revenue gained/
protected per year

57.5K annual reduction
in KgCO₂ due to reduced
number of physical
servers required

97% reduction in
unplanned downtime

16% more productive
Application Developers

CUSTOMER QUOTE:

“It is always-on infrastructure. Now that we’re on NCP, none of the users of any of our applications can even remotely point to the infrastructure as the bottleneck causing performance issues. For example, our customer statements hadn’t been released in under 20 hours for the last 10+ years. That meant if you were a business customer of the bank and wanted to check your statements the next morning, you waited 20 hours, which meant you never got your statements on the first business day of the month. We now produce statements in 1 hour and 40 minutes on Nutanix.”
