# 3 Ways to Modernize Database Environments with Nutanix

## 1 Refresh Your Oracle Database Environment

**NUTANIX™ + ORACLE®**

**Maximum Efficiency**
Deploy, operate, & manage Oracle databases with one-click ease.

**Optimize Scalability**
Scale Oracle workloads on-demand no matter how large.

**Deliver Predicatable Performance**
Nutanix keeps data close to compute for better performance and availability.

**Leverage Flexibility**
Deploy in the environments you choose & manage all through a single control plane

**Nutanix Solution for Databases** enables performance, availability, and scalability. Its hyperconverged nature brings virtualization, storage, compute, networking, and security into a simple, scalable environment.

With compute and storage resources and database copies available in an instant, time-to-market for new services has dropped from 2-4 days to 4-6 hours.

## 2 Supercharging Your Microsoft SQL Server Environment

**NUTANIX™ + Microsoft® SQL Server®**

**2012 2016 2019**

**Version Support**
Nutanix eases your transition to new versions of SQL Server as old versions reach their end of life and end of service.

**Data Locality**
Nutanix keeps data close to compute for better performance and availability.

**Extend SQL Server into the Cloud**
Nutanix converges private, public & hybrid clouds, all managed through a single control plane.

**Assimilate Physical Servers**
Nutanix frees you from the need for physical servers.

By streamlining tedious, manual tasks, **Nutanix** can dramatically reduce the off-hours work required of database administrators (DBAs).

Reduce DBA overtime up to **50%**

## 3 Nutanix Era Supporting Multiple Databases

**PostgreSQL** · **Microsoft SQL Server** · **ORACLE®**

**NUTANIX™**

**Nutanix Hyperconverged Infrastructure (HCI)** supports all commercial database platforms.

**Nutanix Era** simplifies administration across database engines and deployment environments.

**Nutanix** helps satisfy demanding business needs with accelerated dev/test timelines and improved overall database performance.
decrease provisioning time by **97%**

Cut backup storage costs by **60%**

Cut DBA off hours work by up to **50%**
