

Comprehensive All-in-One Backup Solution for Nutanix Workloads

Key Benefits

- **Backup technology** provides consistent backup to cloud VMs, as well as on-premises environments.
- **Securely store backup images multiple times** using the small backup functionality to a variety of repositories.
- Backup and recovery support **between multiple clusters**

Products

- Nutanix Cloud Infrastructure
- NC2 (Nutanix Cloud Clusters)
- Objects Storage
- AHV Virtualization
- Files Storage
- Nutanix Unified Storage

Solutions

- VDI
- Hybrid Multicloud
- End User Computing (EUC)
- VMware
- Private Cloud
- Applications
- Microsoft

[Take a Test Drive](#)

ZConverter Backup provides robust support for backing up and recovering operating systems, applications, and data across Nutanix workloads. It utilizes the ZIA format, which is ZConverter's proprietary **source-agnostic system backup technology**. In the event of a ransomware attack or unexpected

outages, enterprises can quickly and easily recover all workload services to Nutanix.

The ZIA format of ZConverter Backup can be shared between ZConverter's disaster recovery (DR) and migration products. Once integrated, enterprises can seamlessly and consistently manage their digital transformation, covering everything from migration and hybrid backup to DR.

Additionally, ZConverter offers easy-to-manage backup capabilities, including intelligent scheduled backups, integrated Excel reports, and agent-free, reboot-free backup.

Key Features

- Backup and Recovery for on-premises servers and VMs, as well as cloud VMs
- Support for a reboot-free, agent-free backup, and multiple storage spaces (such as Local/SAN/NAS/Cloud Storage)
- Full and incremental backup support
- Automated backup image management with rotation backup
- Supports backup storage optimization with compression
- Integrated batch update and management of Excel export/import
- Integrated backup integrated reports for Excel reports
- Bare-metal system recovery from on-premises to cloud VMs
- Interchangeable recovery between BIOS and UEFI
- Restoration of any environment with patented heterogeneous recovery
- Supports resizing disks and partitions with live-action data recovery
- Support for dissipative backups of backup images
- Independent backup images support single recovery without a management server
- Supports cloud migration and disaster recovery services for backup images

Conclusion and Call to Action

ZConverter Backup is a Windows/Linux system backup product that supports live backup using system image backup technology. By using Source Agnostic / No Reboot technology, you can configure the backup environment (Physical Server and Virtual Server) faster than other products.
