# Revolutionize Your Virtual Desktop Strategy with Workspot and Nutanix

## Cut VDI costs while delivering unmatched security, simplicity, and user satisfaction across multicloud environments.

**KEY BENEFITS**

- **Cost Efficiency:** Designed to reduce costs with just-in-time and just-enough resource provisioning.

- **Seamless Integration:** Fully validated for Nutanix AHV (Acropolis Hypervisor) and NC2 (Nutanix Cloud Clusters) on Azure and AWS.

- **Simplified Operations:** Centralized control for apps and desktops across multicloud environments.

- **High Availability:** Helps ensure high uptime and fast disaster recovery for critical applications.

- **Enhanced Security:** Zero-trust architecture safeguards your data and workflows.

> **Products:**
> - AHV Virtualization

> **Solutions:**
> - Desktop-as-a-Service (DaaS)
> - End User Computing (EUC)
> - Hybrid Multicloud
> - VDI

## Overview

Workspot, a purpose-built, intelligent platform that unifies Enterprise Browser, Desktop-as-a-Service (DaaS), and Digital Experience (DEX) management, combined with Nutanix's hybrid multicloud infrastructure, introduces a precision-engineered approach to transform your VDI strategy by helping to optimize resources when and where they're needed.

This partnership is designed to deliver exceptional cost savings, help simplified management, and enhance digital experiences for organizations worldwide. Together, Workspot and Nutanix provide sophisticated scalability, flexibility, and security.

Just-in-time and just-enough resource provisioning play a pivotal role to help in these cloud cost savings. With just-in-time provisioning, cloud resources are deployed only when users need them, eliminating idle resource charges. Just-enough provisioning helps ensure that resources are perfectly sized for user needs, from lightweight VMs for task workers to powerful VMs for advanced users. This approach is dynamically monitored and can be adjusted over time, ensuring optimal utilization and avoiding over-provisioning.
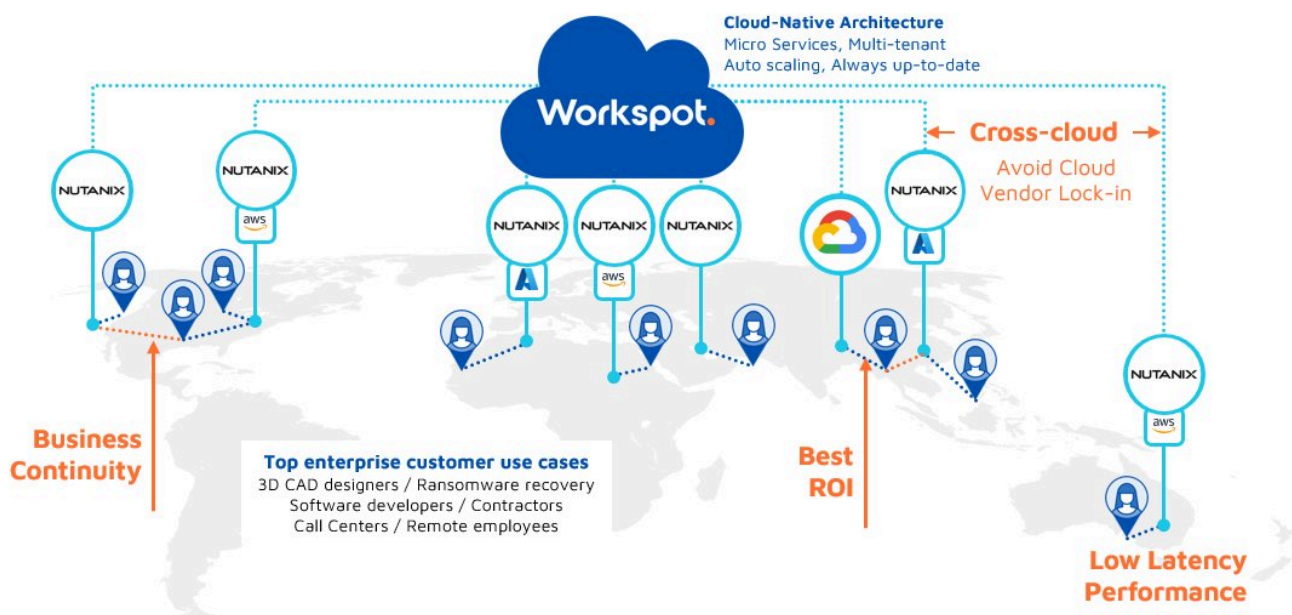

# Workspot + Nutanix: The Solution

Workspot's cloud-native design integrates seamlessly with Nutanix AHV and NC2 on Azure and AWS. This combined solution helps to simplify VDI management while ensuring robust security and performance. With features like built-in load balancing, observability tools, and advanced API integrations, Workspot empowers IT teams to optimize operations and improve end-user satisfaction.

**Highlights:**

· Rapid deployment with intuitive cloud-native control.

· Centralized management for Windows, Linux, and web applications.

· Real-time monitoring and historical data insights for proactive IT management.

# Call to Action

Discover how Workspot and Nutanix can help you modernize your VDI strategy. Designed to reduce costs, help improve operational efficiency, and provide exceptional user experiences.
