

# ZigiOps Integration Platform

ZigiOps is the most flexible, no-code integration platform. Connect your systems in just a few clicks.

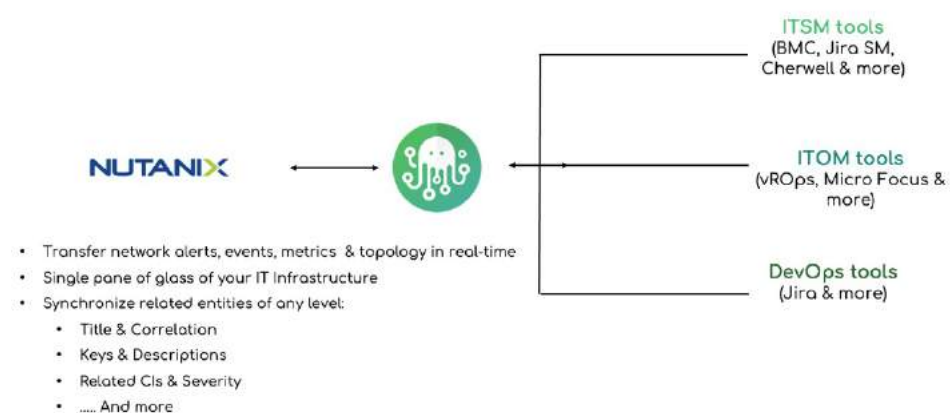

Build, define, and launch your integration in minutes with our fully customizable templates. Transfer all data between Nutanix and other Monitoring, ITSM, and DevOps systems, synchronize all related fields, and align your systems, teams, and operations for improved performance.

## HOW IT WORKS

ZigiOps is a standalone integration platform which stands between Nutanix and other systems you are using. The platform can sync data between Nutanix and other ITSM, Monitoring, and DevOps systems as well as transfer alerts, incidents, and CMBD CIs. Our integrations are bi-directional which means ZigiOps can pull information out of Nutanix, and it can come back to Nutanix whenever there is an update from another system and resolve or close the respective alert.

### ZigiOps – Nutanix Integrations

---

## NUTANIX READY VALIDATION

- ZigiOps 2021.08.650 is validated on Nutanix AHV (AOS 5.20.2)

## NUTANIX – MICRO FOCUS OBM SAMPLE USE CASE

Nutanix provisioned hyper-converged infrastructure (HCI) – such as Clusters, Hosts, Disks, and Virtual Machines – doesn't exist in the OpsBridge database but needs to be monitored. ZigiOps takes the infrastructure information from Nutanix and reports it to OpsBridge RTSM, enriching the topology information with data from Nutanix. Topology is kept up to date with regular checks by ZigiOps.

ZigiOps collects Nutanix events and/or alerts and reports them to OpsBridge as events. The platform syncs all related configuration item details and other information.

ZigiOps collects Nutanix metrics (stats) and reports them to the MF Operations Connector with related configuration item information. This way, these metrics can be accessed by the OpsBridge Performance Perspective and used for the building of dashboards and reports.

---

## KEY SOLUTION BENEFITS

ZigiWave helps deliver end-to-end solutions for system integrations. Here are main benefits of the solution:

- Simple, Easy to use UI – ZigiOps offers a simple UI, which allows users with no technical background to connect Nutanix with other systems in a few clicks.
- Flexibility – Launch your Nutanix integrations in minutes with our fully-customizable integration templates.
- No-Code Integrations – ZigiOps is a no-code integration platform, which covers even the most complex use cases without the need for additional scripts.
- Sync all data – Sync data such as incidents, CMDBs, alerts, clusters, hosts, metrics and more.
- Enrich topology – Enrich topology in other monitoring tools with topology from Nutanix.
- Advanced Data Mapping & Filtering – Connect and sync all related and custom fields from your source and target systems. Exchange docs, comments, attachments, and more.
- Bi-directional Connection – ZigiOps synchronizes systems in a bi-directional manner. Whenever there is an update on the case in one of the systems, ZigiOps will automatically close the related alarm in Nutanix.
- Security – ZigiOps doesn't store any of the transferred data between your systems.

---

## ABOUT ZIGIWAVE

ZigiWave is an ISV, based in Sofia, Bulgaria. Our integration platform ZigiOps was born from the need of businesses to simplify and automate their processes. ZigiOps is the most flexible no-code integration platform. Our product connects some of the most popular Monitoring, IT Service Management, DevOps, and CRM tools.

More than 60 Fortune 1000 companies trust us ZigiOps for their enterprise integrations.

## ABOUT NUTANIX

Nutanix makes infrastructure invisible, elevating IT to focus on the applications and services that power their business. The Nutanix enterprise cloud platform delivers the agility, pay-as-you-grow economics and operational simplicity of the public cloud, without sacrificing the predictability, security and control of on-premises infrastructure. Nutanix solutions leverage web-scale engineering and consumer-grade design to natively converge compute, virtualization and storage into a resilient, software-defined solution that delivers any application at any scale.
