook that addresses conceptual, logical, and physical NCI design elements.

This service includes the following activities:

- Gather and document solution requirements, constraints, assumptions, dependencies, and decisions in a series of workshops
- Develop NCI cluster design for AI workloads
- Discuss the NVIDIA GPU selection and configuration options for training and inference stages
- Assess the network requirements and design virtual networking, including integration with the physical network
- Validate cluster size and platform selection based on workload details provided by the customer
- Design NUS Files data service
- Develop a plan for training a sample dataset and validation
- Design security including data-at-rest encryption, Secure Sockets Layer (SSL) certificate, password complexity, and syslog

Limitations

- A single production environment at a single physical site with AHV hypervisor
- Limited to AI-ML workloads

Supported Hypervisors

- Nutanix AHV

Prerequisites

- None

Required Product Licenses

- None

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Workshop
- Optimized Customer Strategy
- High-level Summary Presentation
- Project Closeout

Duration

Typically up to 5 days

Related Products

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions, which can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

NCI Design Workshop

Product Code: CNS-INF-A-WRK-DES

At-a-Glance

Stage: Design

The Nutanix Cloud Infrastructure (NCI) Design Workshop offers IT teams in-depth and practical guidance to create a comprehensive design for on-premises NCI clusters. It covers various aspects such as scalability, functionality, integration, and operational needs. This workshop is beneficial during the Design stage of a Hybrid Multicloud journey, especially for complex solutions that involve third-party applications and automation.

Service Scope

A series of design workshops are delivered by highly skilled consultants with strong domain expertise and rich experience to ensure that the solution requirements and required outcomes are identified. Design workshops require collaboration with key customer stakeholders from architecture, virtualization, and networking teams. After the design workshop, the consultant develops a Nutanix Design document and configuration workbook that addresses conceptual, logical, and physical NCI design elements. It also details requirements, constraints, assumptions, design decisions, identified risks, and mitigations.

Starter Edition

For customers who want a basic Infrastructure design to run greenfield workloads.

The Starter Edition includes the following activities:

- Gather and document solution requirements, constraints, assumptions, dependencies, and decisions in a series of workshops
- Develop NCI architecture
- Define integration with AD/LDAP and IPAM/DNS environments
- Develop NCI cluster design
- Design virtual networking, including integration with the physical network
- Design virtual storage
- Validate NCI sizing and platform selection based on workload details provided by the customer
- Develop a plan for system functional validation testing
- Design security including data-at-rest encryption, SSL certificate, password complexity, and syslog

Pro Edition

For customers looking for a more comprehensive design that focuses on migrating existing workloads and storage, including multisite architectures and disaster recovery (DR) capabilities.

The Pro Edition includes the following activities:

- Everything included in the Starter Edition
- Develop and plan a multisite on-premises design

- Design for one of the Nutanix Unified Storage (NUS) data services (Objects, Volumes, or Files)
- Plan security hardening and compliance as per the *Nutanix Security Operations Guide*
- Assess datacenter infrastructure and rack design
- Gather RPO and RTO requirements for workloads, including DR and replication considerations
- Plan for VM and data protection
- Design to support the migration of existing workloads and storage into the new environment
 - Review the existing environment at a high level to support sizing
 - Develop migration methodology

Ultimate Edition

For customers looking to fully transform and secure infrastructure with advanced RBAC, Flow Virtual Networking, or Flow Network Security.

The Ultimate Edition includes the following activities:

- Everything included in Starter and Pro Editions
- Assess the current state of elements included in the design
- Support multiple clusters
- Design RBAC and Nutanix categories/tagging
- Design for all Nutanix Unified Storage (NUS) data services (Objects, Volumes, or Files)
- Design for Nutanix Flow Virtual Networking (VPC) or Nutanix Flow Network Security Microsegmentation

Limitations

Starter Edition

- One production environment at one physical site for a single supported hypervisor
- Limited to general virtualization and database workloads; end user computing (EUC) workload designs are available via workload-specific offers

Pro Edition

- Detailed migration planning is not included in the Pro Edition. It is available as part of the Virtual Machine Migration Workshop

Supported Hypervisors

- Nutanix AHV
- VMware ESXi
- Microsoft Hyper-V

Prerequisites

- None

Required Product Licenses

- None

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Workshop
- Project Closeout

Note: This offer is available with several documentation options, defined here <https://www.nutanix.com/support-services/consulting-services/documentation-tiers>

Duration

Starter: Typically up to 5 days

Pro: Typically up to 10 Days

Ultimate: Typically up to 15 days

Related Products

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Cloud Manager (NCM)
- Nutanix Database Services (NDB)

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions, which can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

NCI Disaster Recovery Design Workshop

Product Code: CNS-INF-A-WRK-DRD-STD

At-a-Glance

Stage: Design

The Nutanix Cloud Infrastructure (NCI) Disaster Recovery (DR) Design Workshop offers IT teams in-depth and practical guidance to create a comprehensive DR design for NCI based on Nutanix DR solutions, including Asynchronous, NearSync, Synchronous DR, and Metro Availability. This workshop is ideal during the Design stage of a Hybrid Multicloud journey for on-premises to on-premises disaster recovery.

Service Scope

Delivered by highly skilled consultants with strong domain expertise and rich experience to ensure that the disaster recovery solution requirements and required outcomes are identified. Design workshops require collaboration with key customer stakeholders from architecture, virtualization, and networking teams.

After the design workshop, the consultant develops a Nutanix DR Design document and configuration workbook that addresses conceptual, logical, and physical NCI DR design elements. It also details requirements, constraints, assumptions, design decisions, identified risks, and mitigations.

The service includes the following activities:

- Gather and document solution requirements, constraints, assumptions, dependencies, and decisions, including recovery point (RPO) and recovery time (RTO) requirements
- Map RPO and RTO requirements into a DR solution
- Review Nutanix DR technologies and how each would fit into a solution
- Review virtual infrastructure components and integration with the DR solution
- Develop a plan for system functional validation testing

Sync / Async / NearSync DR Solutions

- Design availability zones
- Design protection policies
- Design recovery plans
- Design custom IP mappings
- Design categories

Metro Availability Solutions

- Design remote sites
- Design witness
- Design containers
- Design DRS / Affinity / HA settings on VMware ESXi clusters

Protection Domain-based Solutions

- Design remote sites
- Design protection domains
- Design VM classification

Limitations

- NCI DR architecture for a single multi-cluster environment
- Limited to general virtualization workloads; database and end user computing (EUC) workload designs are available via workload-specific offers

Supported Hypervisors

- Nutanix AHV
- VMware ESXi

Prerequisites

- None

Required Product Licenses

- None

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Project Closeout
- Workshop

Note: This offer is available with several documentation options, defined here <https://www.nutanix.com/support-services/consulting-services/documentation-tiers>

Duration

Typically up to 3 days

NCI Flow Network Security Microsegmentation Design Workshop

Product Code: CNS-INF-A-WRK-MCR-STD

At-a-Glance

Stage: Design

The Nutanix Cloud Infrastructure (NCI) Flow Network Security Microsegmentation Design Workshop offers IT teams in-depth and practical guidance to create a comprehensive design for Flow Network Security which creates software-based firewalls that inspect traffic within the datacenter to protect and isolate workloads, users, and data. IT teams have a choice of scenarios to design for their on-premises NCI cluster or Nutanix Cloud Clusters (NC2) for Amazon Web Services (AWS). This offer is ideal for the Design stage of a Hybrid Multicloud journey.

Service Scope

Delivered by highly skilled consultants with strong domain expertise and rich experience to ensure that the microsegmentation requirements and required outcomes are identified. Design workshops require collaboration with key customer stakeholders from networking, virtualization, and application teams.

After the design workshop, the consultant develops an NCI Flow Network Security Design document and configuration workbook that addresses requirements, constraints, and assumptions. The workbook also provides a detailed implementation plan and the list of required security policies and categories to be created and attached. This workshop will design security policies and categories matching one of the following use cases:

- End User Computing – Citrix Virtual Apps and Desktops, Frame
- 3-tier applications – presentation, application, data tiers
- Single-server applications – applications run on a single-server
- Server, service, virtual machine (VM), or environment isolation
- Service insertion and chaining

The service includes the following activities:

- Review AHV networking terminology
- Review features and functions of Flow Network Security, including microsegmentation, network service insertion, and network automation
- Discuss the design goals and gather communication requirements, including risks, constraints, and assumptions
- Assess the current state of systems to be segmented
- Assess network configuration impacts and requirements
- Develop security policies and categories for your selected use case
- Develop an implementation plan, process, and deployment waves

- Develop a post-implementation validation and test plan
- Optionally license and enable Nutanix Flow Network Security

Limitations

- Development of security policies and categories is limited to 10 applications
- Configuration of categories and policies are not included

Supported Hypervisors

- Nutanix AHV

Prerequisites

- None

Required Product Licenses

- None

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Workshop
- Project Closeout

Note: This offer is available with several documentation options, defined here <https://www.nutanix.com/support-services/consulting-services/documentation-tiers>

Duration

Typically up to 4 days

Related Products

AI-ML Stack Design Workshop

Product Code: CNS-INF-A-WRK-DES-GPT

At-a-Glance

Phase: Design

The Nutanix Artificial Intelligence – Machine Learning (AI-ML) Stack Design Workshop offers IT teams in-depth and practical guidance to create a comprehensive design for AI-ML workloads based on a Generative Pre-trained Transformer (GPT) model on on-premises Nutanix Cloud Infrastructure (NCI) clusters. It covers various aspects such as performance, scalability, flexibility, integration, and operational needs. This workshop is beneficial during the Design stage of the Nutanix GPT-in-a-box Solution journey.

Service Scope

A series of design workshops is delivered by highly skilled consultants with strong domain expertise and rich experience to ensure that the solution requirements and required outcomes are identified. Design workshops require collaboration with key customer stakeholders from architecture, virtualization, and networking teams. After the design workshop, the consultant develops a Nutanix Design document for AI-ML workloads and a Configuration workbook that addresses conceptual, logical, and physical NCI design elements.

This service includes the following activities:

- Gather and document solution requirements, constraints, assumptions, dependencies, and decisions in a series of workshops
- Develop NCI cluster design for AI workloads
- Discuss the NVIDIA GPU selection and configuration options for training and inference stages
- Assess the network requirements and design virtual networking, including integration with the physical network
- Validate cluster size and platform selection based on workload details provided by the customer
- Design NUS Files data service
- Develop a plan for training a sample dataset and validation
- Design security including data-at-rest encryption, Secure Sockets Layer (SSL) certificate, password complexity, and syslog

Limitations

- A single production environment at a single physical site with AHV hypervisor
- Limited to AI-ML workloads

Supported Hypervisors

- Nutanix AHV

Prerequisites

- None

Required Product Licenses

- None

Deliverables

- Project Kick-off
- Project Schedule
- Project Status Report(s)
- Workshop
- Configuration Workbook
- Design Document
- Project Closeout

Duration

Typically up to 5 days

Related Products

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions, which can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

NCI Cluster Deployment or Expansion

Product Code: CNS-INF-A-SVC-DEP

At-a-Glance

Stage: Deploy

The Nutanix Cloud Infrastructure (NCI) Cluster Deployment or Expansion accelerates the deployment of hybrid cloud infrastructure to support any application and workload. Highly skilled consultants can deploy on-premises NCI clusters or dedicated Nutanix Unified Storage (NUS) clusters. The clusters can be deployed to various supported hardware platforms, regardless of whether it's Nutanix, our OEM partners, or other platform providers. This offer is ideal for the Deploy stage of the Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with solid domain expertise and rich experience begin deploying the NCI or dedicated NUS clusters according to Nutanix recommended practices and the customer-provided design document. After the deployment, the consultant creates a customized as-built document and updated configuration workbook to document the final configuration of the cluster(s).

Starter Edition

For customers who want to deploy up to 4 individual on-premises NCI clusters or expand an existing NCI cluster with additional nodes according to customer-provided design and configuration documentation during a single on-premises visit.

The Starter Edition is a basic NCI cluster deployment without any NUS data services and includes the following activities:

- Review customer-provided design and configuration documentation
- Configure layer 2 virtual networking on hypervisor hosts
 - Configure hypervisor vSwitch
- Deploy and configure NCI cluster, including recommended firmware and AOS
- Deploy and configure the hypervisor cluster on the deployed NCI cluster
 - For VMware vSphere clusters, integrate the vSphere cluster into an existing vCenter or deploy the vCenter Server Appliance (VCSA)
 - For Microsoft Hyper-V clusters, integrate Hyper-V cluster into an existing System Center Virtual Machine Manager (VMM)
 - Configure LCM for automatic updates (online or integrated into an existing dark site webserver)
- Deploy and integrate Prism Central (optional)
- Enable local key management service for encryption (optional)
- Test and validate the deployed clusters

Pro Edition

For customers who want to deploy one of the available Nutanix Unified Storage data services: Objects, Volumes, or Files on one or more NCI clusters deployed with the Starter Edition.

The Pro Edition is appropriate for deploying dedicated NUS clusters and includes the following activities plus one of the optional activities:

- Everything included in the Starter Edition
- Deploy one NUS Files, Volumes, or Objects data service according to a customer-provided design and configuration documentation
 - NUS Objects:
 - Enable Nutanix Objects
 - Deploy object store
 - Generate API keys
 - Configure bucket(s)
 - Test and validate the NUS Objects deployment
 - NUS Volumes:
 - Configure the iSCSI target address
 - Configure volume groups
 - Test and validate the NUS Volumes deployment
 - NUS Files:
 - Deploy NUS Files
 - Configure file server and shares
 - Test and validate the NUS Files deployment
- Optional services (choose one):
 - Deploy and configure dark site LCM webserver running either IIS (Windows) or Apache (supported Linux OS) on the customer-provided VM image
 - Harden Nutanix Controller VM and AHV according to the *Nutanix Security Guide*
 - Install and configure hardware and drivers for GPU
 - Install host drivers
 - Deploy GPU license server
- Configure a single test VM for vGPU

Ultimate Edition

For customers who want to deploy any combination of the available Nutanix Unified Storage data services: Objects, Volumes, or Files on one or more NCI clusters deployed with the Starter Edition.

The Ultimate Edition is appropriate for deploying dedicated NUS clusters to consolidate all data services and includes the following activities plus one of the optional activities:

- Everything included in the Starter Edition

- Deploy any combination of NUS Files, Volumes, or Objects data service according to a customer-provided design and configuration documentation
 - NUS Objects:
 - Enable Nutanix Objects
 - Deploy object store
 - Generate API keys
 - Configure bucket(s)
 - Test and validate the NUS Objects deployment
 - NUS Volumes:
 - Configure the iSCSI target address
 - Configure volume groups
 - Test and validate the NUS Volumes deployment
 - NUS Files:
 - Deploy NUS Files
 - Configure file server and shares
 - Test and validate the NUS Files deployment
- Optional activities: (choose one):
 - Deploy and configure dark site LCM webserver running either IIS (Windows) or Apache (supported Linux OS) on the customer-provided VM image
 - Harden Nutanix Controller VM and AHV according to the *Nutanix Security Guide*
 - Install and configure hardware and drivers for GPU
 - Install host drivers
 - Deploy GPU license server
- Configure a single test VM for vGPU

Limitations

- For each quantity purchased, deployment is limited to 1 node
- Maximum of 64 nodes distributed in up to 4 NCI or dedicated NUS clusters at a single physical site
- Does not include creation or updates to existing design documentation

Starter Edition

- Hypervisor vSwitch limited to 2 vSwitches and 5 port groups
- For VMware vSphere clusters, vCenter Server Appliance (VCSA) deployment limited to one standalone appliance

Pro Edition

- Deployment of one NUS Files, Volumes, or Objects data service per NCI or dedicated NUS cluster up to a maximum of 4 clusters according to the customer-provided design (customer choice of one)

Ultimate Edition

- Hardening of 3rd-party components, including VMware ESXi and Microsoft Hyper-V

Supported Hypervisors

- Nutanix AHV
- VMware ESXi
- Microsoft Hyper-V

Prerequisites

- Hardware that meets all product requirements for the selected hypervisor, NCI, and NUS (as required)

Note: For information on the requirements for NCI Clusters, see Field Installation Overview in the *Field Installation Guide* on the Nutanix Support Portal.

- For VMware ESXi Hypervisor, Enhanced vMotion Compatibility (EVC) must be enabled for cluster expansions
- Customer-provided Design Document
- Completed Pre-Install Questionnaire

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Unified Storage (NUS)
- Hypervisor licenses for NCI

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Deployment
- As-built Guide
- Project Closeout

Duration

Starter: Typically up to 3 days

Pro: Typically up to 4 days

Ultimate: Typically up to 5 days

Note: Duration varies based on supported hypervisor, cluster, and node quantity

Related Products

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Unified Storage (NUS)
- End User Computing (EUC)

Terms and Conditions

Professional Services: NCI Cluster Deployment or Expansion

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions, which can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

NCI Disaster Recovery Deployment

Product Code: CNS-INF-SVC-DRD

At-a-Glance

Stage: Deploy

The Nutanix Cloud Infrastructure (NCI) Disaster Recovery (DR) Deployment accelerates the deployment of NCI DR solutions, including Asynchronous, NearSync, Synchronous DR, Metro Availability, and Protection Domain-based DR on on-premises NCI clusters. This offer is ideal for the Deploy stage of the Hybrid Multicloud journey for on-premises to on-premises disaster recovery.

Service Scope

Highly skilled consultants with solid domain expertise and rich experience begin by reviewing the customer-provided DR design document and requirements. The consultant then deploys and configures one of the supported DR solutions according to Nutanix recommended practices and the customer-provided design document. After the deployment, the consultant creates a customized as-built document and updated configuration workbook to document the final configuration of the cluster(s).

Asynchronous or NearSync DR Solution Edition

For customers deploying Asynchronous or NearSync replication between on-premises availability zones.

The Asynchronous or NearSync Edition includes the following activities:

- Review customer-provided DR design documentation, RPO, and RTO requirements
- Review sizing for Nutanix snapshots
- Review requirements for Nutanix Guest Tools (NGT)
- Based upon customer-provided DR design:
 - Configure availability zones
 - Configure protection policies
 - Configure recovery plans
 - Configure custom IP mappings
- Deploy and integrate Prism Central, as required
- Install NGT (optional, requires supported guest operating systems)
- Test and validate recovery of nonproduction-protected VMs

Synchronous and Metro Availability Solution Edition

For customers deploying Nutanix synchronous replication to ensure a zero-data loss configuration between on-premises availability zones within a metro region.

The Metro Availability Solution Edition includes the following activities:

- Review customer-provided DR design documentation, RPO, and RTO requirements
- Review sizing for Nutanix snapshots
- Review network bandwidth and latency to support synchronous replication

- Review Metro Availability operational modes (manual, automatic resume, witness)
- Based upon customer-provided DR design:
 - Configure remote sites on each NCI cluster
 - Deploy Metro Witness VM at 3rd site (optional)
 - Configure source and destination containers
 - Configure protection domain(s) between containers
 - For VMware ESXi clusters, configure DRS affinity rules and HA settings
- Migrate test VMs onto Metro Availability containers
- Test and validate migration of test VMs between sites
- Test and validate the DR process for failed site
- Test and validate the clean-up process and migration back to the primary site

Protection Domain-based Solution Edition

For customers leveraging legacy Protection Domain-based Async DR and NearSync DR technologies between on-premises availability zones.

The Protection Domain-based Solution Edition includes the following activities:

- Review customer-provided DR design documentation, RPO, and RTO requirements
- Review sizing for Nutanix snapshots
- Review requirements for Nutanix Guest Tools (NGT)
- Based upon customer-provided DR design:
 - Configure remote sites
 - Configure protection domains
 - Assign VMs to the protection domains

- Install NGT on VMs (optional)

Note: NGT is required for cross-hypervisor DR

- Test and validate recovery of nonproduction-protected VMs
 - Validate recovery from the primary site protection domain
 - Validate recovery from remote site protection domain
 - Validate protection domain migration (planned event)
 - Validate protection domain activation (unplanned event)
 - Validate post-DR clean-up procedures

Limitations

- Disaster Recovery to Nutanix Cloud availability zone (also known as Nutanix DRaaS) is not included

Asynchronous or NearSync DR Solution Edition

- Configuration limited to:
 - 2 availability zones

- 5 protection policies
- 5 recovery plans
- 20 custom IP mappings
- Installation of NGT limited to 5 VMs
- Test and validate recovery of up to 5 nonproduction-protected VMs

Synchronous and Metro Availability Solution Edition

- Migrate up to 5 test VMs onto Metro Availability containers

Protection Domain-based Solution Edition

- Configure up to 10 protection domains
- Installation of NGT limited to 5 VMs
- Test and validate recovery of up to 5 nonproduction-protected VMs

Supported Hypervisors

- Nutanix AHV
- VMware ESXi

Prerequisites

- Fully supported and functional on-premises NCI source cluster and NCI target cluster that meets all product requirements for the selected DR solution.

Note: For information on the requirements for configuring Nutanix Disaster Recovery, see Disaster Recovery Requirements in *Nutanix Disaster Recovery Guide* on the Nutanix Support Portal.

- Completed Pre-Install Worksheet

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI)
- Hypervisor license for NCI

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Deployment
- As-built Guide
- Project Closeout

Note: This offer is available with several documentation options, defined here <https://www.nutanix.com/support-services/consulting-services/documentation-tiers>

Duration

Async, NearSync, Sync:
Typically up to 3 days

Metro Availability:
Typically up to 3 days

Protection Domains:
Typically up to 2 days

Related Products

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions, which can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

AI-ML Stack Deployment

Product Code: CNS-INF-A-SVC-DEP-GPT

At-a-Glance

Phase: Deploy

The Nutanix Artificial Intelligence – Machine Learning (AI-ML) Stack Deployment accelerates the deployment of the infrastructure and associated components to support an AI-ML based on Generative Pre-trained Transformer (GPT) workload. Highly skilled consultants deploy an on-premises Nutanix Cloud Infrastructure (NCI) Cluster and the Nutanix Unified Storage (NUS) Files data service, and enable Nutanix Cloud Manager (NCM). The clusters can be deployed to various supported hardware platforms, regardless of whether it's Nutanix or our OEM partners. This offer is ideal for the Deploy stage of the Nutanix GPT-in-a-box Solution journey.

Service Scope

Highly skilled consultants with solid domain expertise and rich experience begin by deploying and configuring the NCI cluster according to Nutanix's recommended practices and the customer-provided design document. After the cluster deployment, the consultant deploys and configures Nutanix Unified Storage Files data services and NCM Self-Service. After the deployment, the consultant creates a customized as-built document and a configuration workbook to document the final configuration of the AI-ML Stack.

This service includes the following activities:

- Review customer-provided AI-ML Stack design and configuration documentation
- Configure layer 2 virtual networking on hypervisor hosts
 - Configure hypervisor vSwitch
- Deploy and configure NCI cluster, including recommended firmware, AHV Hypervisor, and AOS
 - Configure Life Cycle Manager (LCM) for automatic updates, either online or integrated into an existing dark site webserver
- Install and configure hardware and drivers for GPU
 - Install host drivers
 - Deploy GPU license server
- Deploy and integrate Prism Central
- Enable local key management service for encryption (optional)
- Test and validate the deployed clusters
- NUS Files
 - Deploy NUS Files
 - Configure file server and single share
 - Test and validate the NUS Files deployment

- NCM Self-Service
 - Enable Self-Service in Prism Central
 - Import and configure a single CentOS blueprint
 - Configure Training VMs with GPU passthrough

Limitations

- Excludes creation or updates to existing design documentation
- NCI Cluster deployment limited to a single on-premises cluster with up to 4 nodes at a single physical site
- Hypervisor vSwitch limited to 2 vSwitches and 5 port groups
- NUS Files deployment limited to 3 VMs and a single share
- NCM Self-Service configuration limited to 1 CentOS blueprint

Supported Hypervisors

- Nutanix AHV

Prerequisites

- Hardware that meets all product requirements for the selected hypervisor, NCI, NUS, and GPT-in-a-Box (as required)

Note: For information on the requirements for NCI Clusters, see Field Installation Overview in the *Field Installation Guide* on the Nutanix Support Portal.

For information on NUS Files Prerequisites, see Prerequisites in *Nutanix Files User's Guide* on the Nutanix Support Portal.

- Active Directory service accounts available for use by NUS Files
- Access to configure DNS, if not managed by Active Directory
- Completed Pre-Install Questionnaire

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI) Ultimate Edition
- Nutanix Unified Storage (NUS) Pro Edition

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Deployment
- As-built Guide
- Project Closeout

Duration

Typically up to 4 days

Related Products

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Unified Storage (NUS)
- Nutanix Cloud Manager (NCM)

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions that can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

FastTrack for NCI Flow Network Security Microsegmentation

Product Code: CNS-INF-FST-FLOW

At-a-Glance

Stage: Deploy

FastTrack for Nutanix Cloud Infrastructure (NCI) Flow Network Security Microsegmentation accelerates the deployment of Flow Network Security, which creates software-based firewalls that inspect traffic within the datacenter for critical applications and data. IT Network teams have a choice of available scenarios to deploy for their on-premises NCI cluster or Nutanix Cloud Clusters (NC2) for Amazon Web Services (AWS). This offer is ideal for the Deploy stage of a Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with solid domain expertise and rich experience begin with an enablement session to identify requirements. After the enablement session, the consultant configures NCI Flow Network Security for one of the available scenarios. Enablement sessions require collaboration with key customer stakeholders from networking, virtualization, and application teams.

The service includes the following activities:

- Conduct NCI Flow Network Security enablement session
 - Review AHV networking terminology
 - Discuss Flow Network Security policies
 - Explain the Flow Network Security policy evaluation order
 - Explain categories usage in Flow Network Security policies
- Configure and customize one of the following scenarios
 - Configure a single Application Security policy (2- or 3-tier)
 - Configure a single Isolation Environment policy
 - Configure a single Quarantine policy
 - Configure a Virtual Desktop Infrastructure (VDI) policy with support for AD groups

Limitations

- Limited to a single Prism Central instance
- Application Security policy limited to a total of 5 VMs in all tiers
- Isolation Environment policy limited to 5 VMs within a category
- Quarantine policy limited to 5 VMs
- VDI policy limited to 3 Active Directory groups, with 3 users per group

Supported Hypervisors

- Nutanix AHV

Prerequisites

- Fully supported and functional on-premises NCI cluster or Nutanix Cloud Clusters (NC2) for AWS cluster that meets all product requirements for Flow Network Security
- Fully supported and functional on-premises Prism Central instance

Note: For information on the requirements for configuring the Prism Central instance, see *Prism Central Installation or Upgrade* in *Prism Central Infrastructure Guide* on the Nutanix Support Portal.

- Prism Central and Prism Element time should be in sync
- Active Directory domain and user group requirements as required for the VDI policy

Note: For information on the requirements for configuring NCI Flow Network Security, see *Flow Microsegmentation Guide* on the Nutanix Support Portal.

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI) Pro or Ultimate Edition

Deliverables

- Project Kickoff
- Project Status Report(s)
- Deployment
- As-built Guide
- Project Closeout

Duration

Typically up to 2 days, delivered remotely

Related Products

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Cloud Clusters (NC2)

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions, which can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

FastTrack for NCI Flow Virtual Networking VPC

Product Code: CNS-INF-FST-FVN

At-a-Glance

Stage: Deploy

FastTrack for Nutanix Cloud Infrastructure (NCI) Flow Virtual Networking (VPC) accelerates the deployment of software-defined network virtualization solutions, which provides overlay capabilities for on-premises Nutanix AHV clusters, with in-depth networking expertise from highly skilled consultants. IT Network teams have a choice of available scenarios to enable Flow Virtual Networking for on-premises sites. This offer is ideal for the Deploy stage of a Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with solid domain expertise and rich experience begin with an enablement and discovery session. After the enablement and discovery session, the consultant configures NCI Flow Virtual Networking for one of the available scenarios. Enablement sessions require collaboration with key customer stakeholders from networking, virtualization, and application teams.

Starter Edition

For customers who want to enable NCI Flow Virtual Networking for a single Prism Central in a single physical site.

The Starter Edition includes the following activities:

- Conduct NCI Flow Network Security enablement and discovery session
 - Provide NCI Flow Virtual Networking architecture overview
 - Analyze and determine physical network readiness
 - Describe VPC implementation
 - Plan VPC subnets
 - Plan connectivity to external subnets
 - Gather and document NAT gateway implementation requirements
 - Identify static route requirements
 - Discover management plane and operational dependencies
- Configure Flow Virtual Networking on Prism Central
 - Integrate Flow Virtual Networking into an existing DNS service
 - Create an external network (NAT)
 - Create VPCs
 - Create subnets
 - Configure and assign floating IPs

- Create policy-based routing policies for the following use cases
 - Traffic flow between subnets
 - Traffic flow in/out of a VPC
- Create and execute a Flow Virtual Networking Test Plan to validate the solution

Pro Edition

For customers who want to enable NCI Flow Virtual Networking for 2 Prism Central instances in 2 physical sites with VPN connectivity.

The Pro Edition includes the following activities:

- Everything included in the Starter Edition
- Enable Flow Virtual Networking on both Prism Central instances
- Configure a VPN endpoint between Prism Central instances

Limitations

Starter Edition

Configuration limited to:

- A single external network (NAT)
- 5 VPCs, 10 subnets per VPC, and 5 floating IPs per VPC
- 5 floating IPs per VPC and up to 10 VMs
- 5 policy-based routing policies

Pro Edition

- VPN endpoint configuration is limited to the on-premises Nutanix VPN gateway

Supported Hypervisors

- Nutanix AHV

Prerequisites

- Fully supported and functional on-premises NCI cluster(s) that meets all product requirements for Flow Network Security

Note: For information on the requirements for configuring NCI Flow Virtual Networking, see *Prerequisites for Flow Virtual Networking* on the Nutanix Support Portal.

- At least one external VLAN accessible from Prism Central
- Access to customer networking team to implement static routes

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI) Pro or Ultimate Edition

Deliverables

- Project Kickoff
- Project Status Report(s)
- Deployment
- As-built Guide
- Project Closeout

Duration

Starter: Typically up to 4 days

Pro: Typically up to 5 days

Related Products

- Nutanix Cloud Infrastructure (NCI)

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions, which can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

Virtual Machine Migration Workshop

Product Code: CNS-INF-A-WRK-MIG-STD

At-a-Glance

Stage: Migrate

The Virtual Machine Migration Workshop offers IT teams in-depth and practical guidance to create a comprehensive virtual machine migration plan for migrating virtual machines to Nutanix Cloud Infrastructure (NCI). This offer is ideal for the Migrate state of a Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with solid domain expertise and rich experience begin with a discovery session that collects migration requirements, current and desired guest operating system versions, application dependencies, and maintenance windows. The consultant then conducts a workshop based on the discussions during the discovery session, selects the migration tool, and creates a migration plan.

The service includes the following activities:

- Conduct a virtual machine migration discovery session:
 - Gather and document migration requirements, constraints, assumptions, dependencies, and decisions for the migration effort
 - Assess the current state of systems to be migrated
- Conduct virtual machine migration workshop:
 - Review options for migrating existing virtual and physical machines to the planned Nutanix Cloud Platform (NCP)
 - Assess network configuration impacts and requirements
 - Select a migration tool
 - Develop a migration plan and process, rollback plans, and migration wave(s)
 - Develop a post-migration validation plan

Limitations

- Limited to migration planning for 500 VMs. Larger environments can be accommodated via a custom statement of work (SOW)
- Detailed planning for database- and application-specific migrations is addressed under separate application-specific service offers

Supported Hypervisors

- Nutanix AHV
- VMware ESXi
- Microsoft Hyper-V

Prerequisites

- Operating systems are supported by both NCI and the selected migration tool

Note: For information on the supported guest operating systems, see *Nutanix Compatibility and Interoperability Matrix* on the Nutanix Support Portal.

Required Product Licenses

- None

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Workshop
- Project Closeout

Note: This offer is available with several documentation options, defined here <https://www.nutanix.com/support-services/consulting-services/documentation-tiers>

Duration

Typically 4 days

Related Products

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Cloud Clusters (NC2)

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions, which can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

Virtual Machine Migration

Product Code: CNS-INF-A-SVC-MIG-VMS

At-a-Glance

Stage: Migrate

Virtual machine (VM) Migration offers IT teams strong domain expertise to migrate virtual machines to Nutanix Cloud Infrastructure (NCI) per the customer-provided migration plan. This offer is ideal for the Migrate stage of a Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with strong domain expertise and rich experience begin with validating the customer-provided migration plan to ensure the virtual machine migration requirements and post-migration validation plan are accurate. The consultant then migrates the virtual machines according to the migration plan.

The service includes the following activities:

- Validate virtual machine migration requirements and validation plan
- Deploy migration tools as required according to the migration plan
- Configure infrastructure as required by the migration plan
- Migrate the virtual machines based on the migration plan
- Monitor the migration process via periodic touchpoints
- Remediate identified migration issues
- Execute the existing post-migration validation plan

Limitations

- Migration planning is not included
- For each pack purchased, migration is limited to up to 5 VMs or up to 2.5TB of total data
 - Migration must occur as a single contiguous migration wave
- Larger environments can be accommodated via a custom statement of work (SOW)

Supported Migration Tools

- Nutanix Move Application Migration
- VMware Converter

Supported Source Hypervisors

- Nutanix AHV
- VMware ESXi
- Microsoft Hyper-V
- Microsoft Azure

- Amazon Web Service EC2

Prerequisites

- Customer-provided storage migration plan
- Fully supported and functional on-premises NCI cluster or Nutanix Cloud Clusters (NC2), or Microsoft Azure target cluster that meets all product requirements for Nutanix Move Application Migration
- Fully supported and functional source environment

Note: For information on the requirements for using Nutanix Move Application Migration, see *Move User Guide* on the Nutanix Support Portal.

- Operating systems are supported by both NCI and the selected migration tool

Note: For information on the supported guest operating systems, see *Nutanix Compatibility and Interoperability Matrix* on the Nutanix Support Portal.

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI)

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Migration
- Migration Procedure
- Migration Summary
- Project Closeout

Duration

Typically up to 2 days

Note: Migration time varies based on data volume, throughput, and number of migration waves

Related Products

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Cloud Clusters (NC2)

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions, which can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

FastTrack for Nutanix Move Application Migration

Product Code: CNS-INF-FST-MOVE

At-a-Glance

Stage: Migrate

FastTrack for Nutanix Move Application Migration accelerates the deployment of a cross-hypervisor mobility solution to migrate virtual machines (VMs) with minimal downtime with in-depth migration expertise from highly skilled consultants. Additionally, consultants demonstrate the migration of virtual machines. This offer is ideal for the Migrate state of a Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with solid domain expertise and rich experience begin with an enablement session. After the enablement session, the consultant deploys and configures Nutanix Move and a single VM source and destination, minimizing the time for migrating VMs.

The service includes the following activities:

- Conduct a Nutanix Move Application Migration enablement session
 - Review integration among AOS and hypervisors
 - Provide Nutanix Move features and functionality overview
- Deploy Nutanix Move appliance
 - Configure Nutanix Move to connect to the VM source environment
 - Configure Nutanix Move to connect to the target cluster
 - Demonstrate migration of VMs

Limitations

- Deploy a single Nutanix Move appliance
- Connect to a single existing supported target cluster
- Connect to a single existing supported VM source environment
- Migration limited to 5 non-production VMs
- In-guest VM reconfiguration is not included
- Nutanix Move must support the operating system of the source and target VMs

Supported Source Hypervisors

- Nutanix AHV
- VMware ESXi
- Microsoft Hyper-V
- Microsoft Azure

- Amazon Web Service EC2

Supported Target Hypervisors

- Nutanix AHV
- VMware ESXi
- Microsoft Hyper-V
- Microsoft Azure

Prerequisites

- Fully supported and functional on-premises NCI cluster, Nutanix Cloud Clusters (NC2), or Microsoft Azure target cluster that meets all product requirements for Nutanix Move Application Migration
- Fully supported and functional source environment

Note: For information on the requirements for using Nutanix Move Application Migration, see *Move User Guide* on the Nutanix Support Portal.

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI)

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- As-built Guide
- Deployment
- Project Closeout

Duration

Typically up to 2 days, delivered remotely

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions, which can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

Nutanix Unified Storage (NUS) Services

NUS Mine Backup Appliance Deployment

Product Code: CNS-INF-SRV-DPD-MIN

At-a-Glance

Stage: Deploy

The Nutanix Unified Storage (NUS) Mine Backup Appliance Deployment accelerates the deployment of the Nutanix Mine dedicated backup solution with in-depth expertise from highly skilled consultants. IT Teams have a choice of available backup vendors when deploying component VMs on the on-premises dedicated NUS cluster, where the cluster storage is used to store backup workloads. This offer is ideal for the Deploy stage of a Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with solid domain expertise and rich experience begin by deploying and configuring the dedicated NUS cluster. After the cluster deployment, the consultant then deploys and configures the Mine Backup Appliance for one of the supported backup tools according to Nutanix recommended practices and customer-provided design document. After the deployment, the consultant creates a customized as-built document and updated configuration workbook to document the final configuration of the NUS cluster.

The service includes the following activities:

- Deploy dedicated NUS cluster
 - Review layer 2 networking requirements
 - Deploy cluster
 - Configure Nutanix AHV and NUS to support Mine
 - Integrate dedicated NUS cluster into Prism Central (optional)
 - Test and validate the deployed dedicated NUS cluster
- Deploy Nutanix Mine
 - Deploy foundation for Nutanix Mine VM
 - Deploy the backup engine
 - Configure integration between Veeam and Prism (as needed)
- Configure backup tool (per policy pack)
 - Configure up to five of the backup sources listed below
 - Configure backup policies and assign the configured sources based on the existing design
- Perform test backup and restore of a non-production VM
 - VM-level restore
 - File-level restore

Limitations

- Dedicated NUS cluster limited to single on-premises cluster with up to 8 nodes at a single physical site
- Backup tool configuration limited to a single supported backup tool
- Backup configuration limited to 5 sources and five backup policies
- Test backup and restore limited to a single VM-level restore and a single file-level restore

Supported Hypervisor

- Nutanix AHV

Supported Backup Tools

- HYCU
- Veeam
- Commvault

Supported Backup Sources

- Nutanix AHV
- VMware ESXi
- Microsoft Hyper-V
- Physical Linux sources
- Physical Windows sources

Prerequisites

- Fully supported and functional on-premises dedicated NCI cluster with up to 8 nodes that meets all product requirements for NUS and NUS Mine Backup Appliance

Note: For information on the requirements for NCI Clusters, see Field Installation Overview in *the Field Installation Guide* on the Nutanix Support Portal.

- Completed Pre-install worksheet

Required Product Licenses

- Nutanix Unified Storage (NUS)
- Backup software licenses for the dedicated NUS cluster

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Deployment
- As-built Guide
- Project Closeout

Duration

Typically up to 4 days

Note: Duration varies based on the backup tool and the number of backup policies created

Related Products

- Nutanix Unified Storage (NUS)
- NUS Mine Integrated Backup

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions, which can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

FastTrack for Files

Product Code: CNS-INF-FST-FILES

At-a-Glance

Stage: Deploy

FastTrack for Files speeds up the enablement and deployment of the Nutanix Unified Storage (NUS) Files data service, providing scale-out distributed file storage solutions with in-depth expertise from highly skilled consultants. IT Storage teams have a choice of available deployment scenarios for on-premises NCI cluster, dedicated NUS cluster, or Nutanix Cloud Clusters (NC2). This offer is ideal during the Deploy stage of a Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with solid domain expertise and rich experience begin with an enablement and discovery session. After the enablement session, the consultant installs and configures the NUS Files data service for one of the available scenarios. Enablement sessions require collaboration with key customer stakeholders from storage, virtualization, and application teams.

The service includes the following activities:

- Conduct NUS Files enablement and discovery session
 - Provide NUS architectural overview
 - Review NUS Files features and functionality
 - Review integration with Nutanix Cloud Infrastructure (NCI), disaster recovery (DR), and NUS Files
 - Gather and document solution requirements
- Configure and customize one of the following scenarios:
 - Deploy NUS Files and copy non-nested SMB or NFS shares and one dataset
 - Deploy NUS Files and configure and demonstrate the protection domain or Smart DR process using a non-production environment
- Integrate NUS Files into existing antivirus solution using ICAP protocol (optional)

Limitations

- Limited to one of the listed scenarios
- Limited to one NCI, dedicated NUS, or NC2 cluster for non-Smart DR configurations and 2 clusters for Smart DR environments
- Copy of one dataset limited to 25GB
- Reconfiguration of client workstation(s) is not included

Supported Hypervisors

- Nutanix AHV

Prerequisites

- Fully supported and functional on-premises non-production NCI cluster, dedicated NUS cluster, or NC2 cluster that meets all product requirements
- Optional fully supported and functional on-premises disaster recovery NCI, dedicated NUS cluster, or NC2 cluster that meets all product requirements

Note: For information on NUS Files Prerequisites, see Prerequisites in *Nutanix Files User's Guide* on the Nutanix Support Portal.

- Active Directory service accounts available for use by NUS Files
- Access to configure DNS, if not managed by Active Directory
- For Smart DR, both NCI and dedicated NUS clusters are managed under a single Nutanix Prism Central

Required Product Licenses

NCI and NC2 Clusters

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Unified Storage (NUS) Pro Edition

Dedicated NUS Clusters

- Nutanix Unified Storage (NUS) Pro Edition

Deliverables

- Project Kickoff
- Project Status Report(s)
- Deployment
- As-built Guide
- Project Closeout

Duration

Typically up to 2 days, delivered remotely

Related Products

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Cloud Clusters (NC2)
- Nutanix Unified Storage (NUS)

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions, which can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

Storage Consolidation Workshop

Product Code: CNS-INF-A-WRK-STG

At-a-Glance

Stage: Migrate

The Storage Consolidation Workshop offers storage teams in-depth and practical guidance to create a comprehensive storage migration plan for migrating data from one of the available Nutanix Unified Storage (NUS) data services: Objects, Volumes, or Files. This offer benefits the Migrate stage of a Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with solid storage domain expertise and rich experience begin with a discovery session that collects availability requirements, current and desired database versions, application dependencies, and maintenance windows. The consultant then conducts a workshop based on the discussions undertaken during the discovery session and creates a migration plan.

The service includes the following activities:

- Conduct a storage migration discovery session:
 - Gather and document migration requirements, constraints, assumptions, dependencies, and decisions for the migration effort
- Conduct storage migration workshop:
 - Discuss migration options and constraints for each migration method based on the database versions, operating system, and application availability
 - Assess the current state of systems to be migrated
 - Review options for migrating existing data to the planned NUS infrastructure, including recommended migration tools
 - Assess network configuration impacts and requirements
 - Develop a migration plan, process, and migration waves
 - Develop a post-migration validation plan

Limitations

- Migration planning limited to up to 10 sources (share/bucket/LUN) of one of the supported data types listed below

Supported Data Types

- File data migrating to NUS Files
- Block data migrating to NUS Volumes
- Amazon S3-compatible bucket/object data migrating to NUS Objects

Prerequisites

- Completed Storage Configuration Worksheet

Required Product Licenses

- None

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Workshop
- Project Closeout

Note: This offer is available with several documentation options, defined here <https://www.nutanix.com/support-services/consulting-services/documentation-tiers>

Duration

Typically up to 4 days

Related Products

Files Migration

Product Code: CNS-INF-A-SVC-MIG-FIL

At-a-Glance

Stage: Migrate

Files Migration offers IT Storage teams strong storage domain expertise to migrate unstructured file data to the Nutanix Unified Storage (NUS) Files data services which provide scale-out distributed file storage solutions. IT Storage teams can choose migration scenarios for on-premises NCI clusters, dedicated NUS clusters, or Nutanix Cloud Clusters (NC2). This offer is ideal during the Migrate stage of a Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with strong storage domain expertise and rich experience begin with validating the customer-provided migration plan to ensure the storage migration requirements and post-migration validation plan are accurate. The consultant then migrates the unstructured file data according to the migration plan.

The service includes the following activities:

- Validate storage migration requirements and validation plan
- Deploy migration tools (at Nutanix discretion) as required
- Migrate the unstructured file storage based on the migration plan
- Monitor the migration process via periodic touchpoints
- Remediate identified migration issues
- Execute the existing post-migration validation plan

Limitations

- Migration planning is not included
- Quantity of TiB limited to the quantity specified at the time of purchase

Supported Hypervisors

- Nutanix AHV

Prerequisites

- Customer-provided storage migration plan
- Fully supported and functional on-premises NCI cluster, dedicated NUS cluster, or NC2 cluster that meets all product requirements

Note: For information on NUS Files prerequisites, see Prerequisites in *Nutanix Files User's Guide* on the Nutanix Support Portal.

Required Product Licenses

NCI and NC2 Clusters

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Unified Storage (NUS) Pro Edition

Dedicated NUS Clusters

- Nutanix Unified Storage (NUS) Pro Edition

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Migration
- Migration Procedure
- Migration Summary
- Project Closeout

Duration

Typically up to 4 days

Note: Migration time varies based on data volume, throughput, and number of migration waves

Nutanix Cloud Clusters (NC2) Services

Nutanix Cloud Clusters Design Workshop

Product Code: CNS-INF-A-WRK-NC2

At-a-Glance

Stage: Design

The Nutanix Cloud Clusters (NC2) Design Workshop offers IT teams in-depth and practical guidance to create a comprehensive design for integrating NC2 on AWS or Azure with the existing on-premises Nutanix environment. The workshop covers various aspects such as scalability, functionality, integration, and operational needs. This workshop is beneficial during the Design stage of a Hybrid Multicloud journey.

Service Scope

Delivered by highly skilled consultants with strong domain expertise and rich experience, begin by ensuring that the solution requirements and required outcomes are identified. Design workshops require collaboration with key customer stakeholders from architecture, virtualization, and networking teams. After the design workshop, the consultant develops a Nutanix Design document that addresses conceptual, logical, and physical NC2 design elements. It also details requirements, constraints, assumptions, design decisions, identified risks, and mitigations.

The service includes the following activities:

- Conduct a NC2 design workshop:
 - Discuss the design goals and gather business and technical requirements, including risks, constraints, and assumptions
 - Review and validate requirements against existing NCI cluster(s)
 - Public cloud platform connectivity, including mapping of network constructs from on-premises NCI to the public cloud platform
- Create an NC2 design addressing requirements identified during the workshop, including:
 - NC2 architecture and cluster design
 - Security and required cloud access controls
 - Management plane and operational dependencies
 - Provisioning methods and integration
 - Public cloud platform resource access and usage

Limitations

- Each workshop covers the integration of one production environment at one physical site and one supported public cloud platform listed below

Supported Hypervisors

- Nutanix AHV

Supported Public Cloud Platforms

- Amazon Web Services (AWS)

- Microsoft Azure

Prerequisites

- None

Required Product Licenses

- None

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Workshop
- Design Document
- Project Closeout

Duration

Typically up to 2 days, delivered remotely.

Nutanix Cloud Clusters on AWS Deployment

Product Code: CNS-INF-A-SVC-DEP-NC2A

At-a-Glance

Stage: Deploy

The Nutanix Cloud Clusters (NC2) on Amazon Web Services (AWS) Deployment accelerates the deployment of NC2 to support applications and workloads running on an AWS Elastic Cloud Compute (EC2) Bare-Metal Instance. Integration with existing infrastructure components is also included. This offer is ideal for the Deploy stage of the Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with solid domain expertise and rich experience begin deploying the NC2 on AWS cluster according to Nutanix recommended practices and the customer-provided design document. After the deployment, the consultant creates a customized as-built document and updated configuration workbook to document the final configuration of the NC2 cluster.

The service includes the following activities:

- Deploy and configure an NC2 Cluster on AWS
 - Deploy Nutanix Cluster on AWS via the NC2 Console
 - Register to a compatible existing Prism Central
 - Deploy AWS Route 53 DNS resolvers to integrate on-premises DNS
 - Configure AWS virtual private gateways with static or dynamic routes
 - Create a new AWS VPC
 - Create subnets
 - Assign NAT and Internet gateways
 - Create IAM roles in AWS
 - Map the AWS account into the NC# Console
- Integrate with the following existing infrastructure components:
 - Integrate with LDAP using existing Active Directory
 - Integrate with SMTP using an existing mail relay
 - Assist with AWS VPN endpoint configuration

Limitations

- Excludes creation or updates to existing design documentation

- Limited to 1 NC2 Cluster on AWS with a maximum of 28 nodes:
 - 2 AWS Route 53 DNS resolvers
 - 2 AWS virtual private gateways with up to 6 static or 6 dynamic routes
 - 6 subnets
- Excludes on-premises routing and VPN endpoint/firewall configuration

Supported Hypervisors

- Nutanix AHV

Supported Public Cloud Platforms

- Amazon Web Services (AWS)

Prerequisites

- Customer-provided NC2 Design Document
- Completed Pre-Install Questionnaire
- Amazon Web Services (AWS) account with sufficient CPU quota

Note: For information on the NC2 deployment prerequisites, see NC2 on AWS Requirements in the *Nutanix Cloud Clusters on AWS Deployment and User Guide* on the Nutanix Support Portal.

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI)
- Hypervisor licenses for NCI

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Deployment
- As-built Guide
- Project Closeout

Duration

Typically up to 3 days, delivered remotely

Related Products

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Cloud Clusters (NC2)

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions, which can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

Nutanix Cloud Clusters on Azure Deployment

Product Code: CNS-INF-A-SVC-DEP-NC2Z

At-a-Glance

Stage: Deploy

The Nutanix Cloud Clusters (NC2) on Microsoft Azure Deployment accelerates the deployment of NC2 to support applications and workloads running on an Azure Bare-Metal Instance for NC2. Integration with existing infrastructure components is also included. This offer is ideal for the Deploy stage of the Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with solid domain expertise and rich experience begin deploying the NC2 on Azure cluster according to Nutanix recommended practices and the customer-provided design document. After the deployment, the consultant creates a customized as-built document and updated configuration workbook to document the final configuration of the NC2 cluster.

The service includes the following activities:

- Deploy and configure an NC2 Cluster on Azure
 - Add the Azure subscription as a cloud account in the NC2 management console
 - Deploy a Nutanix Cluster on Azure via the NC2 Console
 - Deploy Prism Central on Azure
 - Deploy and configure NCI Flow Networking
 - Create a new Azure Resource Group
 - Create a new Azure vNet
 - Create subnets
 - Assign NAT gateway
 - Configure Azure App registrations, resource providers, and Azure Active Directory IDs
- Integrate with the following existing infrastructure components:
 - Integrate with LDAP using existing Active Directory
 - Integrate with SMTP using an existing mail relay
 - Assist with Azure VPN endpoint configuration

Limitations

- Does not include creation or updates to existing design documentation
- Limited to 1 NC2 Cluster on Azure with a maximum of 13 nodes:
 - 6 subnets
- Does not include on-premises routing and VPN endpoint/firewall configuration

Supported Hypervisors

- Nutanix AHV

Supported Public Cloud Platforms

- Microsoft Azure

Prerequisites

- Customer-provided NC2 Design Document
- Completed Pre-Install Questionnaire
- My Nutanix account is required to access the NC2 Console.
- Azure account with an active subscription.
- Azure Active Directory and permissions to create an App registration in Azure AD with access to the new subscription
- Connectivity between on-premises datacenter and Azure.

Note: For information on the NC2 on Azure deployment prerequisites, see NC2 Deployment Prerequisites in the *Nutanix Cloud Clusters on Azure Deployment and User Guide* on the Nutanix Support Portal.

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI)
- Hypervisor licenses for NCI

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Deployment
- As-built Guide
- Project Closeout

Duration

Typically up to 4 days, delivered remotely

Terms and Conditions

Nutanix Cloud Management (NCM) Services

Self-Service Automation Transformation KickStart

Product Code: CNS-DAY0-EA-KST-SSA

At-a-Glance

Stage: Plan

The Self-Service Automation Transformation KickStart offers automation teams in-depth insights and practical guidance to achieve a successful self-service automation transformation. This Kickstart workshop is ideal for the Plan stage of a Hybrid Multicloud journey and is suitable for transforming automation to meet evolving demands of modern applications.

Service Scope

Delivered by highly skilled consultants with solid automation domain expertise and rich experience, the KickStart workshop begins with a discovery session to understand the operating environment and required outcomes. Critical areas identified during the discovery session are then addressed in a customized workshop.

Upon completion of this workshop, automation teams will:

- Understand and prioritize the benefits of investing in self-service automation
- Be able to recognize and develop robust self-service automation
- Learn how a fully integrated automation solution accelerates time to value

Potential workshop topics include but are not limited to the following:

- Learn the benefits of creating a true private cloud in a hybrid cloud world
- Avoid common pitfalls with self-service automation
- Understand the importance of adopting a product mentality when implementing self-service automation
- Learn how to implement on-premises as-a-service offers

Limitations

- Transformation activities not included in the service

Prerequisites

- Completed Automation Questionnaire

Required Product Licenses

- None

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Workshop
- High-level Summary Presentation
- Project Closeout

Duration

Typically up to 2 hours, delivered remotely

Related Products

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions that can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

NCM Self-Service Design Workshop

Product Code: CNS-CAS-A-WRK-DES

At-a-Glance

Stage: Design

The Nutanix Cloud Management (NCM) Self-Service Design Workshop offers automation teams in-depth and practical guidance to create a comprehensive design for application-centric infrastructure automation and lifecycle management (LCM) platforms to streamline and accelerate application development. This workshop is beneficial during the Design stage of a Hybrid Multicloud journey.

Service Scope

Delivered by highly skilled consultants with strong automation expertise and rich experience to ensure that the solution requirements and required outcomes are identified. Design workshops require collaboration with key customer stakeholders from automation, application, architecture, and virtualization teams. After the design workshop, the consultant develops a Nutanix Design document and configuration workbook that addresses conceptual, logical, and physical NCM Self-Service design elements. It also details requirements, constraints, assumptions, design decisions, identified risks, and mitigations.

On-Premises Edition

For customers who want a basic design for on-premises Infrastructure as a Service (IaaS).

The On-Premises Edition includes the following activities:

- Gather and document solution requirements, constraints, assumptions, dependencies, and decisions
- Design NCM Self-Service architecture for development and production deployment environment
- Design NCM Self-Service management infrastructure service version release testing
- Provide an overview of the Agile development lifecycle, code repositories, and release management processes for infrastructure automation projects
- Define integration with AD/LDAP, IPAM/DNS, and backup environments
- Assess network configuration impacts and requirements
- Develop blueprint specification documents defining the automation of a Linux and a Windows operating system (OS) deployment
- Design a self-service portal based on NCM Self-Service Marketplace
- Define RBAC via Self-Service project membership with show-back functionality

On-Premises + Public Cloud Edition

For customers who want to design for more robust IaaS web, application, and database server blueprints and who can provision to a supported public cloud platform. The solution provides a design for environments to support development, testing, staging, and production releases.

The On-Premises plus Public Cloud Edition includes the following activities:

- Everything included in the On-Premises Edition
- Support for an additional test environment

- NCM Self-Service architecture for a supported public cloud platform
- Definition of integration with software-defined load balancers (see below)

Limitations

Starter Edition

- Design architecture for one development and one production deployment environment
- Blueprints defining the automation of one Linux and one Windows OS deployment

Pro Edition

- Support for one additional test environment
- Includes architecture for a single supported public cloud provider
- Solution document includes defining the automation of a single 3-tier application stack for web app deployments

Supported Hypervisors

- Nutanix AHV
- VMware ESXi

Supported Public Cloud Platforms

- Amazon Web Services (AWS)
- Microsoft Azure
- Google Cloud Platform

Supported Load Balancers with REST API

- F5
- Nginx
- HAProxy

Supported Web Application Stacks

- LAMP
- WISA

Prerequisites

- None

Required Product Licenses

- None

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Workshop
- Project Closeout

Note: This offer is available with several documentation options, defined here <https://www.nutanix.com/support-services/consulting-services/documentation-tiers>

Duration

Starter: Typically up to 5 days

Pro: Typically up to 10 days

Related Products

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Cloud Clusters (NC2)
- Nutanix Cloud Manager (NCM)

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. NCM Intelligent Operations Design

Product Code: CNS-INF-A-WRK-IOD-STD

At-a-Glance

Stage: Design

The Nutanix Cloud Management (NCM) Intelligent Operations Design Workshop offers IT teams in-depth and practical guidance to create a comprehensive design for Nutanix X-Play automation and playbooks to automate common tasks within the Nutanix Cloud Platform (NCP). This workshop is beneficial during the Design stage of a Hybrid Multicloud journey.

Service Scope

Delivered by highly skilled consultants with strong domain expertise and rich experience to ensure that the advanced analytics and intelligent insights solution meets your business needs. Design workshops require collaboration with key customer stakeholders from architecture and virtualization teams. After the design workshop, the consultant develops a Nutanix Design document for deploying Nutanix X-Play automation and playbooks to automate common tasks within the Nutanix Cloud Platform.

This service includes the following activities:

- Conduct an NCM Intelligence Operations design workshop:
 - Gather and document solution requirements, constraints, assumptions, dependencies, and decisions
 - Provide an overview of the technology and capture the targeted use cases and actions
- Create a detailed NCM Intelligent Operations design that defines the triggers, built-in workflow actions, and playbooks

Limitations

- For each action pack purchased, the design is limited to up to 10 action policies or playbooks
- Scripted solutions requiring custom scripts are not included but can be accommodated via a custom statement of work (SOW)

Supported Hypervisors

- Nutanix AHV
- VMware ESXi
- Microsoft Hyper-V

Prerequisites

- None

Required Product Licenses

- None

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Workshop
- Project Closeout

Note: This offer is available with several documentation options, defined here <https://www.nutanix.com/support-services/consulting-services/documentation-tiers>

Duration

Typically up to 3 days for a single action pack

Related Products

- Nutanix Cloud Infrastructure (NCI)

NCM Intelligent Operations Deployment

Product Code: CNS-INF-A-SVC-ITO-STD

At-a-Glance

Stage: Deploy

The Nutanix Cloud Management (NCM) Intelligent Operations Deployment accelerates the deployment of Nutanix X-Play automation and playbooks to automate common tasks within the Nutanix Cloud Platform (NCP) with in-depth expertise from highly skilled consultants. This offer is ideal for the Deploy stage of a Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with solid domain expertise and rich experience begin deploying Nutanix X-Play automation according to Nutanix recommended practices and the customer-provided design document. After policies are configured and validated, the consultant creates a customized as-built document to document the final configuration of the automation.

The service includes the following activities:

- Review customer-provided design
- Deploy Prism Central (optional)
- Configure up to 10 X-Play playbooks (automation policies) using built-in or custom triggers, each performing up to 10 composite workflow steps
- Playbooks can be triggered via
 - NCI Flow Network Security configuration details, developed in the Flow Network Security Microsegmentation Design service
 - Conditional alert trigger (e.g., high CPU utilization)
 - Event, manual, or time-driven triggers
 - Scriptless API integration via webhook
- Conduct testing and validation of the policies configured

Limitations

- Does not include creation or updates to existing design documentation
- For each action pack purchased, deployment is limited to up to 10 action policies or playbooks
- Scripted solutions requiring custom scripts are not included but can be accommodated via a custom statement of work (SOW)

Supported Hypervisors

- Nutanix AHV
- VMware ESXi
- Microsoft Hyper-V

Prerequisites

- Fully supported and functional on-premises NCI cluster that meets all product requirements for Prism Central and NCM Intelligent Operations
- Fully supported and functional on-premises Prism Central instance

Note: For information on the requirements for configuring NCM Intelligent Operations, see Prism Central Installation or Upgrade in *Prism Central Infrastructure Guide* on the Nutanix Support Portal.

- Ability to resize Prism Central VM, if needed, to support chosen scenario
- Customer-provided Design document

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Cloud Manager (NCM)
- Hypervisor licenses for NCI

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Deployment
- As-built Guide
- Project Closeout

Duration

Typically up to 2 days for a single action pack

Related Products

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions that can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

FastTrack for NCM Intelligent Operations

Product Code: CNS-INF-FST-PC

At-a-Glance

Stage: Deploy

FastTrack for Nutanix Cloud Manager (NCM) Intelligent Operations accelerates the configuration of advanced analytics and intelligent insights into managing the Nutanix Cloud Platform (NCP) with in-depth expertise from highly skilled consultants. IT teams have a choice of available scenarios for on-premises sites. This offer is ideal for the Deploy stage of a Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with solid domain expertise and rich experience begin with an enablement session. After the enablement session, the consultant configures NCM Intelligent Operations and one of the available scenarios.

The service includes the following activities:

- Conduct an NCM Intelligent Operations enablement session
 - Demonstrate utilization forecasting and what-if analysis
 - Demonstrate VM right-sizing using X-Play
- Create custom reports
- Create custom dashboards
- Choose one of the following supported scenarios:
 - Assistance integrating with a custom remote API
 - Demonstrate SQL monitoring
 - Demonstrate external VMware vCenter monitoring

Limitations

- Limited to one Prism Central instance
- Creation of up to 3 custom reports
- Creation of up to 3 custom dashboards
- If integrating with a custom remote API, a maximum of 4 hours spent

Supported Hypervisors

- Nutanix AHV
- VMware ESXi
- Microsoft Hyper-V

Prerequisites

- Fully supported and functional on-premises NCI cluster that meets all product requirements for Prism Central and NCM Intelligent Operations
- Fully supported and functional on-premises Prism Central instance

Note: For information on the requirements for configuring NCM Intelligent Operations, see Prism Central Installation or Upgrade in *Prism Central Infrastructure Guide* on the Nutanix Support Portal.

- Ability to resize Prism Central VM, if needed, to support chosen scenario
- Ability to download and import Nutanix-provided VMs for demonstration purposes

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Cloud Manager (NCM)
- Hypervisor licenses for NCI

Deliverables

- Project Kickoff
- Project Status Report(s)
- Deployment
- As-built Guide
- Project Closeout

Duration

Typically up to 2 days, delivered remotely

Related Products

FastTrack for NCM Self-Service

Product Code: CNS-CAS-FST-CALM

At-a-Glance

Stage: Deploy

FastTrack for Nutanix Cloud Manager (NCM) Self-Service accelerates the deployment and configuration of NCM Self-Service, which streamlines how teams manage, deploy, and scale applications across hybrid clouds with self-service, automation, and centralized role-based governance, with expertise from highly skilled automation consultants. This offer is ideal for the Deploy stage of a Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with solid automation domain expertise and rich experience begin with an enablement session. After the enablement session, the consultant deploys and configures NCM Self-Service and imports and publishes an NCM Self-Service blueprint. Enablement sessions require collaboration with key stakeholders from virtualization, automation, and application teams.

The service includes the following activities:

- Conduct an enablement session introducing NCM Self-Service
 - Architectural overview and review of NCM Self-Service components
 - Overview of features and functions of NCM Self-Service
- Deploy and configure NCM Self-Service with one:
 - Project
 - Identity provider
 - Platform
- Import and publish one NCM Self-Service blueprint
 - Integrate Active Directory, including domain join and placement into a specific organizational unit (OU), static or dynamic IP addressing, DNS registration
 - Integrate an IPAM system (optional)
 - Demonstrate deployment of an NCM Self-Service Marketplace blueprint

Available Self-Service Blueprints

Guest OS:

- Windows Server 2019
- CentOS server 8.x
- RHEL server 8.x
- SLES 15.x
- Ubuntu server 20.x

Supported providers:

- Nutanix AHV
- VMware ESXi
- Microsoft Azure
- Amazon Web Services
- Google Cloud Platform

Limitations

- Enablement session limited to a maximum of ten participants
- Configuration limited to one project, identity provider, and platform
- Available identity providers include Active Directory, Open LDAP, or similar
- Imported Blueprints may include integration of one IPAM system: Prism, Infoblox, or BlueCat
- Blueprint deployment demonstration limited to 5 VMs from the published NCM Self-Service Marketplace

Supported Hypervisors

- Nutanix AHV
- VMware ESXi

Prerequisites

- Fully supported and functional on-premises NCI cluster that meets all product requirements for Prism Central and NCM Self-Service

Note: For information on the requirements for deploying NCM Self-Service, see Calm Prerequisites and Deployment in *Calm Administration and Operations Guide* on the Nutanix Support Portal.

- Fully supported and functional on-premises Prism Central instance

Note: For information on the requirements for configuring NCM Intelligent Operations, see *Prism Central Installation or Upgrade in Prism Central Infrastructure Guide* on the Nutanix Support Portal.

- Preconfigured provider accounts

Note: For information on configuring provider accounts, see Provider Accounts Setting in Calm in *Calm Administration and Operations Guide* on the Nutanix Support Portal.

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Cloud Manager (NCM) Pro or Ultimate
- Hypervisor licenses for NCI

Deliverables

- Project Kickoff
- Project Status Report(s)
- Deployment
- As-built Guide
- Project Closeout

Duration

Typically up to 3 days, delivered remotely

Related Products

FastTrack for NCM Cost Governance

Product Code: CNS-CAS-FST-NCM-CTG

At-a-Glance

Stage: Deploy

The FastTrack for Nutanix Cloud Management (NCM) Cost Governance accelerates the onboarding of deep visibility and rich analytics detailing cloud consumption patterns along with one-click cost optimization across cloud environments with expertise from highly skilled consultants. IT teams can choose to onboard on-premises Nutanix Cloud Infrastructure (NCI) clusters or a public cloud platform. This offer is ideal for the Deploy stage of a Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with solid domain expertise and rich experience begin with an enablement session. After the enablement session, the consultant onboards an on-premises NCI cluster or public cloud platform to NCM Cost Governance. Enablement sessions require collaboration from key stakeholders and teams responsible for gaining visibility into cloud spend.

The service includes the following activities:

- Conduct an enablement session introducing NCM Cost Governance
- Onboard on-premises NCI clusters or public cloud provider to NCM Cost Governance

Limitations

- Service includes cost governance functionality for one on-premises Nutanix environment and/or a single public cloud provider
- Cost configuration and custom reports are not included

Supported Hypervisors

- Nutanix AHV
- VMware ESXi
- Microsoft Hyper-V

Supported Public Cloud Platforms

- Amazon Web Services (AWS)
- Microsoft Azure
- Google Cloud Platform

Prerequisites

NCI Clusters

- Fully supported and functional on-premises NCI cluster(s) that meets all product requirements for Nutanix Cloud Infrastructure (NCI)

Note: For information on the requirements for NCI Clusters, see Field Installation Overview in the *Field Installation Guide* on the Nutanix Support Portal.

- Pulse must be enabled for on-premises NCI clusters

Note: For information on the requirements for enabling Pulse on NCI clusters, see Configuring Pulse in the *Prism Element Web Console Guide* on the Nutanix Support Portal.

Required Product Licenses

On-Premises NCI Clusters

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Cloud Manager (NCM) Pro or Ultimate
- Hypervisor licenses for NCI

NCM Software-as-a-Service for Supported Public Cloud Platforms

- Nutanix Cloud Manager (NCM) SaaS – Cost Governance

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Workshop
- Onboarding
- Project Closeout

Duration

Typically up to 1 day, delivered remotely

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions that can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

Automation Development Sprint Service

Product Code: CNS-CAS-A-SVC-ADS

At-a-Glance

Stage: Automate

With the Nutanix's Automation Development Sprint Service, Nutanix Automation experts collaborate with customer engineers, architects, and developers to create custom automation solutions utilizing Nutanix Cloud Manager or other automation solutions such as Terraform or Ansible. This offer is ideal for the Automate stage of a Hybrid Multicloud journey.

Service Scope

Highly skilled architects and consultants with solid automation domain expertise and rich experience provide automation development services in incremental 2-week agile sprints.

Each sprint's goals are established during a sprint planning session, followed by the sprint itself, where the development team focuses on working towards those goals for the remainder of the sprint. After the sprint, a sprint closeout is conducted to review what's been completed and to identify recommended next steps.

This service is offered in 3 editions to maximize productivity, depending on project size and complexity and the ability to perform parallel code development.

Starter Edition

The Starter Service is suited for a proof of concept, smaller projects, or augmenting established automation development teams already part of internal development sprints.

The Starter Edition focuses on code development and enhancements following the existing design documentation. The work is performed by a single Nutanix architect working with the customer's team.

Pro Edition

The Pro Service is suited for more extensive production projects or customers requiring deeper integration with their application, development, and engineering teams.

The Pro Edition provides an additional consultant that can accelerate development work. This larger team can provide technical oversight and general architectural guidance for the automation project.

Ultimate Edition

The Ultimate Service is suited for those benefitting from a comprehensive development team to accelerate code creation velocity while adhering to industry best practices. This service is especially valuable for customers who would like to enhance the capabilities of their infrastructure automation and development teams.

The Ultimate Edition provides an entire group of experienced architects and consultants collaborating to create automation development practices to deliver custom infrastructure as a service (IaaS) and infrastructure as code (IaC) solutions. The team provides high-level oversight from an architectural perspective and low-level, detail-oriented development work.

Limitations

- Quantity of sprints limited to the quantity specified at the time of purchase

Starter Edition

- Engagement includes a single Nutanix architect

Pro Edition

- Engagement includes a single Nutanix architect and 1 experienced consultant

Ultimate Edition

- Engagement includes a single Nutanix architect and 2 experienced consultants

Supported Automation Tools

- Nutanix Cloud Manager (NCM) Self-Service
- Terraform
- Ansible

Supported Target Provider Accounts

Provider accounts are cloud services, bare-metal, or existing machines used to deploy, monitor, and govern applications.

- Nutanix AHV
- VMware ESXi
- Amazon AWS
- Microsoft Azure
- Google GCP
- Kubernetes Platforms

Prerequisites

- Remote access to a preferred development environment, such as a virtual desktop or VPN

Note: Zoom, WebEx, and Microsoft Teams are not recommended

Nutanix Cloud Manager (NCM) Self-Service Automation Solution (On-premises Only)

- Fully supported and functional on-premises NCI cluster that meets all product requirements for Prism Central and NCM Self-Service

Note: For information on the requirements for deploying NCM Self-Service, see *Calm Prerequisites and Deployment* in *Calm Administration and Operations Guide* on the Nutanix Support Portal.

- Fully supported and functional on-premises Prism Central instance

Note: For information on the requirements for configuring NCM Intelligent Operations, see *Prism Central Installation or Upgrade* in *Prism Central Infrastructure Guide* on the Nutanix Support Portal.

Required Product Licenses

NCM Self-Service Automation Solutions

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Cloud Manager (NCM) Pro, Ultimate or SaaS
- Hypervisor licenses for NCI

Other Automation Solutions (Terraform and Ansible)

- Nutanix Cloud Infrastructure (NCI)
- Hypervisor licenses for NCI
- Public Cloud Platform subscriptions as needed

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Sprint Planning Session
- Solution Document for Sprint Output (Code, Blueprints, etc.)
- Updated Automation Solution Document at the End of a Sprint series
- Participation in an Agile Development Sprint
- Sprint Close Out
- Project Close Out

Duration

Edition	Resource	Hours	Description
Starter	Architect	80 (40 hours per week, 2 weeks)	Sprint Planning · Daily Scrums/Updates · Design Validation · Code Enhancements and Development · Weekly Update Calls · Sprint Close Out
Pro	Architect	80 (40 hours per week, 2 weeks)	Sprint Planning · Technical Oversight · Daily Scrums/Updates · Design Validation · Code Enhancements and Development · Weekly Update Calls · Sprint Close Out
	Sr Consultant	80 (40 hours per week, 2 weeks)	Daily Scrums/Updates · Code Enhancements and Development · Weekly Update Calls · Sprint Close Out
Ultimate	Architect	80 (40 hours per week, 2 weeks)	Sprint Planning · Technical Oversight · Daily Scrums/Updates · Design Validation · Code Enhancements and Development · Weekly Update Calls · Sprint Close Out
	Sr Consultant	80 (40 hours per week, 2 weeks)	Daily Scrums/Updates · Code Enhancements and Development · Weekly Update Calls · Sprint Close Out

Nutanix Database Service (NDB) Services

Database Transformation Strategy KickStart

Product Code: CNS-DAY0-KST-DB

At-a-Glance

Stage: Plan

The Database Transformation Strategy Kickstart offers database teams in-depth insights and practical guidance to archive a successful database transformation. This Kickstart workshop is ideal for the Plan stage of a Hybrid Multicloud journey and is suitable for transforming databases to meet evolving demands of modern applications.

Service Scope

Delivered by highly skilled consultants with solid database domain expertise and rich experience, the KickStart workshop begins with a discovery session to understand the operating environment and required outcomes. Critical areas identified during the discovery session are then addressed in a customized workshop.

Upon completion of this workshop, database teams will:

- Know the areas of consideration vital to achieving desired business outcomes from database transformation
- Understand and know how to resolve challenges that stall database transformations
- Be able to plan and drive an optimized and efficient database transformation model
- Learn how Nutanix Database Service (NDB) helps run databases in a cost-effective environment that meets business requirements

Potential workshop topics include but are not limited to the following:

- Learn how to free up critical database resources to perform higher-value work
- Explore opportunities to automate database provisioning and management of operational activities like patching, upgrading, and cloning databases
- Identify opportunities to optimize cost through standardization, reduction of sprawl, and simplification
- Develop efficient resourcing models to grow the database footprint without increasing the database team
- Construct a DBaaS strategy for running databases in both public and private clouds
- Learn valuable data protection strategies that increase recoverability while minimizing storage costs
- Understand recommended practices that optimize database performance

Limitations

- Transformation activities are not included in the workshop

Supported Databases

- Microsoft SQL Server
- Oracle
- PostgreSQL

Prerequisites

- Completed Database Questionnaire

Required Product Licenses

- None

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Workshop
- High-level Summary Presentation
- Project Closeout

Duration

Typically up to 2 hours, delivered remotely

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions, which can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

Database Recommended Practices

Product Code: CNS-DBM-A-WRK-NRP

At-a-Glance

Stage: Plan

Database Recommended Practices offers database teams in-depth insights into Nutanix recommended databases hosted on the Nutanix Cloud Platform (NCP). This offer is ideal for the Plan stage of a Hybrid Multicloud journey and is suitable for new and existing database workloads.

Service Scope

Delivered by highly skilled consultants with solid database domain expertise and rich experience, the workshop provides recommendations for designing, optimizing, and scaling database workloads on NCP. Database workshops require collaboration with key customer stakeholders from architecture, databases, and applications.

The service includes the following activities:

- Conduct a database recommended practices workshop
- Review current pain points and any previously created database vendor support tickets
- Discuss design and configuration considerations when architecting database solutions on NCP
- Provide an overview of Nutanix recommended practices for running database workloads in areas such as NCP Cluster configuration, database server virtual machines (VMs), and network and database configuration
- Discuss virtualization optimizations for the supported hypervisor in use

Limitations

- Each workshop covers one supported database listed below
- Design or migration planning is not included

Supported Databases

- Microsoft SQL Server
- Oracle
- PostgreSQL

Supported Hypervisors

- Nutanix AHV
- VMware ESXi

Prerequisites

- Completed Database Questionnaire
- Information on previously created database vendor support tickets

Required Product Licenses

- None

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Workshop
- High-level Summary Presentation
- Project Closeout

Duration

Typically up to 1 day, delivered remotely

Related Products

Database Planning and Assessment Workshop

Product Code: CNS-DBM-A-WRK-PAS-STD

At-a-Glance

Stage: Assess

The Database Planning and Assessment Workshop offers database teams an assessment of the current database environment with the essential knowledge and planning insights needed to successfully bring databases workloads onto the Nutanix Cloud Platform (NCP). This workshop is ideal for the Assess stage of the Hybrid Multicloud journey.

Service Scope

Delivered by highly skilled consultants with solid database domain expertise and rich experience, the workshop begins with a discovery session. Utilizing the completed questionnaire, the consultant guides the database team through a detailed review of existing infrastructure, database footprint, and associated SLAs. The consultant assesses database and server performance metrics, working closely with database teams to discover pain points and identify where most of their time is spent. Database workshops require collaboration with key customer stakeholders from architecture, virtualization, and database teams.

Upon completion of this workshop, database teams will:

- Recognize areas for database improvement based on an in-depth review of the current design, environment, and operational processes
- Understand recommendations for improving the performance, scalability, and efficiency of the database platform when using Nutanix-based solutions

The service includes the following activities:

- Discover pain points and collect data
- Assess and summarize the database environment in terms of its current health and architecture, with a focus on technical aspects and business requirements
- Review and apply relevant industry database recommended practices
- Document clear recommendations for improving the performance, manageability, and scalability of the database environment in alignment with Nutanix solutions
- Leverage documentation to review recommended practices and communicate current infrastructure and database concerns to business stakeholders
- Discuss Nutanix-based solution migrating operational efficiency and performance

Limitations

- Each workshop covers one supported database listed below
- Quantity of databases limited to the quantity specified at the time of purchase
- Deployment and migration are not included in the workshop

Supported Databases

- Microsoft SQL Server
- Oracle
- PostgreSQL

Prerequisites

- Completed Database Configuration Worksheet

Required Product Licenses

- None

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Workshop
- Assessment Report
- Project Closeout

Duration

Typically up to 3 days for the initial database, plus 4 hours for each additional database

Database Design Workshop

Product Code: CNS-DBM-A-WRK-DES-STD

At-a-Glance

Stage: Design

The Database Design Workshop provides invaluable support to database teams by offer in-depth and practical guidance for creating a robust and comprehensive design tailored explicitly for running databases on Nutanix Cloud Infrastructure (NCI) clusters or Nutanix Cloud Clusters (NC2).

This workshop covers critical aspects, including capacity planning, performance optimization, security considerations, and ensuring high availability. The workshop proves particularly beneficial during the Design stage of a Hybrid Multicloud journey, especially for complex database solutions such as Database-as-a-Service (DBaaS). By leveraging the expertise gained from the workshop, database teams can ensure an optimized and well-architected database environment, enhancing performance, security, and overall operational efficiency.

Service Scope

Highly skilled consultants with strong database domain expertise and rich experience begin with assessing the existing database environment and understanding capacity, performance, security, and availability requirements. After the design workshop, the consultant develops a Database Design document and Configuration workbook that addresses conceptual, logical, and physical database design elements. It also details requirements, constraints, assumptions, design decisions, identified risks, and mitigations. Database workshops require collaboration with key customer stakeholders from architecture, databases, and applications.

The service includes the following activities:

- Conduct a database design workshop:
 - Discuss the design goals and gather business and technical requirements, including risks, constraints, and assumptions
 - Review and validate requirements against existing NCI or NC2 cluster(s)
- Create a database design addressing requirements identified during the workshop, including:
 - NCI or NC2 cluster and database virtual machine (VM) sizing
 - NCI or NC2 cluster design, if applicable
 - Network requirements
 - Security
 - Data protection
 - Availability
 - Recoverability
- Ensure that the design includes recommended practices for both infrastructure and database engine

Limitations

- Each workshop covers up to 5 databases for one supported database listed below

Supported Databases

- Microsoft SQL Server
- Oracle
- PostgreSQL

Supported Hypervisors

- Nutanix AHV
- VMware ESXi

Prerequisites

- Completed Database Configuration Worksheet
- Existing database and database VM performance metrics

Required Product Licenses

- None

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Workshop
- Design Presentation
- Design Document
- Project Closeout

Duration

Typically up to 3 days

NDB Deployment and Database Migration - Starter Edition

Product Code: CNS-DBM-STR-STD

At-a-Glance

Stage: Deploy and Migrate

The Nutanix Database Services (NDB) Deployment and Database Migration Starter Edition offers database teams in-depth and practical guidance to create a comprehensive database migration plan for migrating databases to the Nutanix Cloud Platform (NCP). Additionally, highly skilled consultants migrate the databases and deploy and configure NDB. This offer benefits the Deploy and Migrate stages of a Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with solid database domain expertise and rich experience begin with a database migration planning workshop. After the migration workshop, the consultant develops a Migration Plan document and migrates the databases. The consultant then deploys and configures NDB and demonstrates database lifecycle management with NDB. Database workshops require collaboration with key customer stakeholders from architecture, virtualization, and database teams.

The Starter Edition includes the following activities:

Database Migration Planning and Migration

- Conduct a database migration planning workshop
- Create database migration plan and rollback options
- Deploy a database virtual machine (VM) and an empty database
- Validate source and target database(s)
- Migrate database(s)
- Validate the migrated database(s)

Database Reference VM Creation

- Collect Reference VM details
- Build Reference VM to meet NDB requirements
- Discuss recommended practices implemented in the Reference VM

NDB Deployment

- Conduct an architectural overview and review of NCI and NDB components
- Review NDB features and functionality
- Deploy and configure NDB
- Demonstrate the use of NDB based on the use case

Limitations

- Database migration is limited to 2 databases of the same supported database listed below or 2 TiB of total database size in a single migration wave
- Database Reference VM creation is limited to a single Reference VM of one of the supported databases listed below
- NDB deployment is limited to a single NCI or NC2 cluster

Supported Databases

- Microsoft SQL Server
- Oracle
- PostgreSQL

Supported Hypervisors

- Nutanix AHV
- VMware ESXi

Prerequisites

- Fully supported and functional on-premises NCI cluster or Nutanix Cloud Clusters (NC2) that meets all product requirements

Note: For information on the requirements for NCI Clusters, see Field Installation Overview in the *Field Installation Guide* on the Nutanix Support Portal.

- Completed Database Configuration Worksheet
- Template VM for a supported database type

Note: For information on the supported AOS, AHV, and vSphere software versions for NDB, see NDB Software Compatibility with Nutanix and VMware Product in *Nutanix Database Service Release Notes* on the Nutanix Support Portal.

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Database Services (NDB)
- Hypervisor licenses for NCI
- Database software licenses for target databases

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Migration Procedure
- Migration Summary
- Deployment

- Workshop
- Migration Plan
- As-built Guide
- Project Closeout

Duration

Typically up to 9 days, delivered remotely

Related Products

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions, which can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

FastTrack for NDB

Product Code: CNS-DBM-FST-ERA

At-a-Glance

Stage: Deploy

FastTrack for Nutanix Database Service (NDB) accelerates the deployment of NDB, simplifying database management and speeding up software development across clouds. Database teams can deploy NDB on an on-premises Nutanix Cloud Infrastructure (NCI) cluster or Nutanix Cloud Clusters (NC2). Additionally, highly skilled consultants create a Database Reference VM for one of the supported databases. This offer is ideal for the Deploy stage of a Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with solid database domain expertise and rich experience begin with creating a Database Reference virtual machine (VM). After creating the VM, the consultant installs and configures NDB and demonstrates database lifecycle management with NDB.

The service includes the following activities:

Database Reference VM Creation

- Collect Reference VM details
- Build Reference VM to meet NDB requirements
- Discuss recommended practices implemented in the Reference VM

NDB Deployment

- Conduct an architectural overview and review of NCI and NDB components
- Review NDB features and functionality
- Deploy and configure NDB
- Demonstrate the use of NDB based on the use case

Limitations

- Database Reference VM creation is limited to a single Reference VM of one of the supported databases listed below
- NDB deployment is limited to a single NCI or NC2 cluster

Supported Databases

- Microsoft SQL Server
- Oracle
- PostgreSQL

Supported Hypervisors

- Nutanix AHV
- VMware ESXi

Prerequisites

- Fully supported and functional on-premises NCI cluster or Nutanix Cloud Clusters (NC2) that meets all product requirements

Note: For information on the requirements for NCI Clusters, see Field Installation Overview in the *Field Installation Guide* on the Nutanix Support Portal.

- Completed Database Configuration Worksheet

Note: For information on the supported AOS, AHV, and vSphere software versions for NDB, see NDB Software Compatibility with Nutanix and VMware Product in *Nutanix Database Service Release Notes* on the Nutanix Support Portal.

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Database Services (NDB)
- Hypervisor licenses for NCI
- Database software licenses for databases

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Deployment
- As-built Guide
- Project Closeout

Duration

Typically up to 4 days, delivered remotely

Related Products

NDB Deployment

Product Code: CNS-DBM-A-SVC-EDP-STD

At-a-Glance

Stage: Deploy

Nutanix Database Service (NDB) Deployment accelerates the deployment of NDB, simplifying database management and speeding up software development across clouds. Database teams can deploy NDB on an on-premises Nutanix Cloud Infrastructure (NCI) cluster or Nutanix Cloud Clusters (NC2). Additionally, highly skilled consultants create a Database Reference VM for one of the supported databases. This offer is ideal for the Deploy stage of a Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with solid database domain expertise and rich experience begin with creating a Database Reference virtual machine (VM). After creating the VM, the consultant installs and configures NDB and demonstrates database lifecycle management with NDB.

The service includes the following activities:

Database Reference VM Creation

- Collect Reference VM details
- Build Reference VM to meet NDB requirements
- Discuss recommended practices implemented in the Reference VM

NDB Deployment

- Conduct an architectural overview and review of NCI and NDB components
- Review NDB features and functionality
- Deploy and configure NDB
- Demonstrate the use of NDB based on the use case

Limitations

- Database Reference VM creation is limited to a single Reference VM of one of the supported databases listed below
- NDB deployment is limited to a single NCI or NC2 cluster

Supported Databases

- Microsoft SQL Server
- Oracle
- PostgreSQL

Supported Hypervisors

- Nutanix AHV
- VMware ESXi

Prerequisites

- Fully supported and functional on-premises NCI cluster or Nutanix Cloud Clusters (NC2) that meets all product requirements

Note: For information on the requirements for NCI Clusters, see Field Installation Overview in the *Field Installation Guide* on the Nutanix Support Portal.

- Completed Database Configuration Worksheet

Note: For information on the supported AOS, AHV, and vSphere software versions for NDB, see NDB Software Compatibility with Nutanix and VMware Product in *Nutanix Database Service Release Notes* on the Nutanix Support Portal.

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Database Services (NDB)
- Hypervisor licenses for NCI
- Database software licenses for databases

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Deployment
- As-built Guide
- Project Closeout

Duration

Typically up to 4 days, delivered remotely

NDB Expansion

Product Code: CNS-DBM-A-NDB-EXP

At-a-Glance

Phase: Deploy

Nutanix Database Service (NDB) expansion accelerates the expansion of NDB by enabling the NDB multicluster option for managing the database lifecycle across an additional Nutanix Cloud Infrastructure (NCI) or Nutanix Cloud Clusters (NC2) cluster. This offer is ideal for the Deploy stage of a Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with solid database domain expertise and rich experience begin with evaluating the existing NDB deployment. After the evaluation, the consultant enables the NDB multicluster option to manage the database lifecycle across an additional NCI or NC2 cluster.

The service includes the following activities:

- Review the existing NDB instance's current state and configuration
- Enable NDB multicluster support
- Register an additional cluster with NDB
- Synchronize an existing software profile or create one new software profile from an existing database virtual machine (VM) running on the new cluster
- Demonstrate NDB multicluster database deployment
- Configure and demonstrate database protection across multiple clusters using NDB Time Machine construct

Limitations

- Expansion is limited to a single NCI or NC2 cluster expansion in a single site
- Includes synchronizing a single existing software profile or creating a single new software profile

Supported Databases

- Microsoft SQL Server
- Oracle
- PostgreSQL

Supported Hypervisors

- Nutanix AHV
- VMware ESXi

Prerequisites

- Fully supported and functional on-premises NCI cluster or NC2 that meets all product requirements
- A fully functional NDB Instance
- For a new software profile creation, a template VM for a supported database type

Note: For information on the supported AOS, AHV, and vSphere software versions for NDB, see NDB Software Compatibility with Nutanix and VMware Product in Nutanix Database Service Release Notes on the Nutanix Support Portal.

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Database Services (NDB)
- Database software licenses for target databases

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Expansion
- As-built Guide
- Project Closeout

Duration

Typically up to 3 days, delivered remotely

Related Products

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions that can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

NDB Database Patching

Product Code: CNS-DBM-A-SVC-PAT-STD

At-a-Glance

Stage: Deploy

Nutanix Database Service (NDB) Database Patching accelerates the deployment of NDB patching, which speeds the rollout of security patches across some or all the databases managed by NDB. This offer is ideal for the Deploy stage of a Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with solid database domain expertise and rich experience begin manually patching a database VM to create a software profile version. The consultant then demonstrates how to patch one non-production database VM.

The service includes the following activities:

- Collect information for existing Nutanix Cloud Infrastructure (NCI) cluster or Nutanix Cloud Clusters (NC2) and database server VMs registered to NDB
- Review NDB patching feature compatibility with the supported database type
- Verification of existing NDB instance
- Manually patch an existing database VM
- Create a new NDB software profile version
- Demonstrate how to apply the database patch to one non-production database VM

Limitations

- Limited to one NDB instance and one of the supported databases listed below
- NDB software profile version is limited to 1 existing profile
- NDB patching demonstration is limited to one non-production database

Supported Databases

- Microsoft SQL Server
- Oracle
- PostgreSQL

Supported Hypervisors

- Nutanix AHV
- VMware ESXi

Prerequisites

- Fully supported and functional on-premises NCI cluster or Nutanix Cloud Clusters (NC2) that meets all product requirements

Note: For information on the requirements for NCI Clusters, see Field Installation Overview in the *Field Installation Guide* on the Nutanix Support Portal.

- Fully supported and functional NDB instance

Note: For information on the supported AOS, AHV, and vSphere software versions for NDB, see NDB Software Compatibility with Nutanix and VMware Product in *Nutanix Database Service Release Notes* on the Nutanix Support Portal.

- One non-production database
- Existing NDB software profile
- Database patch from database vendor is accessible and available for use

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Database Services (NDB)
- Hypervisor licenses for NCI
- Database software licenses

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Deployment
- As-built Guide
- Project Closeout

Duration

Typically up to 2 days, delivered remotely

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions, which can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

NDB Database Cloning

Product Code: CNS-DBM-A-SVC-ARC-STD

At-a-Glance

Stage: Deploy

Nutanix Database Service (NDB) Database Cloning offers database teams in-depth and practical guidance to create a comprehensive database cloning solution to protect and copy databases running on the Nutanix Cloud Platform and managed by NDB. NDB creates and refreshes clones to a point-in-time either by using database transaction logs or by using snapshots. Clones are created and refreshed to point-in-time in minutes, accelerating clone and refresh operations. This offer benefits the Deploy stage of a Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with solid database domain expertise and rich experience begin with an enablement session providing an overview of how to define service-level agreements (SLAs) in NDB and how to apply those SLAs to databases through the NDB Time Machine. NDB Time Machine leverages the Nutanix time-efficient snapshots to create database clones. These database clones are highly space-efficient, consuming near-zero bytes with only the further writes constituting its size, significantly lowering the cost of managing multiple copies of databases. After the enablement session, the consultant configures and demonstrates NDB Time Machine and copy data management (CDM) for database cloning. Enablement sessions require collaboration with key stakeholders from database and backup teams.

The service includes the following activities:

- Conduct an enablement session introducing NDB Time Machine and Cloning
 - Provide an overview of the backup architecture of the supported database and how NDB SLA constructs are based on backup policies
 - Explain the significance of the NDB Time Machine in defining backup policies
 - Explain how to configure SLAs in terms of backup and retention
 - Understand backup and recovery requirements and define SLA policies
 - Explain database backup management using SLAs
 - Snapshot frequency based on the defined RPO and RTO
 - Log catch-up requirement
- Demonstrate database protection and restoration from Time Machine
- Configure NDB CDM for one of the supported databases listed below
- Demonstrate NDB CDM options for creating clones, including:
 - Schedule
 - Refresh
 - Pre/post command execution

Limitations

- Cloning is limited to one NDB instance and one supported database listed below
- Definition of SLAs limited to 2 SLA profiles based on business requirements
- Demonstrations limited to 1 non-production database VM

Supported Databases

- Microsoft SQL Server
- Oracle
- PostgreSQL

Supported Hypervisors

- Nutanix AHV
- VMware ESXi

Prerequisites

- Fully supported and functional on-premises NCI cluster or Nutanix Cloud Clusters (NC2) that meets all product requirements

Note: For information on the requirements for NCI Clusters, see Field Installation Overview in the *Field Installation Guide* on the Nutanix Support Portal.

- Fully supported and functional NDB instance

Note: For information on the supported AOS, AHV, and vSphere software versions for NDB, see *NDB Software Compatibility with Nutanix and VMware Product in Nutanix Database Service Release Notes* on the Nutanix Support Portal.

- One non-production database
- Existing database Time Machine for cloning

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Database Services (NDB)
- Hypervisor licenses for NCI
- Database software licenses

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Deployment
- As-built Guide
- Project Closeout

Duration

Typically up to 2 days, delivered remotely

Database Migration Planning Workshop

Product Code: CNS-DBM-A-WRK-MIG-STD

At-a-Glance

Stage: Migrate

The Database Migration Planning Workshop offers database teams in-depth and practical guidance to create a comprehensive database migration plan for migrating databases to the Nutanix Cloud Platform (NCP). Additionally, highly skilled consultants migrate a test database. This offer benefits the Migrate stage of a Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with solid database domain expertise and rich experience begin with a discovery session that collects availability requirements, current and desired database versions, application dependencies, and maintenance windows. The consultant then conducts a workshop based on the discussions undertaken during the discovery session and creates a migration plan. Migration of a test database is also performed. Database workshops require collaboration with key customer stakeholders from architecture, virtualization, and database teams.

The service includes the following activities:

- Conduct a database migration discovery session:
 - Discuss migration goals such as availability requirements, current and desired database versions, application dependencies, and maintenance windows.
- Conduct database migration workshop:
 - Discuss migration options and constraints for each migration method based on the database versions, operating system, and application availability
 - Review database sizing and performance requirements
- Create database migration plan and rollback options
- Conduct migration of a test database to NCP

Limitations

- Database migration planning is limited to 5 of one of the supported databases listed below
- Database migration is limited to one of the supported databases listed below and one test database of 200 GB of total database size

Supported Databases

- Microsoft SQL Server
- Oracle
- PostgreSQL

Supported Hypervisors

- Nutanix AHV
- VMware ESXi

Prerequisites

- Fully supported and functional on-premises NCI cluster or Nutanix Cloud Clusters (NC2) that meets all product requirements

Note: For information on the requirements for NCI Clusters, see Field Installation Overview in the Field Installation Guide on the Nutanix Support Portal.

- Completed Database Configuration Worksheet
- Template VM for a supported database type

Note: For information on the supported AOS, AHV, and vSphere software versions for NDB, see NDB Software Compatibility with Nutanix and VMware Product in *Nutanix Database Service Release Notes* on the Nutanix Support Portal.

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Database Services (NDB)
- Database software licenses for target databases

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Workshop
- Migration Plan
- Migration Summary
- Project Closeout

Duration

Typically up to 3 days

Related Products

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Cloud Clusters (NC2)
- Nutanix Database Service (NDB)

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions, which can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

Database Migration

Product Code: CNS-DBM-A-MIG

At-a-Glance

Stage: Migrate

Database Migration offers database teams strong database domain expertise to migrate database workloads to the Nutanix Cloud Platform (NCP). This offer is ideal for the Migrate state of a Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with strong database domain expertise and rich experience begin with validating the customer-provided migration plan to ensure the database migration requirements and rollback options are valid. The consultant then migrates the database(s) according to the migration plan.

The service includes the following activities:

- Validate database migration plan and rollback options
- Validate source and target database(s)
- Migrate the database(s) based on the migration plan
- Validate migrated database data and application connectivity after migration

Limitations

- Migration planning is not included
- Quantity of databases and total database TiB limited to the quantity specified at the time of purchase
- Minimum of 3 databases per migration wave is required
- Performance validation after the migration is not included but is available as a separate custom statement of work (SOW)

Supported Databases

- Microsoft SQL Server
- Oracle
- PostgreSQL

Supported Hypervisors

- Nutanix AHV
- VMware ESXi

Prerequisites

- Customer-provided database migration plan
- Fully supported and functional on-premises NCI cluster or Nutanix Cloud Clusters (NC2) that meets all product requirements

Note: For information on the requirements for NCI Clusters, see Field Installation Overview in the *Field Installation Guide* on the Nutanix Support Portal.

- Completed Database Configuration Worksheet
- Target database VMs running on NCI or NC2 cluster

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI)
- Hypervisor licenses for NCI
- Database software licenses for target databases

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Migration
- Migration Procedure
- Migration Summary
- Project Closeout

Duration

Typically 5 days per 2 databases or 2 TiB size, plus 12 hours for each additional database or 1 TiB

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions, which can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

Database FitCheck

Product Code: CNS-DBM-A-SVC-FIT

At-a-Glance

Stage: Optimize

The Database FitCheck offers database teams in-depth and practical guidance to identify potential performance issues, misconfiguration, and recommended practices for databases running on Nutanix Cloud Infrastructure (NCI) clusters or Nutanix Cloud Clusters (NC2). The offer proves potentially beneficial during the Optimize stage of a Hybrid Multicloud journey, especially for complex database solutions such as Database-as-a-Service (DBaaS). By leveraging the insights gained from performing the FitCheck, database teams can ensure an optimized and high-performing database environment.

Service Scope

A series of workshops are delivered by highly skilled consultants with strong database domain expertise and rich experience to evaluate existing supported databases deployed on a single on-premises NCI cluster or NC2 according to Nutanix recommended practices. After the assessment, the consultant creates a customized Findings Report with the current configuration of the databases and recommended remediations.

The service includes the following activities:

- Discover pain points and collect data on previous and existing support tickets
- Conduct a series of workshops with key customer stakeholders and subject matter experts (SMEs) to review recommended practices in various layers of the full technology stack, including NCI/NC2, hypervisor, and database
- Assess the current full-stack deployment in terms of configuration, operations, and usage
- Review the environment post-deployment to confirm a supported configuration that is aligned with Nutanix recommended practices
- Provide clear recommendations to improve the performance, manageability, and scalability of the database environment
- Serve as a reference to review recommended practices and communicate current infrastructure and database issues to stakeholders

Limitations

- Each FitCheck covers one NCI or NC2 cluster and one supported database listed below
- Quantity of databases limited to the quantity specified at the time of purchase
- Remediation of identified issues is not included but is available as a custom statement of work (SOW)

Supported Databases

- Microsoft SQL Server
- Oracle

- PostgreSQL

Supported Hypervisors

- Nutanix AHV
- VMware ESXi

Prerequisites

- Supported and functional on-premises NCI cluster or NC2

Note: For information on the requirements for NCI Clusters, see Field Installation Overview in the *Field Installation Guide* on the Nutanix Support Portal.

- Completed Database Configuration Worksheet
- Customer-provided database and database virtual machine (VM) performance metrics

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI)
- Hypervisor licenses for NCI
- Database software licenses

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- As-built Guide(s)
- FitCheck Findings Presentation (optional)
- FitCheck Report
- Project Closeout

Duration

Typically up to 3-1/2-days for the first database and 6 hours for each additional database

Related Products

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Cloud Clusters (NC2)
- Nutanix Database Service (NDB)

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions, which can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

End User Computing (EUC) Services

EUC Discovery and Assessment Workshop

Product Code: CNS-EUC-A-WRK-TXF-STD

At-a-Glance

Stage: Assess

The End User Computing (EUC) Discovery and Assessment Workshop offers IT teams an assessment of the current EUC environment with the essential knowledge and planning insights needed to successfully bring existing physical or virtual desktop inventory to the Nutanix Cloud Platform (NCP). This workshop provides a tool-based data collection effort and assessment to classify users, applications, and workstations. This workshop is ideal for the Assess stage of the Hybrid Multicloud journey.

Service Scope

Delivered by highly skilled consultants with solid domain expertise and rich experience, the workshop begins with a discovery session. The consultant deploys the collection tool. Upon completion of the data collection, the consultant delivers a comprehensive analysis and current state assessment to ensure that resource and use case requirements are identified. This assessment supports a detailed, accurate design for a future state desktop and virtualization architecture using the Nutanix EUC Broker Design service.

The service includes the following activities:

- Conduct a discovery and collection session:
 - Assess the current state of systems, applications, and users
 - Deploy collection tool infrastructure
 - Assist with the deployment of collection agents
- Upon completion of the data collection period, conduct a current state assessment
 - Group users into categories/use cases to support desktop environment design
 - Assess application requirements for CPU, memory, GPU, network, and disk
 - Assess user and use case requirements for CPU, memory, GPU, network, and disk
 - Assess the use of peripherals, printing, and communications software
 - Assess network configuration impacts and requirements
 - Develop specifications for endpoint hardware, VMs, and software required for each use case

Limitations

- Assessment limited to a maximum of 500 individual systems or users
- EUC Broker design, deployment, and migration are not included

Supported Collection Tools

- Liquidware Stratusphere UX

Supported EUC Brokers

- Citrix Virtual Apps and Desktops
- Citrix DaaS
- VMware Horizon
- Dizzion Frame

Prerequisites

- Completed EUC Discovery Configuration Worksheet
- Ability and capacity to install collection tool agent software in existing EUC environment for data collection
- Data collection period of 2 weeks minimum required, maximum 30 days

Required Product Licenses

- Collection Tool licensing is supplied, but use is limited to the scope defined above
- Additional agents or data collection period requires additional Collection Tool license purchase

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Data Collection
- Workshop
- Findings Report
- Project Closeout

Duration

Typically 5 days plus data collection (up to 30 days)

Related Products

- End User Computing (EUC)

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions that can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

EUC Gold Image Creation

Product Code: CNS-EUC-A-SVC-IMG-STD

At-a-Glance

Stage: Deploy

End User Computing (EUC) Gold Image Creation accelerates the creation of Gold Images for consumption by an application or desktop virtualization solution with expertise from highly skilled consultants. EUC teams have a choice of creating Gold Images for a variety of supported EUC Brokers. This offer is ideal for the Deploy stage of the Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with solid domain expertise and rich experience create the Gold Image according to Nutanix recommended practices and the customer-provided design document and use case documentation for consumption by an application or desktop virtualization solution.

The service includes the following activities:

- Configure the base Gold Image
- Install supported base Windows Server or desktop operating system (OS)
- Install hypervisor guest agents and drivers
- Install applications into the image. Applications may include anti-virus and security agents
- Configure anti-virus and security agents according to recommended practices
- Apply recommended OS and application optimizations
- Install NVIDIA GRID drivers (optional)
- Install EUC vendor management agent(s) per existing design
- Configure a Citrix machine catalog, VMware desktop pool, or Frame account within the broker infrastructure based on the new image
- Configure Active Directory Group Policy Objects (GPO) and standard profile configuration specific to the use case for the Gold Image
 - Configure policies for Citrix Profile Management
 - Configure policies for VMware Persona
 - Configure policies for Folder Redirection
 - Enable Frame Enterprise Profiles on the account
- Validate the image and application launch functionality

Limitations

- For each quantity purchased, deployment is limited to 1 Gold Image
- Limited to up to 5 applications
- Citrix Workplace Environment Management (WEM) agent configuration not included
- VMware Dynamic Environment Manager (DEM) / Persona agent configuration not included

Supported EUC Brokers

- Citrix Virtual Apps and Desktops
- Citrix DaaS
- VMware Horizon
- Dizzion Frame

Prerequisites

- Fully supported and functional on-premises NCI cluster or Nutanix Cloud Clusters (NC2) that meets all product requirements

Note: For information on the requirements for NCI Clusters, see Field Installation Overview in the *Field Installation Guide* on the Nutanix Support Portal.

- Fully supported and functional EUC Broker environment that meets all product requirements
- Customer-provided Design Document
- Completed Software and Gold Image Questionnaire

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI)
- Hypervisor licenses for NCI
- EUC Broker licensing
- Software licenses for Gold Image

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Deployment
- Project Closeout

Duration

Typically 2 days per Gold Image

Related Products

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Cloud Clusters (NC2)
- End User Computing (EUC)

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. This service offer is subject to the Nutanix Services General Terms and Conditions that can be viewed at <https://www.nutanix.com/support-services/consulting-services/terms-and-conditions>

EUC User Data Migration

Product Code: CNS-EUC-A-SVC-MIG-USR

At-a-Glance

Stage: Migrate

End User Computing (EUC) User Data Migration offers IT teams strong domain expertise to migrate EUC users and their data to the Nutanix Cloud Platform per the customer-provided migration plan. This offer is ideal for the Migrate stage of a Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with strong domain expertise and rich experience begin with validating the customer-provided migration plan to ensure the migration requirements EUC user data and the post-migration validation plan are accurate. According to the migration plan, the consultant then migrates the users and their associated data from existing physical or virtual desktop environments.

The service includes the following activities:

- Validate EUC user data migration requirements and validation plan
- Deploy migration tools as required according to the migration plan
- Configure Active Directory and storage infrastructure settings as required
- Migrate the EUC workloads and Gold Images based on the migration plan
- Monitor the migration process via periodic touchpoints
- Remediate identified migration issues
- Execute the existing post-migration validation plan

Limitations

- Migration planning is not included
- For each pack purchased, migration is limited to 5 individual users with up to 50 GB of data per user or a configuration of up to 5 Group Policy Objects (GPO-based) policies to support automated migration
 - Migration must occur as a single contiguous migration wave
- Larger environments can be accommodated via a custom statement of work (SOW)

Supported EUC Brokers

- Citrix Virtual Apps and Desktops
- Citrix DaaS
- VMware Horizon
- Dizzion Frame

Prerequisites

- Customer-provided EUC migration plan including VMs targeted for migration
- Fully supported and functioning source environment hosting EUC user data
- Fully supported and functional on-premises NCI cluster or Nutanix Cloud Clusters (NC2) that meets all product requirements

Note: For information on the requirements for NCI Clusters, see Field Installation Overview in the *Field Installation Guide* on the Nutanix Support Portal.

- Fully supported and functional EUC Broker environment that meets all product requirements
- Operating systems are supported by NCI, EUC Broker, and the migration tool

Note: For information on the supported guest operating systems, see *Nutanix Compatibility and Interoperability Matrix* on the Nutanix Support Portal.

- EUC and application subject matter experts (SME) available during the migration

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI)
- Hypervisor licenses for NCI
- EUC Broker licensing
- Migration tools licensing

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Migration
- Migration Procedure
- Migration Summary
- Project Closeout

Duration

Typically, 2 days per 5-policy pack or 5 individual users (of up to 50GB)

Related Products

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Cloud Clusters (NC2)
- End User Computing (EUC)

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. EUC Workload and Gold Image Migration

Product Code: CNS-EUC-A-SVC-MIG-V2V

At-a-Glance

Stage: Migrate

End User Computing (EUC) Workload and Gold Image Migration offers IT teams strong domain expertise to migrate desktop or remote desktop service host (RDSH) VM workloads to the Nutanix Cloud Platform per the customer-provided migration plan. Workloads include both persistent virtual desktops and existing Gold Images. This offer is ideal for the Migrate stage of a Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with strong domain expertise and rich experience begin with validating the customer-provided migration plan to ensure the migration requirements EUC workloads and the post-migration validation plan are accurate. The consultant then migrates the EUC workloads according to the migration plan.

The service includes the following activities:

- Validate EUC workload and Gold Image migration requirements and validation plan
- Deploy migration tools as required according to the migration plan
- Configure Active Directory and storage infrastructure settings as required
- Migrate the EUC workloads and Gold Images based on the migration plan
- Integrate migrated workloads into the target EUC broker infrastructure
- Monitor the migration process via periodic touchpoints
- Remediate identified migration issues
- Execute the existing post-migration validation plan

Limitations

- Migration planning is not included
- For each pack purchased, migration is limited to up to 5 VMs or up to 2.5TB of total data
 - Migration must occur as a single contiguous migration wave
- Larger environments can be accommodated via a custom statement of work (SOW)

Supported EUC Brokers

- Citrix Virtual Apps and Desktops
- Citrix DaaS
- VMware Horizon
- Dizzion Frame

Prerequisites

- Customer-provided EUC migration plan including VMs targeted for migration
- Fully supported and functioning source environment hosting EUC VMs
- Fully supported and functional on-premises NCI cluster or Nutanix Cloud Clusters (NC2) that meets all product requirements

Note: For information on the requirements for NCI Clusters, see Field Installation Overview in the *Field Installation Guide* on the Nutanix Support Portal.

- Fully supported and functional EUC Broker environment that meets all product requirements
- Operating systems are supported by NCI, EUC Broker, and the migration tool

Note: For information on the supported guest operating systems, see *Nutanix Compatibility and Interoperability Matrix* on the Nutanix Support Portal.

- EUC and application subject matter experts (SME) available during the migration

Required Product Licenses

- Nutanix Cloud Infrastructure (NCI)
- Hypervisor licenses for NCI
- EUC Broker licensing
- Migration tools licensing

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Migration
- Migration Procedure
- Migration Summary
- Project Closeout

Duration

Typically 2 days per 5 VMs or up to 2.5TB of total data

Related Products

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Cloud Clusters (NC2)
- End User Computing (EUC)

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. EUC Migration Workshop

Product Code: CNS-EUC-A-WRK-MIG-STD

At-a-Glance

Stage: Migrate

The End User Computing (EUC) Migration Workshop offers EUC teams in-depth and practical guidance to create a comprehensive migration plan for migrating existing EUC application and desktop virtualization environment to the Nutanix Cloud Platform (NCP). This offer is ideal for the Migrate state of a Hybrid Multicloud journey.

Service Scope

Highly skilled consultants with solid domain expertise and rich experience begin with a discovery session that collects migration requirements, dependencies, and maintenance windows. The consultant then conducts a workshop based on the discussions during the discovery session and creates a migration plan.

The service includes the following activities:

- Conduct a EUC migration discovery session:
 - Gather and document migration requirements, constraints, assumptions, dependencies, and decisions for the migration effort
 - Assess the current state of systems and users to be migrated
- Conduct EUC migration workshop:
 - Review options for migrating existing
 - EUC broker infrastructure
 - Virtual and physical desktops
 - Gold Images
 - User profiles and data
 - Assess network configuration impacts and requirements
 - Develop a migration plan and process, rollback plans, and migration wave(s)
 - Develop a post-migration validation plan

Limitations

- Limited to migration planning for 1 existing EUC environment in 1 physical site. Larger environments can be accommodated via a custom statement of work (SOW)

Supported EUC Brokers

- Citrix Virtual Apps and Desktops
- Citrix DaaS
- VMware Horizon
- Dizzion Frame

Prerequisites

- None

Required Product Licenses

- None

Deliverables

- Project Kickoff
- Project Schedule
- Project Status Report(s)
- Workshop
- Project Closeout

Note: This offer is available with several documentation options, defined here <https://www.nutanix.com/support-services/consulting-services/documentation-tiers>

Duration

Typically 4 days

Related Products

- Nutanix Cloud Infrastructure (NCI)
- Nutanix Cloud Clusters (NC2)
- End User Computing (EUC)

Terms and Conditions

This document contains the entire scope of the service offer. Anything not explicitly included above is out of scope. Flexible Credits

Flexible Credits

Product Code: FLEX-CST-CR

At-a-Glance

Stage: All

Nutanix Flex Credits provide a credits program for purchasing Nutanix Professional Services. This program provides the flexibility to utilize your budget cycles to pre-buy credits for future use of Nutanix Professional Services and training via redemption of credits. Within the terms of validity of your Flex Credits, use the credits for the portfolio of Nutanix Professional Services including Consulting, Resident, Technical Account Manager, and Education.

Service Scope

Purchase Flex Credits globally and apply them to the following types of Nutanix Professional Services:

- Pre-defined Consulting
- Custom Consulting
- Residents
- Technical Account Managers
- Education classes, including certification
- Any future services released by Nutanix Professional Services within the redemption window

Purchase credits, valued at \$100 USD per credit, from Nutanix authorized resellers or distributors.

Flex Credit Redemption

Please send a request to flexcredits@nutanix.com and include contact information, business, reason for the request, and purchase order number, if known.

Flex Credit Terms and Conditions

- Flex Credits expire 12 months from the purchase date and are non-refundable.
- Flex Credits can be applied to Nutanix Professional Services available at the time of redemption
- The decision on specific Professional Services is not required at time of Flex Credits purchase
- Partial Flex Credits balances can be pooled toward a single redemption

Terms and Conditions
