Nutanix+Crave for developers: elastic infrastructure, accelerated builds.

CRAVE.iO {⚡}

KEY SOLUTION BENEFITS

Crave.io delivers an end-to-end solution for engineering organizations. Here are the main benefits of the solution:

- Faster build and test times
- Scalability and elasticity of infrastructure by creating an in-house cloud environment
- Better utilization of shared infrastructure
- Happier developers

"Crave reduced our build times from 3 hours to 30 minutes"

– Badri Kollu, Sr Director of Engineering, Broadcom

Crave is a developer productivity platform that ties together the developer workflow, the continuous integration system, and Nutanix hardware and software with a simple interface and a single pane of glass to manage it all.

Crave manages the entire build and test infrastructure consisting of virtual machines, containers, storage and network connectivity to provide Nutanix customers with:

- Faster build and test times
- Infrastructure elasticity by creating an in-house cloud environment
- Better utilization of shared infrastructure

Crave customers save time and money while making their developers happy by using Crave with Nutanix. Crave solves many pain points, including:

- Slow build times
- Siloed infrastructure
- Inefficient utilization of infrastructure
- Unhappy developers having to worry about their build environment instead of focusing on developing!

Crave Deployment Architecture

ABOUT CRAVE.IO INC

Crave provides developer productivity software that manages an enterprise's entire build infrastructure. Crave enables an elastic environment for developers and CI, resulting in faster build times and lower costs through optimized utilization. With Crave, developers can focus on developing instead of worrying about their build environment.

ABOUT NUTANIX

Nutanix makes infrastructure invisible, elevating IT to focus on the applications and services that power their business. The Nutanix enterprise cloud platform delivers the agility, pay-as-you-grow economics and operational simplicity of the public cloud, without sacrificing the predictability, security and control of on-premises infrastructure. Nutanix solutions leverage web-scale engineering and consumer-grade design to natively converge compute, virtualization and storage into a resilient, software-defined solution that delivers any application at any scale.
