

ENABLE A SECURE AND CONNECTED HYBRID MULTICLOUD ENVIRONMENT WITH NUTANIX AND PALO ALTO NETWORKS

Discover how to connect all your clouds securely using Palo Alto Networks VM-Series Virtual Next-Generation Firewalls with Nutanix Flow Network Security and Flow Virtual Networking for your Nutanix AHV environments.

SECURE YOUR APPLICATIONS

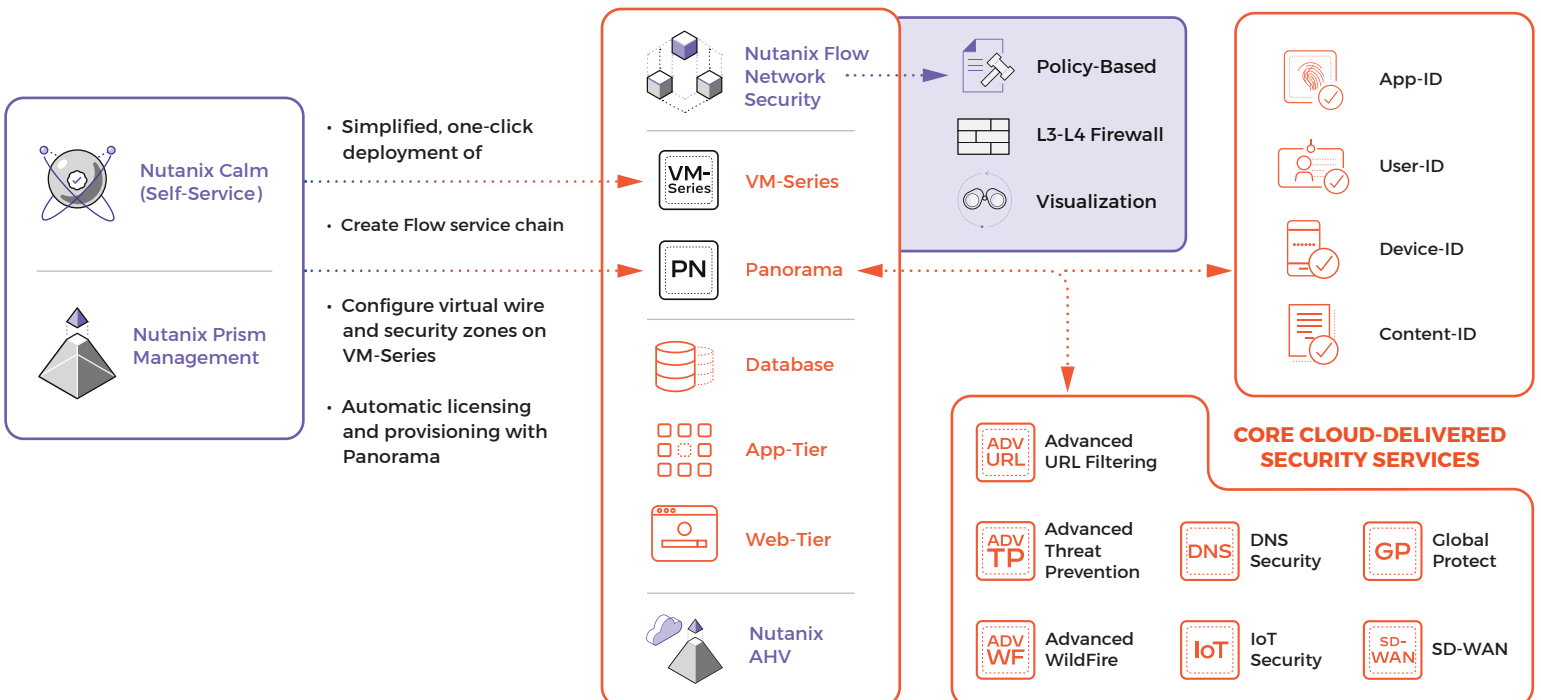

Nutanix Cloud Platform customers who use AHV now have a comprehensive security solution that includes Nutanix Flow Network Security microsegmentation and Palo Alto Networks VM-Series Virtual Next-Generation Firewalls for a complete workload security solution using application-level inspection and advanced security services.

HYBRID MULTICLOUD SECURE CONNECTIVITY

Nutanix's Flow Virtual Networking delivers the ability to extend and connect your on-premises Nutanix clusters to public clouds like Microsoft Azure. Leveraging Palo Alto Networks VM-Series virtual firewalls, networks can be segmented, isolated, and secured simplifying for workload placement. This empowers network teams to have holistic control ensuring consistent and secure connectivity across private and public clouds.
