

# MAKE THE MOVE FROM TRADITIONAL INFRASTRUCTURE TO THE NEXT-GEN NUTANIX ENTERPRISE CLOUD

# **Automation and Machine Learning**

Deliver IT as a Service with APIs, integration, and operational analytics

# VM-centric protection and DR

Operate & automate at VM level with enterprise service levels

#### **Linearly scaling infrastructure**

Make scaling predictable, paying-as-you grow

# **Localization and intelligent tiering**

Get the best of all flash performance and large capacity in a scale-out cluster

## One platform for all workloads

Banish infrastructure silos as you virtualize different workloads, serve file and deliver block storage

## **Cloud-ready**

Become future-proof and run applications and storage data in the most efficient way

## **Consumer-grade management**

Improve productivity with one simple tool for all management

#### **Non-disruptive operations**

Get the configurable data resiliency and HA for all applications

#### Software-defined

Support a wide range of platforms and break dependence on hardware for upgrades and features

#### **Multi-hypervisor support**

Use your choice of virtualization stack including native virtualization

#### Web-scale Meets Hyperconverged

Eliminate traditional infrastructure complexity and bottlenecks

# Cisco and NetApp FlexPod SERVER | NETWORK | STORAGE
