

CentralSquare Mobile Enterprise

Glanceable screen design, visual heads-up cues for hot hits, and drag-and-drop field population for faster report completion.

CentralSquare Mobile Enterprise keeps everyone in the know with tight integration to your CAD and RMS. Responders get a bi-directional, real-time connection to dispatch, command staff and partnering agencies – with a user design that makes it easier to get what responders need. Respond efficiently with historical information, alerts and intelligent mapping and further extend convenience to your responders away from their vehicles with the Field Ops app built for smartphones and tablets.

KEY SOLUTION BENEFITS

CentralSquare helps deliver end-to-end Mobile Enterprise solutions. Here are main benefits of the solution:

- Responders spend more time in the community and less time behind a desk
- Real-time information including location, detection, and text messages can be sent directly to a mobile device, keeping everyone informed
- Visual heads-up notification of hazards, warnings, unread comments and key safety information allow responders to focus on the road
- Extend your CAD and Records data to your emergency vehicle and beyond

CUSTOMER/PARTNER QUOTE/MARKET REFERENCE

“San Diego’s topography is particularly challenging. Canyons and mountains traverse our service area and make it difficult to coordinate multi-until responses. Mobile Enterprise allows us to view a satellite overlay of the scene which provides depth of detail that enables us to proactively dispatch the appropriate resource for response, in addition to being able to view any access points for evacuations.”
– Susan Infantino, Communications Manager, San Diego Fire-Rescue.

“Mobile Enterprise empowers field personnel by putting the information they need at their fingertips to better respond to calls and enhance officer and public safety.”

– Lt. Robert Mills, Austin County, TX

“The greatest improvement is the fact that dispatchers can now see exactly where officers are located on a map and then dispatch them by proximity. Clearly this will reduce officer response times, which will help to clear traffic and save lives.”

– Scott Silsbee, Chief Information Officer, California Highway Patrol

Nutanix Ready Validation

CentralSquare Mobile Enterprise

"We use the mobile product with approximately 150 MDT's deployed in the field among 50 different fire stations. It's not just the ability of the first responders to get the information quickly and accurately while they're responding, but it's also a huge workload off of our dispatchers to know they don't have to relay that information over the radio where it may or may not have gotten picked up by the responder. It's a very helpful tool we have out in the field."

- Jennifer Libby-Jones, Administrative Support Manager, North County Dispatch JPA, CA

ABOUT CENTRALSQUARE TECHNOLOGIES

CentralSquare Technologies is an industry leader in public safety and public administration software, serving over 8,000 organizations from the largest metropolitan city to counties and towns of every size across North America. CentralSquare's broad, unified and agile software suite serves 3 in 4 citizens across North America. The technology platform provides solutions for public safety, including 911, computer-aided dispatch and records management. For public administration agencies, CentralSquare provides software for finance, human capital management, payroll, utility billing, asset management and community development.

ABOUT NUTANIX

Nutanix makes infrastructure invisible, elevating IT to focus on the applications and services that power their business. The Nutanix enterprise cloud platform delivers the agility, pay-as-you-grow economics and operational simplicity of the public cloud, without sacrificing the predictability, security and control of on-premises infrastructure. Nutanix solutions leverage web-scale engineering and consumer-grade design to natively converge compute, virtualization and storage into a resilient, software-defined solution that delivers any application at any scale.
