

Nutanix on OVHcloud

A scalable and ready-to-use platform combining Nutanix Cloud Platform (NCP) software licences with dedicated, Nutanix-qualified OVHcloud Hosted Private Cloud infrastructure.

Key Benefits

- **Easy adoption.** Deploy complete, ready-to-use Nutanix clusters with no long-term commitment.
- **Data protection.** Take advantage of highly resilient and secure private infrastructure that can help address European and Canadian data requirements.
- **High performance.** Choose from the latest Nutanix-qualified Bare Metal servers to deliver maximum performance from Nutanix HCI.
- **No hidden costs.** Ingress, egress and hardware licenses are included in the price with no surprises.
- **Software investment protection.** With the BYOL service, NCP license portability makes it easy to move existing Nutanix software licenses between on-premises and OVHcloud private cloud infrastructure.

- [Hybrid Multicloud](#)
- [Unified Storage](#)

Ready to get Hands-On?

[Take a Test Drive](#)

The pace of modern business requires fast and frictionless infrastructure consumption. IT teams need to spend more time delivering direct value to the business and less time procuring, deploying, and managing IT resources. Nutanix and OVHcloud have joined forces to deliver the high-powered infrastructure you need, where and when you need it.

Nutanix on OVHcloud solution is a scalable and ready-to-use hyperconverged infrastructure (HCI) that combines Nutanix Cloud Platform (NCP) software licenses in packaged or bring-your-own license (BYOL) services. It also includes dedicated, secure, Nutanix-qualified OVHcloud Private Cloud infrastructures.

A Fast and Simple Infrastructure Solution

Nutanix on OVHcloud is an all-in-one, scalable platform that gives your team quick access to a dedicated, fully installed and functional Nutanix cluster. Next-generation dedicated hardware is integrated with the Nutanix HCI software stack:

Licensing flexibility. All hardware and software licenses can be provided by OVHcloud to help eliminate complexity and hidden costs or bring your own Nutanix license to pair with easy procurement of OVHcloud resources.

Monitored hosts. Physical hosts reside in OVHcloud datacenters and are monitored 24/7 by the OVHcloud team.

Fast to deploy and scale. Your Nutanix cluster is pre-deployed and ready to use.

Nutanix Cloud Platform (NCP)

NCP utilizes a modern, software-defined architecture that natively integrates all IT resources to run any application while delivering true consumer-grade simplicity to reduce operational complexity.

The Nutanix software stack is optimized and scalable to support the workloads your business depends on. Because NCP runs in OVHcloud as well as on-premises and in public clouds, you can create a hybrid multicloud environment that is completely unified. You can move and run applications anywhere without refactoring and with the same operational model and tools.

OVHcloud

OVHcloud is a global cloud provider that specializes in delivering industry-leading performance and cost-effective solutions to better manage, secure and scale data. The service provider manages datacenters across four continents with its own fiber-optic global network for maximum efficiency.

Bare Metal technology underlies Nutanix on OVHcloud, enabling you to deploy a highly resilient infrastructure quickly or customize a solution to fit your needs. Secure by design, it only takes a few clicks to start enjoying the benefits of strong performance, unlimited network traffic and guaranteed service levels.

[OVHcloud vRack](#) provides private networking for your critical workloads with extended network tunneling via [OVHcloud Connect](#) to link to your datacenters and other locations. The solution also takes advantage of advanced Nutanix security with capabilities that include a hardened software platform, data-At-rest encryption and microsegmentation.

OVHcloud compatible services

HYCU for OVHcloud

Simplify your backups, disaster recovery plans, and migrations for your Nutanix infrastructure. This service offers different HYCU R-Cloud Hybrid Cloud Edition licence packs to protect your Nutanix workloads.

S3*-compatible solution

OVHcloud Object Storage

Get S3-compatible, cost-effective object storage to leverage your data and meet your needs.

<https://www.ovhcloud.com/en-ie/public-cloud/object-storage/>

OVHcloud Key Management Service (KMS)

Manage all your encryption keys in one place. Secure your OVHcloud data using the OVHcloud Key Management Service (KMS), designed for seamless integration with Nutanix environments, and certified Nutanix Ready.

OVHcloud Connect

OVHcloud Connect provides a secure, high-performance link between your company network and OVHcloud datacenters, with everything configurable via the OVHcloud Control Panel. The latest security policies ensure your data and applications remain available and secure. An extended network enables you to connect to OVHcloud via global points of presence or via OVHcloud partners.

Nutanix on OVHcloud: Use Cases

Move to Cloud

Move applications to the cloud with no code change

Disaster Recovery Plan

Quickly build-out disaster recovery sites in any OVHcloud geographies

On Demand Elasticity

Rapidly burst into the cloud for quick ramp and seasonal demand
